Special MI CC9 Meitu Edition is a Chinese smartphone variant, and now intercepts the MIUI 12 upgrade as we speak. The update brings version number V12.0.2.0.0QFEXNXM on board, along with Android 10 in China as a stable update. This helped CC9 Meitu Edition join the wagon with its other brothers in the series. The update is arriving through OTA,
which could take some time. If you don't want to wait for the update, you can simply tap here to download the new firmware and upgrade to the same manual. Xiaomi Mi Mix Alpha is a future smartphone with FullView screen that offers a screen-to-body ratio of over 180% from Xiaomi. Thanks to the complete display, it has the titanium alloy frame and ceramic
rear band for stronger construction quality. The device has a flexible 7.92-inch Super AMOLED display that will be powered by the Snapdragon 855+ flagship chipset. It will be equipped with 12GB RAM and 512GB internal storage because there is no expandable memory available. The triple rear camera of a 108+12+20MP sensor, with a dual-LED flash.
Due to the foldable display nature, the rear cameras can function as a selfie camera. Whereas, it will have an in-display fingerprint sensor, 4050mAh battery, 40W fast fast support, and more. The device will be released with Android 10 Xiaomi Mi 9 Pro 5G This is
another smartphone from the Mi 9 series released in September this year with 5G connectivity. It features a 6.39-inch Super AMOLED Full-HD+ display with HDR10 support. The device is powered by Snapdragon 855+ SoC, up to 12GB RAM, up to 512GB of internal storage, a triple camera on the back. It has most connectivity options, except for a 3.5mm
audio jack and sensors such as an on-screen fingerprint sensor and more. The device has a 4000mAh battery with 40W fast charging support. It already runs on Android 10 on top of Miul 11 out-of-the-box. Update of June 16: After going through many Xiaomi phones, the version of Miui 12 has finally arrived on Mi 9 Pro 5G at the same time as Mi 9 in China.
Check out for the update that carries the software version number MIUI V12.0.1.0.QFXCNXM via OTA, which could take days and weeks to finally get to your phone. [Source] Update of July 20: You can download the China stable for MIUI 12 for Mi 9 Pro 5G by clicking here. It is currently only available in China and thus it will arrive in other countries soon.
Update of August 14: Xiaomi released the new MIUI 12 beta 20.8.14 on Mi 9, Mi 9 Pro 5G and Redmi K20 Pro. However, after citing some stability issues, the update to arrive. Xiaomi Mi 9 Pro Mi 9 Pro is the brother of Xiaomi Mi 9 Pro 5G. It is a
standard 4G LTE variant, and the rest of the specifications or features are all the same. This model also runs on MIUI 11 based on Android 10 xiaomi has a lot of devices, and top-notched and recently released is Xiaomi Mi 9. It has a giant 6.39-inch Super AMOLED
display with HDR10 and Corning Gorilla Glass 6. It was equipped with the latest Snapdragon 855 SoC, equipped with 6/8GB RAM and 64/128GB storage space, along with MIUI 10 and has currently received Android 10 Q beta 3 updates as part of the Google Treble
Project. Global Stable ROM China Stable ROM Update of June 16: Today, Xiaomi Mi 9 is finally intercepting MIUI 12 bearing version number V12.0.1.0.QACNXM pushed through OTA for Chinese users. This is a beta update that brings all the miul 12 features associated with features mounted on Android 10 as well. [Source] Update of
June 23: Next door Redmi K20 Pro and Mi 9T Pro, Xiaomi Mi 9 also scans on the MIUI 12 update in Europe before reaching other regions. This is a MIUI 12 Beta SEE Stable update with software version number and as with any beta updates, it is released to random users in Europe before the start of a mass release. You can download further by clicking
here. As with Mi 9T Pro, The Mi 9 has already been granted stable MIUI 12 in China before reaching elsewhere. Update of July 1: MIUI finally announced that full-rights MIUI 12 is running to four devices for example, Mi 9, Mi 9T, Mi 9T Pro, Redmi K20, and Redmi K20 Pro. Update from July 9: Mi 9 is finally getting its share of Android 10-based MIUI 12
upgrade on a larger scale. Update of July 24: Talking about the ongoing MIUI 12 update, users in Russia are finally getting the much-anticipated MIUI 12 update on their Mi 9 smartphones. No doubt the update is arriving a little later than other regions getting it, but everything's fine when it ends well. It's an OTA launch and it should take days to weeks before
intercepting all Mi 9 units in Russia. Those who want to manually grab it by tapping it here for a manual installation. Update of July 27: More than a month after the release of the beta stable for Mi 9, Xiaomi Mi 9 now becomes stable MIUI 12 update with the number V12.0.3.0.QFACNXM that runs through OTA with the security patch of June 2020. You can
tap here to get the firmware for flashing manually. Update of August 14: Xiaomi has released another MIUI 12 beta update with the number 20.8.14. Released yesterday, Xiaomi postponed the launch citing some stability issues and thus Mi 9 users will have to wait a little longer to get the new beta update. There is no ETA until the beta update gets to mention
the stable update. The device is already running on stable miui 12. Update of August 12: As of today, Vodafone blocked Xiaomi Mi 9 intercepted MIUI 11, which is bizarre since other ROMs receive MIUI 12. Speaking about the Vodafone variant, the phone now gets V11.0.10.0.QFAEUVF, which is a stable beta version available through OTA notification
although it takes some time to arrive. [Source] Xiaomi Mi 9T Pro In 2019, Xiaomi Mas launched a lot of Devices in the Mi series, and Mi 9T Pro is one of them that comes as a flagship smartphone. It is the Chinese version of the Redmi K20 Pro and has the same 6.39 inch Super AMOLED HDR display. The device offers Android 9 Pie (MIUI 10), Snapdragon
855 SoC, up to 8GB RAM, up to 256GB on board memory. It has 48+8+13MP triple rear cameras and a 20MP pop-up camera. The smartphone has a 4000mAh battery, along with the 27W (Quick Charge 4+) fast charging rack. Android 10 update for this device is also around the corner and users might have to wait for Q1 or Q2 from 2020 Update of June
23: Next in the queue to get the latest version MIUI 12 stable is Xiaomi Mi 9T Pro, which is a Redmi K20 Pro equivalent for outside users The stable MIUI 12 update runs through the OTA bearing version number V12.0.1.0.QFKMIXM and will be available to those who are currently on V11.0.4.0.QFKMIXM. This is an OTA update and thus the update should
reach your device in the air and since it is released in batches, you may have to wait for it. Chinese Mi 9T Pro has already upgraded to MIUI 12. K20 and Redmi K20 Pro finally receive a stable update MIUI 12. Note that there is no information if it is available in all regions. Update of July 27: After its global and Indian version received the Android 10 upgrade based on MIUI 12, the Mi 9T Pro is finally rolling to update to its Russian units codenamed Raphael. It is a MIUI 12 update based on Android 10
and bears the version number V12.0.1.0.QFKRXM. As always, the update is via OTA and should be available on your phone shortly. You can download it manually using this link. Xiaomi Mi 9T is the Chinese version of the Global Redmi K20. The Mi 9T was released in June 2019 along with the same 6.39-inch AMOLED display, Snapdragon 730 chipset,
