Version 1.27.2.3 main features country-specific features country-specific police car AI trailer lift type differential lock adaptive transmission mode (power, general, echo) improved engine simulation model (friction, braking, consumption) Allison gearbox and minor change Volvo can move more than 4 gears. Improved atmospheric pressure simulation (pressure accumulation, blocking well, application pressure). The sound of the coin has been adjusted. The FOV range has been increased from 40-120 degrees in the desert. The engine brakes are set to three positions (as are most current trucks). The one-key hold control still uses full strength. If the engine brake toggle input is not assigned, increase or decrease the engine brake input to a task similar to a liter (from 0 to maximum range). Several fuel points at the gas station. G_force_economy_reset flags are disabled after an economic reset. Transmission input shaft simulation (double clutch). MODDING INFO Single Override (Force Default) rules can be used in stead of a pair of rules that are appropriate for the default on the associated accessory. All pressure units are set consistently in bars (data, animation, dashboard UI). The nominal air_tank_pressure value added to the chassis data. Changed internal animation: All air, oil and brake pressures (gauges, indicators). New internal animations: trailer axle lift (indicator), differential lock (button, indicator). New engine data: resistance_torque (2000 rpm). Coin sounds were made possible to be modified in the same way as other sounds (via ogg files).
