To make your equipment a long-lasting investment, we suggest it carefully this manual and make sure you keep it in hand for later consultations. In this manual we indicate the steps necessary for recipients and extend your devices to be available. INSTRUCTIONS FOR INSTALLATION 1. - Defend the scale and check the requirements of the product. If it is immediately damaged by your authorized distributor. 2.- Set the scale where there is no movement or hum, make sure it is adequate level checked that four base levels will support the scale on the surface it has placed and if it has bubble to level (under the plate) centered, adjusted, tightened or demolished the level bases until the bubble is in the center of the circle. 3.- Connect power supply to AC/DC (if you use it) to 220 V A.C. outlets. 8.- Do not use solvents or 4.- Turn the scale on after sequence of your countdown to clean only use a wet scale will display zero and will be ready to use. IMPORTANT NOTE: If your scale shows ASSIST after following the steps prior to and after the initial countdown, it means that it has been handled roughly and/or got hit during the shipment, wich causes irreversible damage to its operation. Call your authorized distributor. Is possible that the scale shows HELP when you turn it on and weight on the plate, then remove the weight and turn the scale off and then turn it on HOW TO ENTER THE product price per pound or kilogram is entered to press the numbers of the keyboard to indicate the desired value. This value will be displayed in the PRI indicator and the total amount paid will be calculated automatically shown in the TOTAL indicator. For example, if the product price for each workbook in the previous examples is \$8.20, just press the following display will appear: . HOW TO CLEAR PRICE WRONG WHEN an error price is entered, you can clear it in two ways: a) Manually: Simply press the key key and enter the correct price. b) Automatically: The price is automatically authorized to remove the product from the plate, except if it does not enable the fixed price function. FIXED COST FUNCTION WHEN IT IS NECESSARY to constantly press the same product type, one does not change its price, you can use the FIXED COST function. It is used to maintain the FIXED cost of the PRI indicator avoiding it to be automatically cleared when the weight is removed from the scale. To fix a price, follow these steps: 1.- Put the product on the plate. 2.- Enter the product price per pound or kilogram. P-PACK 3.- Press . After these steps, a small arrow will light up in the upper right corner of the TOTAL indicator, showing the P-PACK label (fixed price). As a Supposing that the product is wrong, the weight is 4 pounds, and the price is \$2.70 per pound after entering the fixed price, the watch designer will look like this: To clear the fixed price function, just press THE USAGE OF THE TARE When you want to weight a product in a container, but you don't want to consider the weight containers during the operation , you can use the TARE function. To use this function follow this step: that you will get the -3-0 with the key.