6GB RAM and 64GB/128GB onboard storage. While the rest of the specifications and features are the same as the Mi 9T Pro/Redmi K20 Pro. It runs on Android 9.0 Pie (MIUI 10) out-of-the-box and should receive the Android 10 update very soon. Although Xiaomi has not yet announced the timeline for this device. Download here – The Xiaomi Europe
version has started to push OTA updates for Xiaomi Mi 9T in China with the v12.0.1.0.QJBCNXM firmware version. It takes about two weeks for a stable version to reach India, so we can expect Android 10-based MIUI 12 on Mi 9T is
based on Android 11 and it is very possible that Xiaomi skips the beta part and launches android 11 based on MIUI 12 instead. Update of July 1: MIUI has officially announced that it is Mi 9T in China and elsewhere
finally becomes MIUI 12 Stable based on Android 10. It is available with version number V12.0.2.0 and should arrive through OTA in batches. [Source] Update from July According to the latest comment by the official Weibo MiuIbo handle, MIUI 12 is running to a few phones in the second phase and The Mi 9 SE is likely included in the list. The update could
arrive at the end of July. Update of July 25: There is bad news for Xiaomi Mi 9T users. Apparently, the global, European and Russian versions of the phone have already been updated to MIUI 12 based on Android 10, the update has been removed. This comes from a Xiaomi moderator on Mi Community, making it a legit. The statement notes that there have
been some problems with the new update and therefore users will no longer be able to upgrade for a period of time. Xiaomi will release the updated version soon with bug fixed in a step-by-step way to these variants. [Source] Update of August 4: A few days ago, Xiaomi was forced to remove the MIUI 12 upgrade on Xiaomi Mi 9T on its global, Russian and
European variants. Cut to now, the global version of Mi 9T is getting the MIUI-based update 12 with all the fixes that have caused problems with the latest updates. The new software version bears the number V12.0.3.0.QFJMIXM which will solve the problems discovered on V12.0.1.0 and V12.0.2.0 without any hassle. The update is being rolled through
OTA, so you have to keep an eye out when it arrives that could take days. On the other hand, you can simply tap here to download the firmware and flash it on your device. Xiaomi Mi 9 Explorer is also known as Xiaomi Mi 9 E
8GB/12GB RAM, 256GB internal storage, a 48+12+16MP triple rear camera and a 20MP selfie shooter. It has a 3300mAh battery and 27W fast charging support that comes with MIUI 10 based on the Android 9.0 Pie version. The device should attract android 10 update very soon. Estimated date: [Q1/Q2, 2020] Xiaomi Mi Mix 3 5G Xiaomi Mi Mix 3, the latest
Mi Mix 3 5G hosts the high-end Snapdragon 855 associated with Adreno Adreno 640 GPU and 6GB RAM and yes, it is supported 5G thanks to the Snapdragon X50 modem. Introduced in May 2019, it is currently one of 21 devices that support Android 10 beta under Project Treble, which means that you can actually download the beta update immediately.
Although Xiaomi has not posted any timelines, we expect to launch for these two supported devices by early 2020. Update of July 24: Xiaomi Mi Mix 3 5G which received Android 10 update. According to an email, Mi Mix 3 5G won't get the much-anticipated Android 10, although
it will get MIUI 12 based on Android 9.0 Pie soon. [Read more] Update: The 4G variant has already upgraded to Android 10, however, Android 10 for Mi Mix 3 5G is still unavailable and there is no update around MIUI 12 is coming for Mi Mix 3 5G.
Apparently, miui 12 update is now the release for the phone with security patches July 2020 and yes, it is still based on Android 9.0 Pie. The update for its European version or you can tap here to download and light it manually on your device. Update of September 22:
According to the latest update, Mi Mix 3 5G is now picking up MIUI 12 update on its global variants bearing version number V12.0.1.0.0.PEMMIXM that brings a string of features and design changes, among others. The update is releasing through OTA, so you need to be a little patient to get your hands on it. Xiaomi Mi 9 SE Next in the list is Xiaomi Mi 9 SE.
a mid-range smartphone that falls into the price category below 300 EURO. The phone supports sdm712 10nm octa-core processor tacted to a maximum of 2.3 GHz while the Adreno 616 GPU supports graphics with 6GB built-in RAM and 64/128GB internal storage, which are some of the best specs in this price range thanks to the brand like Xiaomi.
48+13+8MP triple-camera rear configuration and a 20MP front add another stone in the jewelry as well. Finally, the device comes with MIUI 10 based on Android Pie 9.0 pre-loaded, which means there is no doubt that it will get Android 10 update, but probably the timeline is unavailable. Download Here Update as of July 20: According to the latest reviews of
the official Weibo Wednesday handle, MIUI 12 is running to a few phones in the second phase and Mi 9 SE is likely included in the list. The update could arrive at the end of July 12 is running to a few phones at least in China. Miui 12
stable update is running with the software version V12.0.1.0.QFBCNXM at 817MB in size and is in the air. You will have to wait until you finally get on your phone or you can tap here to download China's stable firmware for the same thing. Update of August 14: Xiaomi Mi 9 SE will receive another MIUI update, but is based on Android 10. The device in
Europe is now getting a new MIUI 11 update bearing version number V11.0.9.0.QFBEUXM, which is based on Android 10. It comes with a June 2020 security patch and Mi 9 SE is no different. It could take up to weeks to reach all European units. You can
either wait for the OTA notification or get your hands on the new firmware and flash manual by downloading here. Update to complete the final end of September 2020. This includes Xiaomi Mi 9 SE, too, although ETA is still. Update of August 20: It looks
like Xiaomi has re-released Redmi MI 9 SE MIUI 12 update with version number V12.0.2.0.QFBCNXM for the Chinese version. This inflates up the MIUI version from 11 to 12 for those who didn't upgrade when the last update was around. The update is released through OTA, so either you can wait as the process could take days to weeks to reach your
phone or you can simply tap here to download the firmware and get it manually flashed on your phone. Xiaomi Mi Mix 2 Update from September 8: Mi Mix 2 is now officially getting MIUI 12 based on Android 9.0 Pie wearing version number V12.0.1.0.PDECNXM in its home country - China. It is available through OTA or you can check section MIUI 12 China
Stable ROM to get the OTA package for manually flashing on your device. Xiaomi Mi Mix 2S Update from July 9: Xiaomi Mi Mix 2S arrived in 2018 with Android 9.0 and is expecting Android 9.0 arrived in 2018 with Android 9.0 and is expecting 4.0 and is expecting 
Android 11 or not, but there is a final nail in the coffin situation here. According to Xiaomi Firmware Updater, which is a reliable source to know which phones will receive Android 11-based MIUI 12 in a response on Twitter when someone asked about the update on
Mi Mix 2S. Now that it's almost clear, he won't hold any hope that he'll get the upgrade unless Xiaomi gets it differently. [Source] Update of 20 July: According to a comment ary on MIUI's official Weibo handle, Xiaomi will launch MIUI 12 since it was reported
