Important: For fast-stock pastors to function correctly, the computer must be connected to the Internet and online. If you have disconnected any hardware, please reconnect your computer back to the modem and make sure you can get online. Tips for PPPoE and USB connections: If you have DSL and connect via PPPoE, make sure you disable or disable any PPPoE software such as WinPoet, Broadjump, or Enternet 300 from your computer or you won't be able to connect to the Internet. You can only use the Ethernet port on your modem. If you used USB to connect earlier, then you must turn off your modem, disconnect the USB cable and connect the Ethernet cable to the Internet port on the device, and then restart the modem. In some cases, you may need to contact your ISP to change the connection type (USB to Ethernet). DIR-615 Manual Setup - Mac and Linux users Important: for best results, insert the installation CD and follow the instructions on the screen. If your Router cannot use a CD or use Mac or Linux, please use the following installation steps: 1 2 LAN 3 4 INTERNET RESET 5V - - - 3A Step 1 - Remove and unplug your wired or DSL wide-line computer modem. Modem Step 2 - Put your device close to your modem and computer. Put the penghala in the open area INTERNET 1 2 LAN 3 4 INTERNET RESET 5V - - - 3A working area for better wireless coverage. Wireless N 300 Router Step 3 - Unplug the Ethernet cable from your modem (or existing encoding if upgrading) connected to your computer. Attach it to the blue port labeled 1 behind your idol. Penghala connected to your computer. Step 4 - Plug one of the included blue Ethernet cable ends that come with your idolatry into the yellow port labeled INTERNET behind the back Pluralize the end of this cable into the Ethernet port on your modem. Step 5 - Reconnect the power adapter to your cable bandwidth or DSL modem and wait for two minutes. Router Step 6 - Connect the supplied power adapter into power 1 2 LAN 3 4 INTERNET RESET 5V - - - Port 3A behind the router and then plug it into a power outlet or surge protector. Press the power button and verify that the power LED is erupting. Step 7 - Open a web browser and enter or . When the login window appears, set the internet user name 1 2 LAN 3 4 to the Administrator and leave the password box blank. Click Login to continue setup and follow the Setup Wizard. Please refer to the user manual for more detailed installation information and advanced features.
