If you are a regular user of social networks like Facebook or Instagram, you may not be new to vines. They are so attractive that you can keep your eyes on them and watch for hours. Have you ever thought about starting to create your own projects? If you've ever had this thought, but don't know where to start, or are afraid that it will require a COMPUTER to do, we recommend a video editing app on Android phones: ActionDirector Video Editor. It's just a small app, but it has everything you need: from video recording, editing, adding effects to adding background music. It's convenient, isn't it? ActionDirector Video Editor has proven its position in the market when the number of downloads has reached seven digits and is rated at 4.5/5 stars. This app comes from a developer who Cyberlink.com name when you own a series of media apps. The software supports editing of multiple video and audio formats with Ultra HD 4K output. INTERFACE ActionDirector Video Editor has a fairly simple and friendly interface. The ActionDirector Video Editor home page provides users with four main options: Capture, Edit, Tutorials, Produced Videos. In addition, the software also has two slides from Showcase and Tutorials. A presentation is a place where users can view videos that are viewed by that app. Meanwhile, Tutorials will guide players to use the features of the app. The primary tone of the application color is black, which helps users reduce eye strain after a long period of focus. FEATURE AND USE You don't need to use another third-party video capture application because ActionDirector Video Editor has a built-in video creation tool in Capture. After such a video is finished, users can edit the video without having to go through the video scan process. Edit videos Or if the user already has videos, Edit is a feature that allows you to enter videos and edit. What a user needs to do is click Edit, browse to the folder that contains the video, and then tap the plus sign (+) to the right of the video you want to edit. You can add two or more videos to create a new video. Once you've added the videos you need, click Select to go through the editing stage. What makes ActionDirector Video Editor different from other video editing applications is that it has a large number of editing tools, from simple to advanced. If other apps only allow users to edit duration, add basic filters, or add background music that's quite outdated, this app provides users with powerful tools like creating effects, adjusting speed and add customization music. Create videos After successfully adding a video video editing interface Like other applications, Trim is a tool that allows you to trim the duration of the video. Start and end times can be the default time, or if you don't like the Crop tool, you can change it as your liking. The second tool is a tool that helps actiondirector video editor make the biggest difference from other video editors: Action. Therefore, the application name contains the word Action. The Action tool provides three main tools: Speed, Repeat, and Undo. Speed is a place that allows users to change the frame rate of each clip. 1x is the normal video speed. If you want to add the Slo-mo effect to a clip, select a speed level smaller than 0.75x, 0.5x or 0.25x, etc. If you want to fast-forward the video, increase the level to 1.25x, 1.5x, etc. The maximum level that can be improved is 8x. Action movie effects A small note is when you add more than one video, each small video will require a separate edit. Yes, pay attention if you want to apply the effect to the entire video. As the name suggests, Repeat is a tool that helps you quickly repeat clips by selecting the number of repetitions without having to add each clip one by one or using the usual copy and paste operations. Besides, in the repeat section, users can quickly flip the video by selecting With The Reverse. On the back is the tool used to play the video. Together, Speed, Repeat and Reverse will be three great followers to help users create the most important moments of the video. Sharing and saving 4K videos When you're done creating video cores, the only thing you need to do now is retouch the video. Color provides filters with built-in formulas. If you want to create your own filters, change the Contrast, Saturation, and Brightness indexes! The audio tool allows users to customize video sounds, along with effects such as Fade in, Fade out. In addition, you can add sounds available on your phone as you wish. To add captions or titles, use the Title tool. With different colors, opacity, and fonts, your videos won't be different from professional computer videos. When exporting videos, you can select three modes, namely SD, HD and Ultra-HD. Different characteristics will be different sizes. Yes, you should choose for yourself a quality that fits your goal. Through the above information, do you want to download this professional video editing tool to your device right away? Every time we record videos using our device on a smartphone, we prefer to edit them before sending them to anyone. For professional video editing desktop or laptop is usually preferred, but those who do not own either a computer or a laptop, what about them? Well, without a powerful machine you can not professionally edit. Devices may not be the best video editing platform, but that doesn't mean you can't edit videos on your smartphone if someone wants to do just a little retouching by adding filters, adding text in the video, combining different videos. To this end, various android apps have been developed in the Play Store. But if you want to go to advanced editing, such as desktops. Then Viva Video Pro is an application that you should go to. Viva Video Pro is a very addictive and interactive application. It is very easy for the user to get used to this application. With Viva Video Pro, you can not only edit videos, but also photo editing is supported by this app. Viva Video Pro is a somewhat advanced application to use, but at the same time it is simple to use and understand. Users have responded with very positive feedback for this app. But the main catch of this app is that it is a paid app. So what are we doing now? Well, don't worry guys we have you if you want to make this paid app for free Continue reading. Specifications Viva Video Pro App Name VivaVideo Pro Publisher QuVideo Inc. Genre Tools Size 45MB Latest Version 6.0.4 MOD Info VIP/Premium Update October 15, 2020 VivaVideo Pro APK Features : Although there is a free version of Viva Video, as we always know, the paid version is much better than the free version. So here we list some features of Viva Video Pro that other applications may not have. Solid video editor On the market, other video editing applications also provide this feature. But with video editing, Viva Video Pro becomes hassle-free. Users can edit up to one video frame. Any changes you make to your video and changes to your video won't affect the quality of your video. There are many filters in apps that users can use to add retouching to their videos. One of the unique styles of this application is its storyboard editor; you can see the changes you've made to your video in ascending order. Users can merge videos, crop their shooting, add text, or different frames while editing. As we talk about frame rate, you can save edited videos at 60 fps, it is very smooth. This app also has a huge collection of different graphic effects. As we talk about VFX, they are delivered in advance to users too. If you want to add subtitles to your videos, you can also do with Viva Video Pro. When you use this app you will see various transitions that help you create more professional and high quality videos. In addition, some noise sounds are provided for users so that they can use them as background video music. At the same time, with this application, you can edit the images. Customizable lens With a solid video editor, you can edit videos. But do if you want to make videos and images using the smart lens that came with the app To make your videos more beautiful. Viva Video Pro offers a huge library of different lenses that will undoubtedly help you look more original and beautiful videos at the same time. You can choose from a variety of lenses such as basic mode, Selfie mode to click stunning selfies, FX mode to add a little fx to your photos or videos. By clicking on the photos, you can also make a collage right away by clicking the collage option. Using the filters provided by Viva Video Pro, you can get a soft, soothing finish in your videos or images. If you're a selfie lover, Viva Video Pro has taken care of you. This app has seven different special lenses designed for selfies. So even if the front camera is decent, you can click the selfie like a professional camera. For video recording, there are nine different lenses from which you can record videos with different feel every time. This feature is best for those who regularly upload videos on social media. Create slideshows You don't need to download any other slideshows design app. If you have images to create slideshows, you can add them in this app. Viva Video Pro provides the function of creating slideshows. Not only can you add photos, but you can also give special effects to some images whose presence you want to educate. This is a great way to post photos at once on social media. I just created a slideshow with various special effects and posted it on online media platforms. Online community support As this app updates regularly, with each new update, some new features are added. Some of the new features are a bit difficult to understand. For this reason, there is a large viva video pro community to help you. In addition, you can see tutorials on improving video editing from amateur to pro level. VivaVideo Pro Mod APK - Features: VIP Unlocked: VIP feature in VivaVideo Pro apk, you have to pay money to access vip features in VivaVideo Pro APK, but with our supplied mod/hack apk you can access this feature for free without paying a single amount of money.