earlier to be included in the second phase. Download HERE Update from August 8: Xiaomi Mi Mix 2S now intercepts Android 10-based MIUI V12.0.1.0.QDGNXM weighing to 787MB and is rolling out of the Chinese version as of now. The update is OTA, so you'll need a few days to weeks until you rolls out of Chinese units let alone other regional and global
variants will get the update shortly. Click here to download the firmware. Update of August 24: Xiaomi Mi Mix 2S from Russia is another device that will bring the stable update MIUI today after the European Redmi Note 8 Pro. Update brings the firmware version 12.0.1.0.QDGRUXM via OTA available on Mix Mix 2S in Russia now. The OTA update could take
some time and in this case if you want to update to MIUI 12 now, you can click here to download the firmware and get it Manually. Update arrives with software version V12.0.1.0.QDGMIXM is run through OTA. You can also either wait for the OTA notification
to arrive, which could take a few days or so or you can click here to download the firmware and flash it manually on your device. Update of January 22: Xiaomi Mi Mix 2S now intercepts Android 10 right now. The update carries version number V11.0.3.0.QDGMIXM bundled with ANdroid 10 and is a globally stable beta version pushed through OTA. The
update weighs to 1.9GB and comes with a January 2020 security patch. Here's the link to download the OTA package so you can flash manually. Xiaomi Mi 9 Lite Asa suggests the name, is the lite version of the standard model Mi 9. The phone was released in September 2019 along with a 6.39-inch Super AMOLED display, Snapdragon 710 SoC. It is
coupled with 6GB of RAM, 64GB/128GB of internal storage (extensible up to 256GB via hybrid slot). The device has a triple rear camera with 48+8+2MP sensor, a 32MP selfie shooter, an in-display fingerprint scanner, a 4030mAh battery with 18W fast charging support and more. The phone runs on Android 9.0 Pie over MIUI 10 out-of-the-box. Although
Xiaomi has not revealed any timelines for the Android 10 update of this device. It is expected that Mi 9 Lite should reach the latest update by the end of 2019, most likely. Update of August 17: Xiaomi Mi 9 Lite, also known as Xiaomi Mi 9 Lite, also known as Xiaomi Mi 9 Lite, also known as Xiaomi Mi 9 Lite should reach the latest update by the end of 2019, most likely. Update of August 17: Xiaomi Mi 9 Lite, also known as Xiaomi Mi 9 Lite, als
MIUI version from 11 to 12. The updated software number for the global version is V12.0.2.0.QFCEUXM and, finally, the Russian version is yetting V12.0.2.0.QFCEUXM and, finally, the Russian version is yetting V12.0.2.0.QFCEUXM and, finally, the Russian version is yetting V12.0.2.0.QFCEUXM and finally is yetting V12.0.QFCEUXM and finally is yetting V12.0.QFCEUXM 
12 post to get information about all about MIUI 12, as well as download links. Global version of the Russian version Version of August 26: After the release of miui 12 update on most devices in Europe, Xiaomi sent another update aimed at those who have not yet updated. This is a consecutive update with version number V12.0.3.0.QFCEUXM, which is an
increase from last week's V12.0.2.0 update. It is pushed through OTA, although you can bypass it by downloading right now by clicking here and manually flashing the same on the device. Update of August 29: Xiaomi relaunched MIUI 12 on Xiaomi Mi 9 Lite on its global version. The update comes with a version number V12.0.3.0.QFCMIXM after the
previous version V12.0.2.0 does not roll out for all. The update is in and should arrive soon, although you can still use this link to download the new firmware and flash it to your device manually. Xiaomi Mi Mix 3 Considered as Apple from China, Xiaomi Mi Mix 3 Smartphone pilot last October. It has a large 6.36-inch Super AMOLED screen with
Corning Gorilla Glass 5 with a resolution of 1080×2340 pixels. It is powered by Snapdragon 845 octa-core SoC, with 6/8/10GB internal storage, along with maximum internal storage of up to 256GB. It was released immediately after Android Pie 9.0 was officially, which means it had the new out-of-the-box operating system with MIUI 10 on top of it. No doubt it
will get Android 10 as the official release took place in September of this year, while it is also eligible to get Android 11 in 2020. Update of March 11: The Russian version number 11.0.2.0.QEERUXM, which is available through OTA or you can tap here to
download and flash it manually on your device. Update of March 14: After beating the heat of many other phones that received the upgrade Android 10, Xlaomi Mi Mix 3 finally reaches Android 10 in the global version with the security patch of February 2020. That's almost two months after the Chinese version intercepted the update. The new update brings
the software version MIUI 11.0.3.0.QEEMIXM on board weighing to 2.0GB and is running through OTA, so it should take some time to intercept on the long list of compatible devices. According to the latest update, Mi Mix 3 will receive the MIUI
12 update through the Mi Pilot testing program before a public release is released sometime in August. There is no ETA as of now, but the update of July 20: A comment by the official Wednesday handle of Weibo confirmed that MIUI 12 will soon start running MIUI
12 stable updates to a handful of devices. Mi Mix 3 is part of the second phase, according to a previous report, so it has to start running by the end of July. Update as mentioned previously. The device is now getting MIUI 12 upgrade as
part of the Mi Pilot program. It carries version number V12.0.1.0.0QEEMIXM and is pushed through OTA, although users can still download the new firmware and flash it manually on their devices. Xiaomi Mi 8 Pro Last year, a series of smartphones were launched in the Mi 8 series, would be The Mi 8 Pro, which, as the name suggests, is the high-end model
compared to others. Introduced in September 2018, it runs on the processor Snapdragon 845 tacted at 2.8GHz (max), while has 128GB of internal storage and 6/8GB RAM options. It has a front and rear window with Corning Gorilla Glass 5 protecting the 6.21-inch AMOLED display with a density of 402 PPI. With a powerful processor and abundant abundant
and one major update yet, is a key candidate to still receive another Android 10 update, no doubt. Download HERE Update from July 15: Xiaomi Mi 8 Pro will soon receive its stable MIUI 12 based on Android 10. However, the company is pushing the June 2020 Android security update to Mi 8 Pro at the time to write this. The update bearing version
V11.0.4.0.QECRUXM is live in Russia, although other variants will get the update too. Click here to go for a manual installation. Update of August 8: Wait for Mi 8 Pro or Mi 8 Pro has been updated. According to Zhang
Guoquan, who is the director of the development of mobile phone software at Xiaomi, MIUI 12 for MI 8 Pro (Mi 8 UD) is on its way and is due to be released next week. This gives us only a few days to wait until the phone starts to receive the much desired update [Source] Update of August 17: The Chinese version of Xiaomi Mi 8 Pro now gets the long
awaited upgrade MIUI 12 based on Android 10. The running update bears version number V12.0.1.0.QECCNXM and is available via OTA update. We have the firmware update said with us that you can click here to download and manually flash it. Note that Xiaomi Mi 8 Pro is also known xiaomi Mi 8 Pro UD version. Xiaomi Mi 8 Transparent Edition Update
from July 20: Mi 8 Transparent Edition from Xiaomi is likely to intercept the stable MIUI 12 version later this month. This comes from an official comment from MIUI that the new version is ready for the second phase of the rollout. Xiaomi Mi 8 Standard Model Mi 8 has a specs almost similar to that of the Pro variant, which expects the telephoto lens and a
variety of ram and ROM options to be from where to choose, would be 6/8GB and 64/128/256GB respectively. It has already received MIUI 10.1 based on Android Pie 9.0 and is up for Android 10 along with Mi 8 Pro and Lite since it has only been a year since its launch. Download Here Update from July 15: Xlaomi Mi 8 is slated to intercept THE 12th stable
MIUI by the end of July or mid-August. It is currently getting MIUI 12 beta 20.7.9 with a June 2020 security patch. The update of July 20: Based on an official comment posted by MIUI's official Weibo handle, MIUI 12 will soon begin to run on a handful of
compatible devices and according to a speculated ETA, could be released later this year, and Xiaomi Mi 8 will likely do from the second phase. Update of July 30: Xiaomi Mi 8 was due to receive MIUI 12 in the second phase. Update as users had already confirmed the
interception on their devices. Their. no official announcement about it as of now, although MIUI 12 version number V12.0.1.0.QEACNXM says otherwise. You can upgrade to the latest firmware or wait until a confirmation arrives. [Source] Update as of July 31: Mi 8 started intercepting MIUI 12 V12.0.1.0.QEACNXM yesterday and now we have OTA update
for the same thing. Click here to download. Xiaomi Mi 8 Lite Xiaomi 8 Lite is indeed a toned version of my 8 and has SDM660 in an entry-level price range. It has two ram and ROM variants, along with a dual 12+5MP rear and a single 24MP shooter. It is also one of Xiaomi's smartphones to get Android 10 updates now that Google has released the operating
system this month and will be followed by a launch at the end of Xiaomi early or later next year. Update as of August 3: After Mi 8 updated to MIUI 12, it's time that Mi 8 Lite too get the update. It seems that it is today that this device is getting hit at MIUI 12 stable bearing version number V12.0.1.0.QDTCNXM in China. The update is available through OTA
and should reach your device in batches, so you need to be patient about it. If you don't want to continue with an OTA rollout that could take days, click here for a manual installation on Xiaomi Mi 8 Lite is now intercepting the upgrade of MiUI 12 based on Android 10
after the Chinese version received the update early last month. The update early last month. The update brings version number V12.0.1.0.QDTRUXM and runs through OTA, which means it would take a few hours to even take days to get to your device. On the other hand, you can click here to download the latest firmware for Russian Mi 8 Lite and flash it manually. Update of September
21: After hitting the Chinese and Russian version, MIUI 12 is now running for Xiaomi Mi 8 Lite on its global version from 11 to 12 on Mi 8 Lite worldwide. The update is available via OTA, so you will need to be patient about it or you can click here to download the same
thing. Xiaomi Mi 8 Explorer Edition Xiaomi Mi
also has a 12MP+12MP dual rear camera with 4-axis ois and other features, while the front has a 20MP sensor. The device was released with Android 9.0 based on and will get his major upgrade by the end of this year, so expect him to reach the device in a few days. Update of August 17: Xiaomi has now released Android 10-based MIUI 12 left, right,
center, and up. Xiaomi Mi 8 Explorer is the next in the series to receive 12 upgrade in your home country. The update carries the version number V12.0.1.0.QEHCNXM that you can upgrade with the airborne update or tap here to download localand and flash manually. Update of August 24: Xiaomi Mi 8 Explorer Edition is now getting yet another incremental
China Stable MIUI 12 upgrade bearing version number V12.0.1.0.QEHCNXM. It brings a lot of changes and improvements compared to its previous firmware version. The update is OTA and therefore it could take up to a few days for the update to reach your device. You can download the firmware here and upgrade it manually. Xiaomi Mi 8 UD Update of
July 20: Based on an official comment from the Weibo handle at MIUI, MIUI 12 is set to roll on a handful of devices in the second phase of blowing up. The upgrade may be launched by the end of this month. Update of August 8: Wait for Mi 8 Pro or Mi 8 UD users getting a MIUI 12 is about to end soon. After the standard version received the upgrade at the
end of last month, the status for Mi 8 Pro has been updated. According to Zhang Guoquan, who is the director of the development of mobile phone software at Xiaomi, MIUI 12 for MI 8 Pro (Mi 8 UD) is on its way and is due to be released next week. This only gives us a day to wait until the phone starts to receive the much desired update [Source] Update as
of August 17: The Chinese version of Mi 8 UD is getting Android 10-based MIUI 12 update bearing version number V12.0.1.0.QECCNXM which yanks up devices
that were on MIUI 11. It is a beta update and part of the Mi Pilot program available in the air for eligible devices. You can wait or tap here to download the flash firmware manually from your device. Xiaomi Mi A3 This year Xiaomi launched another Mi A series smartphone called Mi A3, which is the successor model of the last generation of the Mi A2 series.
This time the company came up with an AMOLED display, an in-display fingerprint scanner for the Mi A3 model. Although it is a hd + 720×1560 pixel display, an in-display fingerprint scanner for the Mi A3 model. Although it is a hd + 720×1560 pixel display. The device has snapdragon 665 SoC, 4GB/6GB RAM, 64GB/128GB internal storage space, etc. It has a triple camera on the back of 48+8+2MP along with a 32MP selfie camera. Meanwhile, it has a
4030mAh battery with 18W (Quick Charge 3) fast charging support. Most importantly, the phone runs on Android 9.0 Pie over The Android 10 update by 2019 or early 2020. Although, there is no official confirmation available yet. Update of July 22:
There's a lot of drama around Xiaomi Mi A3 and its Android 10 upgrade since then received it earlier this year. However, after withdrawing the security patch July 2020, Xiaomi Mi A3 and its Android 10 upgrade since then received it earlier. You can tap here to
download the software for a manual upgrade. Xiaomi Mi A2 Also known as Mi 6X, Xiaomi Mi A2 was introduced last July in a budget-friendly price range of 32.64, and 1258GB. It's also an Android One smartphone, which means it's among the first
to receive major updates, so it already looked after receiving a cuckoo from Android Oreo 8.1 to Android Pie 9.0 last year. It's expected to get Android Here Update from July 29: Xiaomi MI A2 will receive another upgrade, i.e. V11.0.12.0.QDIMIXM
based on Android 10. It bears the Security Patches July 2020 for the Global variant. The phone is running on MIUI 11 and has not yet received MIUI 12. [Download here] Update of January 11: Xiaomi Mi A2 finally intercepted Android 10 today with the December 2019 security patch with it. The update brings V11.0.4.0.QDIMIXM on board its global version.
The update is available through OTA or you can simply hit this link to download the same thing to your device immediately. Update of January 21: Two weeks after Android 10 for Xiaomi Mi A2 was released and withdrawn, it relaunches as of today. The OTA update is rolling in bearing size of 1280.9MB and carrying a January 2020 security patch with it. The
updated MIUI firmware is V11.0.5.0.QDIMIXM. On the contrary, those who have already received the upgrade will receive the aforementioned firmware with a size of 162.8MB. You can still download the OTA package right here and flash it on your device manually without waiting for the OTA version to arrive. Update of September 12: The latest
announcement for Mi A2 dictates that the launch of MIUI 11 based on Android 10 has been released and arrives through OTA at random. This means that the update in which they arrive in phases and thus would take some time to eventually intercept the device. For those who do not want to wait can download the firmware for V11.0.13.0.QDIMIXM tapping
here. Xiaomi Mi A2 Lite Released alongside Mi A2, Mi A2 Lite is so suggests this, a toned version of the standard Model Mi A2. It sports SDM625 timed at 2.0 GHz, along with 3/4GB RAM and 32/64GB internal storage. Instead of getting a 12+20MP sensor at the back with Lite version received a dual camera configuration of 12+5MP. But maybe it's an
Android One smartphone, which means it's very likely that it will definitely get an Android 10 update because it's already gone through a major upgrade from Oreo to Pie. Estimated 4 – 12 November [Q1 or Q2 2020] Xiaomi Mi Play Xiaomi Mi Play is an entry-level smartphone powered by the octa-core Mediatek Helio P35 processor with PowerVR
GE8320 with 4GB RAM that allows it to process faster and faster. It has a 5.84-inch IPS LCD screen and was introduced with Android Pie 9.0 in December 2018, meaning it can still get the Android 10 update because it is eligible, although the Chinese manufacturer hasn't clarified it yet. Estimated date: To be announced Xiaomi Black Shark Introduced with
Android Oreo 8.1 last year, Black Shark is a gaming-oriented smartphone powered by the Snapdragon 845 10nm processor and 6/8GB RAM followed by 64/128GB of internal storage. It seems to have received an Android Pie 9.0 some time ago, which means it is up for yet another major update for example, for Android 10, although it is shrouded in mystery
as Xiaomi has not posted a list of Android 10 supported devices for now. As one of the most powerful gaming phones of 2018, it is speculated to support another major update for Android so we hope that it will get the same someone at the beginning of the year, if not by the end of this year. Estimated date: Xiaomi Black Shark 2 Announced The successor to
last year's Black Shark was introduced by Xiaomi in March 2019. Similar to the previous version, it is a powerful, gaming-oriented smartphone powered by the 7nm last-hand octa-core chipset, accompanied by Adreno 640, 8/8/12 RAM and an internal storage option of up to 256GB. It sports high-end 48MP + 12MP dual sensor at the back and a 20MP front
sensor. It runs on the latest Android Pie 9 and is in line to get the Android 10 Q update without any hassle, although the timeline is in mystery as of now. Estimated date: Xiaomi Black Shark 2 Pro Is the latest gaming smartphone from Xiaomi Black Shark 2 Pro Xiaomi Blac
6.39-inch AMOLED display, Snapdragon 855+ chipset, paired with 8GB/12GB RAM, 128GB/256GB internal storage and more. It has 48+12MP dual rear cameras and a 20MP selfie camera. The device features stereo speakers, anC with dedicated microphone, Bluetooth 5.0, an optical in-display fingerprint scanner, an unremovable 4000mAh battery and
27W fast charging support. The device is running on Android 10 update is somewhere around the corner, although there is no confirmation from the company yet. Estimated date: To be announced Xiaomi Mi 8 Explorer The phone was released in 2018 with a 6.21-inch Super AMOLED display that supports HDR10, Snapdragon 845 SoC,
8GB RAM, 128GB internal storage, a dual 12MP camera and a 20MP selfie shooter. It features Face ID, an in-display fingerprint sensor, a 3000mAh with fast 18W charging, etc. The device came with Android 8.1 Oreo and currently runs on Android 9.0 Pie Pie VERSION OF MIUI 10.1. The Android 10 update could get around Q1 from 2020, most likely on
this device. Although we have to wait for the official announcement. Estimated date: [Q1, 2020] Xiaomi Redmi devices in which each smartphone eligible for Android 10 (MIUI 11) will receive their stable updates during the phase. Note that it may take some time for Android 10 to reach your device, depending on the
region, carrier, etc. Xiaomi Redmi K30i Redmi K30i is a watered version of the Redmi K30 5G and is only available in China. The phone started intercepting MIUI 12, although it would take a few days or weeks to get on the phone if you are a Chinese user. You can choose to upgrade immediately by downloading the software version number
12.0.3.0.QGICMXM or click here. Note that this also means redmi K30i will get hit on Android 11 soon. Xiaomi Redmi K30 Update of June 26: Redmi K30 is also known as Poco X2 in other markets. The phone began intercepting MIUI 12 as part of Xiaomi's MIUI launch in phases. That said, the update is now available in China and will soon be launched in
other markets. You can either wait for the update to reach via OTA or click here to download MIUI 12 version 12.0.2.0.QGHCNXM immediately. Xiaomi Redmi K30 Pro Zoom has finally started the MIUI 12 upgrade in China. Although it released an internal version, it is
similar to a stable version and thus users will not have to until a few iteters are released before a stable version is released. The update routes in China and thus users will be available soon. Update of July 15: Well, really The Redmi K30 Pro Zoom Edition
is finally getting a new MIUI 12 build (stable) for its Chinese variants. The update should arrive as OTA, although users can go for manual installation by downloading the update to Android 10 based on MIUI 12, the 5G version was imminent to
receive the upgrade. Redmi 10X 5G is finally intercepting the upgrade to version number V12.0.2.0.QJHCNXM weighing 720MB. The update is via OTA and thus users will have to wait for a while to intercept. Moreover, they can tap here to download the installation file immediately. Note that it is still limited to users in China. Update of August 4: According to
updates, Xiaomi has relaunched the MIUI 12 model on Redmi 10X 5G in China, wearing an updated software version V12.0.4.0.QJHCNXM available in its home country through OTA. Users can upgrade to the same by downloading the firmware by tapping here and device. Redmi 10X 4G Update of July 22: Also known as Redmi Note 9 in India, Redmi 10X
4G is sold in China and recently intercepted MIUI 12. It was pulled back due to some reason and now it is back on the track bearing version number V11.0.6.0.QJOCNXM. The update is released through OTA and thus should take some time before it reaches your phone. On the other hand, the European, global and Indian iteration of the Redmi 10X 4G
known as the Redmi Note9 is yet to intercept the update. Tap here to download it manually. [Source] Xiaomi Redmi 10X Pro 5G has finally upgraded to Android 10-based MIUI 12 with version number V12.0.2.0.QJLCNXM in China. The update is in the
air and should arrive shortly for users in China while the global variant is yet to get the upgrade. Click here to download for manual installation. Xiaomi Redmi Note 9 Update arrives as MIUI 12 Global Beta Stable carries the version number
V12.0.2.0.QJOMIXM available through OTA at the time. If you don't want to get the new firmware through OTA weighing to 507MB, you can tap here to download Global Stable and flash it on Redmi Note 9. Update of August 4: The Chinese version of Redmi Note 9 (known as Redmi 10X 4G) was the first to intercept the new MIUI 2 update followed
by the Global version. Cut to now, the European drive of Redmi Note 9 is getting MIUI 12 upgrade bearing version number V12.0.1.0.QJOEUXM which yanks up the MIUI version from 11 to 12. This is an OTA update and therefore should take some time to reach your device. You can still download the firmware here and flash it manually on your device if you
don't want to wait. Update of August 11: More than a month after its Chinese equivalent got Android 10-based MIUI 12 update, Note 9 is finally rolling out the MIUI 12 update for its Indian version. The update carries the version number V12.0.1.0.QJOINEXM and is available through OTA. For those who can't wait for an OTA update, here's the link to
download the new firmware and flash it manually on your phone. Update of August 13: The global version of Xiaomi Redmi Note 9 (global variant) is getting MIUI 12 bearing version number V12.0.3.0.QJOMIXM via OTA rollout. This is an incremental re-
released update with fixes for issues that the last version had. The update is running a Global Beta Stable and thus is limited to some users and not available to all. Anyway, you can still upgrade to this firmware by downloading it using this link and flash it manually on your device. Device. of August 18: After interception on the Indian version, the Indonesian
Redmi Note 9 is now intercepting Android 10-based MIUI 12 bearing the software version number V12.0.1.0.QJOIDXM weighing in at 613MB. Click here to download. Update from August 21: Cut so far, Redmi Note 9 is getting Android 10 based MIUI 12 with version 12.0.1.0.QJORUXM via airborne update for its Russian version. You can either wait for the
stable update to arrive or tap here to download the firmware and manually flash it on your device. Update of August 28: Redmi Note 9 in Turkey is intercepting MIUI 12 as we speak. The update arrives with the v12.0.1.0.QJOTRXM software version and is an airborne update. Like any air launch, this could take a few days or so to get on eligible devices in
Turkey. Either you can wait or you can use this link to download the firmware and clip it manually on your device. Update from September 3: The Indian version of Redmi Note 9 brings Android 10-based MIUI 12 bears version number V12.0.2.0.QJOINEXM available through OTA on the Indian version. The update is running through OTA and should therefore
take some interception time on your device. For those who can't wait, here's a link to download the same thing. This is a re-released version because V12.0.1.0 had a limited rollout. Xiaomi Redmi Note 9S Update of July 23: It hasn't long since the Note 9 series released on Android's 10-based MIUI 11 out-of-the-box. It's yet to get MIUI 12, which will be soon.
As of now, Redmi 9S has intercepted a new update that snatches its security patch by July 2020 with version number V11.0.4.0.QJWOUX weighing to 420MB. The update is released through OTA and thus users will have to wait until they reach their device. Another
way to do this is to simply download the new firmware and install it manually. This is an update in the air, so users will have to wait until receiving the same. Those who can't wait can get around to it by downloading the firmware. Download the security patch July 2020 – Global Variant, EU Global Variant Update from August 21: Xiaomi now releases the
following update on Redmi Note 9S with version number V11.0.11.0.QJWMIXM weighing 244MB. The update at the and note that it is still on MIUI 11 and has not been updated to MIUI 12 so far. This is a stable update at the and note that the
Note 9 Pro in India is a different version. Click here to download the firmware. Update of August 27: Redmi Note 9S (also known as Redmi Note 9 Pro) reported that it can no longer play HD content due to the missing Widevine L1 certification. Although it was thought earlier that users would have to wait until MIUI 12 arrives Note 9S, the issue was resolved
on MIUI 11 itself with a new patch with version number V10.0.11.0 running through OTA for eligible devices. The update has an August 2020 security patch on board, which is the latest. The information was confirmed by a Xiaomi moderator on Mi Community. [Source] Update of September 10: MIUI 12 on Redmi Note 9S is outstanding for sure. Apparently,
the current build on the device aka Android 10-based MIUI 11 has its problems too. It includes a crashing issue with the built-in Mi Video app. Asked by a user, a Super Moderator on Mi Community said that the issue was presented to the DN development teams will be fixed in the next update. Although not explicitly mentioned, the updating is very likely to be
MIUI 12. Another problem on Redmi Note 9S is that it didn't hit all the notifications as many of them disappear when the phone is locked. This is where a forum moderator confirmed the existence of this issue and said that they are working on fixing it on the next update. Until then, here are the steps to fix the problem. [Source 1, Source 2] Update of
September 12: Some Users of Note 9S have reported problems in which the MIUI Gallery app creates files in the root directory in the internal storage. The purpose of these files again when you launch the GALLERIE MIUI app. Although the moderator
listed a few ways to solve the problem, nothing worked. It is when a moderator of the Mi Community has confirmed that the problem is now reported and will be established in the likely future miui 12 updates. On the other hand, a solution by a user on XDA Forum could be hired until Xiaomi offers the solution. Apparently, GALERIA MIUI v2.2.16.19, which is
an upgrade over the existing MIUI Gallery app on Redmi Note 9S seems to have already solved the problem. The update has not yet found its way on the system application updater and thus can be downloaded through third-party APK sites, such as APK Mirror. [Source 1, Source 2] Update of September 14: Another day, another issue was spotted on
Redmi Note 9S, which is currently running on the firmware V11.0.11.0.QDWMIXM. Users reported the same thing on Mi Community in which their helmet stopped working all at once. Some of the users tried to reset the phone and even redownload the firmware and flash it, but to no avail. One user said that tapping on the area around the headset
temporarily blows the helmet back to work, but a fix is required as a long-lasting solution. Soon, a moderator said that the problem had been reported and that are forced to wait for sometime for the bug fix to be released. There's no ETA around it like now. [Source 1, Source 2] Update of September 21: Two days ago, the Indian Redmi Note 9 Pro was
updated to MIUI 12. This This the model is known as the Redmi Note 9S globally. Based on the latest update coming from an Mi moderator, since the Indian version will not specify any ETA around the update as of now. [Source] Update
of September 28: After much more waiting, Redmi Note 9S (global) is now getting MIUI 12 on device in Turkey. The update comes with the software version 12.0.1.0.QWWTRXM and is running through OTA for eligible devices. If you don't want to wait for the OTA update to arrive, you can tap here to download the new firmware and manually flash it on your
device, although user discretion is required. Update as of September 30: MIUI 12 update on Redmi Note 9S in Turkey is already rolling out, however, people in Russia are still waiting for the update on Russian Redmi Note 9S, one mod said that ETA on updates is not available. [Source] Update of
October 2: According to the latest news around Redmi Note 9S and MIUI 12 update, there is no ETA. However, those who are interested in getting the latest version up and running right now can unlock the bootloader and flash ROM on their devices. Check out these links for more information. [Link 1, Link 2] October 9th update: According to the latest
update, Redmi Note 9S is scheduled to get the MIUI 12 upgrade on October 20, according to Xiaomi UK Support executive. with the preexisting miui 11 based on android 10. The update comes with version number V11.0.3.0.QJZEUXM for the European version while the Russian version number V11.0.3.0.QJZRUXM. Finally, the update arrives with version number V11.0.3.0.QJZRUXM. Finally, the update arrives with version number V11.0.3.0.QJZEUXM for the European version number V11.0.3.0.QJZRUXM.
the Russian variant, the Indonesian Version Update of August 27: The Widevine L1 certification problem on Redmi Note 9 Pro has disappointed many, but Xiaomi has finally solved the problem with a MIUI 12 update. There is not much information available about the update as of now. [Source] Update of August 31: Xiaomi Redmi Note 9 Pro users have long
awaitd the MIUI 12 upgrade. People have taken to Twitter to ask when to expect the MIUI 12 update and it turns out, the update comes in September of this year. This was confirmed by the Tse, the general manager of Indonesia. Stay put as we confirm when the update arrives. [Source] Update of September 5: When asked if when to expect MIUI 12 on
Redmi Note 9 Pro, a Xiaomi moderator on Mi Community said that unlike Redmi Note 9, which has a partner in if the update can be easily ported, Redmi Note 9 Pro does not have a Chinese partner. Thus, updates are required to be built from the ground up. This causes delays. Although the moderator did not specify any ETA, the update is expected to
arrive soon. [Source] Update of September 12: Redmi Note 9 Pro is yet to get MIUI 12 update for some regions should arrive soon. This was confirmed by a Xiaomi moderator of Mi Community when asked when exactly Note 9 Pro is getting MIUI 12.
[Source] Update of September 12: When asked when to expect the availability of MIUI 12 on Redmi Note 9 Pro on Mi Community, a moderator said that the update of September 18: Redmi Note 9 Pro in India is finally getting the much-anticipated
MIUI 12 upgrade bearing version number V12.0.1.0.QJWRXM. The update is already in the air, although OTA updates are notorious because they could take several hours to days to intercept on devices. But we have the OTA package available, so you can tap here to download and flash it on your device. Update of September 24: If you are a Redmi Note 9
Pro user who is experiencing problems with the sound with the headset while dealing with calls, this is a problem that others face. Apparently, a Xiaomi moderator confirmed this problem and said that developers are already working on fixing is so a little wait is required until the fix is not made available. [Source] Update of September 25: Global Redmi Note 9
Pro was struggling to get its hands on MIUI 12 still to no avail. It was originally planned for August, but it's obvious it didn't make it through. So far, Xiaomi Indonesia has confirmed that it is working on MIUI 12 for Redmi Note 9 Pro and will be available in October 2020. Although the tweet has no date associated with it, it is quite a relief that the phone will
eventually get the update after so long. Other redmi Note 9 series devices will have to wait a little longer. [Source] Update from October 5: According to Xiaomi's Ceo in Indonesia — Alvin Tse, Redmi Note 9 Pro will begin intercepting my 12th update in mid-October. This means we're literally around a week or two away from getting the update. [Source]
Update of October 9: As per development, Redmi Nnote 9 Pro is scheduled to get MIUI 12 upgrade on October 20. This comes from Xiaomi UK support director, although this does not mean that this is totally true, as we will have to wait for confirmation on the same thing. Update of October 14: Redmi Note 9 Pro in Turkey have been waiting for MIUI 12
update for a long time now. Cut to now, the update has finally arrived Its Turkish version bears version number V12.0.1.0.QJZTRXM which you can download here. Update of October 21: Redmi Note 9 Pro is now intercepting MIUI 12 re-released version in Turkey bearing version 12.0.2.0.QJZTRXM. This yanked up the MIUI version from 11 to 12 in Turkey
on Redmi Note 9 Pro. Tap here to download the same thing. Redmi Note 9 Pro Max Update of August 27: Brother to Redmi Note 9 Pro Max receives the update. This is
when a member of the Device Team responded to a query on Redmi Note 9 Pro Max waiting for additional updates. [Source] Update of September 5: According to a Xiaomi moderator, Xiaomi had to build MIUI 12 for Redmi Note 9 Pro Max
from scratch, causing the delay. There is no confirmation as to when to expect MIUI 12 on Redmi Note 9 Pro Max, however, should be released soon. [Source] Update of September 29: According to Xiaomi Global CUmunity channel on Telegram, Xiaomi Redmi Note 9 Pro Max in India received MIUI 12, although it appears as a partial release for random
users. The update carries version number V12.0.1.0.QJXINXM on board, although there is no official announcement around the same. When asked on Mi Community, a moderator said that Note 9 Pro Max is live or not. [Source 1, 2] Poco X2 Poco X2 arrived
with Android 10-based MIUI 12 out-of-the-box. Update as of August 7: Poco has finally released the much-anticipated MIUI 12 skin to Poco X2 users with a MIUI version number of users. It has bypassed MI Pilot testing and thus arrives as a stable update for those who have intercepted or will
intercept shortly. It is released in limited quantities in India at first. Here's a link to download the firmware and flash it to your devices, it looks like the update was pulled back. This comes from Xiaomi's official handle on Telegram under which they have pulled
back the new firmware because of bugs and glitches. This could be because Poco did not do any user testing and instead released it as a stable update for users. Xiaomi will launch a new version that will all bug fixes with it for those who haven't updated yet. On the other hand, those who have already updated can wait either until the bug sets arrive or stay
on this version if the bugs bugs causes a lot of hassle. They can always go back to the previous version. Update from August 17: Today, Xiaomi has re-released MIUI 12 build on Poco X2 with version number V12.0.1.0.QGINXM weighing at 813MB. It's the same version number that was pulled back a few days ago due to some problems. The update is now
resumed and soon, it will start running through an OTA update, which should take some time to reach its Indian users if the update is rolling out. You can also tap here to download the firmware and blink it manually on your devices. Update of August 22: Today, Xiaomi officially announced that it is now running v12.0.1.0 for Poco X2 on twitter handle. [Source]
*** Update as of September 8: Earlier today, Poco India GM confirmed that MIUI 12 for Poco X2 was released to all phones in India. [Source] Poco X3 Poco X3 is the latest Snapdragon 732G SoC that has just been released. It has a giant 6.6 screen with a 120Hz resolution and a
5,160 mahA battery under the hood. The device has a 64MP IMX686 main sensor. It runs on the latest Android 10 out-of-the-box, no doubt. Pocophone F2 Pro outside China, finally gets MIUI 12 via OTA version with the number
V12.0.1.0.QJKCNXM. you can download the new firmware by pressing the download button mentioned above. Update of July 13: Xiaomi said that both Poco F2 Pro and Redmi K30 Pro from China received the upgrade earlier. Cut to now, Poco
Global's Product Marketing Manager Angus Kai Ho Ng took to Twitter and answered a question about when can expect Poco F2 Pro to get MIUI 12. He said he'd be up by the end of this month. In addition, this should also bring Android 11 Beta 1 because Poco F2 Pro is enrolled in the Beta program. Update of July 15: Reports have started pouring in which
Poco F2 Pro users in Europe are getting MIUI 12 bearing the construction number V12.0.1.0.QJKEUXM weighing to 1.1GB. This update is limited to users on the European continent and thus users with a global variant will have to wait a little longer. The update is being rolled as an OTA update, although there is a manual link to download the update
manually. Download Poco F2 Pro MIUI 12 EU Stable: Click here Update from July 24: Earlier today, Xiaomi Poco F2 Pro received the long awaited MIUI 12 its global version after waiting so long. The Chinese version aka Redmi K30 Pro has already received the update and so has the Europa and Indonesia version that left the global version to await it. The
update is available through OTA bumping software at V12.0.1.0.QJKMIXM and is is implementation of the OTA. This means that you have to wait until you receive it by notification that might take time. On the other hand, users can tap here to download the new version of the software and install it. Update of July 25: According to the implementation, Xiaomi
probably released MIUI 12 based on Android 10 on the Russian version Poco F2 Pro in an OTA rollout after the global version updated yesterday to firmware. Check out for sometime to intercept the new firmware, given that it could take somewhere between a
few days to a few weeks to reach all units in Russia. [Download] Pocophone F1 Top-end specs-fed Pocophone F1 has become the first smartphone to feature Snapdragon 845 octa-core 10nm processor in a budget range accompanied by Adreno 630 and 6/8GB RAM that allows it to process data at lightning speed. As per now, it runs on Android Pie 9.0
stored with MIUI 10.2.3 POCO UI and it is estimated to get the last major update, ie Android 10 as well. Already running on Android security patch June 2020 bearing the software number version V11.0.8.0.QRJMIXM weighing to 154MB.
The update will be releasedmanually, but for those who are eager to get security patches immediately can use this link to install manually. Update of July 22: Pocophone F1, along with Redmi Note 7 and Note 8 Pro entered the MIUI 12 Pilot Recruitment Test. Now that the last two have upgraded to MIUI 12, at least in some quality and as a limited rollout at
this time, Pocophone F1 users had to wait for some more time. Based on a Xiaomi Mi Community moderator when asked when Poco F1 will get MIUI 12 update for Poco F1 goes through a rough patch. As Poco decided not to go through
testing Mi Pilot and releasing a stable version instead, it has bugs and glitches that need to be stepped out. Originally scheduled to release in August, there is a lot of buzz around the update. However, a final report said the update should reach for testers within a week, which will delay the public launch without a doubt. Update as of August 8: After saying
that MIUI 12 update on Poco F1 or Pocophone F1 could see potential delay, Poco India has also finally confirmed that the update could be further delayed as the company is finally working on a pilot testing program for Poco F1 to tread into bugs and glitches
before running the stable update. There is no ETA available yet, but granted to learn more about it. [Source] Update of August 10: Frequent delays and delays to discourage Poco F1 is finally intercepting MIUI 12 update based on Android 10, but is available for MI Pilot beta testers only. The update carries the version
number MIUI 12.0.0.3.QEJMIXM and is a stable Global Mi Pilot update. It will reach through OTA or you can download it here and flash it to your devices, although you can load it sideways to check and return to the previous version if something bothers you. Update from August 15: After several
episodes of delays in release dates and whatnot, MIUI 12 is available for Poco F1, although it is intended for beta testers who have signed up for Xiaomi moderator took over the Global Pocophone Telegram group, where he said that
testers should not share the MIUI 12 update package with others because the updates are intended only for testers. He added that normal people shouldn't flash it manually, given that it might contain a bug or two that requires fixing once the stable version is released to the public. [Source] Update of August 29: Poco F1 users had to wait for MIUI 12 for a
long time, given that MIUI 12 build launched for it was problematic. Cut to now, there is no official program on what to expect Android 10-based MIUI 12 beta stable. Although this is not a confirmed piece of
news, it is to be considered as an imminent rollout, so that is a relief. [Source] Update of September 9: After a month in which the first version MIUI 12 on a larger scale in India. Update yanks up miul version from 11 to 12 and brings version number V12.0.1.0.QEJMIXM on
board weighing 1.9GB. The update also has an August 2020 security patch with it and should soon arrive via OTA on the device. There is some discrepancy over whether it is a stable beta or an incremental update from October 2: Poco F1
users have taken it to Twitter and other places to search for a timeline on when MIUI 12 will arrive on Poco F1. Xiaomi launched MIUI 12 both globally and on its Indian version, both of which were linked to the release on a limited number of devices and thus mass users were unable to get the update before the MIUI 12 suspension was launched during the
celebrations of China's national day. Xiaomi and Poco were the mother about the problem now. [Source] Update Update from October 3: Xiaomi launcher 2.0. Poco Launcher 3.0 has been under development for months, and Xiaomi has not yet confirmed its launch. Poco users
have taken to Twitter to discuss when Poco Launcher 3.0 arrives and china's smartphone maker has yet to reveal anything about it. Some Poco skin is riddled with problems. [Source 1, 2, 3, 4, 5] Update from October 9: After the latest global version MIUI 12 beta stable
failed to be bug-free and was withdrawn, Xiaomi relaunched the MIUI 12 update with version number V12.0.2.0.QEJMIXM. It remains to be seen whether V12.0.2.0.QEJMIXM that will initially arrive through an airborne update. This is a
limited update because it seems to be released for those who upgraded to MIUI 12 V12.0.1.0 who had problems. There is no update on when it will arrive for those on MIUI 12 update and so did its Pro version. Even though Poco M2
```

s eligible for MIUI 12, it arrives a few days with MIUI 11 out-of-the-box. Perhaps the wait for Poco Moro Update from July 15: For all Poco M2 Pro users, Xiaomi has released a new patch for its users eceived several security patches over a few weeks.
