Human anatomy and physiology 11th edition hardcover

For the two-semester A&P course. The skills of the 21st century to succeed in A&P and beyond Human Anatomy & Physiology by the best-selling authors Elaine Marieb and Katja Hoehn motivate and support students of all levels, from beginners to experts, equipping them with 21st-century artists. Each carefully paced chapter guides students in advancing from mastering A&P terminology to applying knowledge in clinical scenarios, to practicing the critical thinking and problem-solving skills required for entry into nursing, allied health, and exercise science programs. From the very first edition, Human Anatomy & Physiology has been recognized for its engaging, conversational writing style, easy-to-follow characters and its unique clinical insights. The 11th edition continues the authors' tradition of innovation, building on what makes this the text used by more schools than any other A&P title and addressing the most effective ways students learn. Unique chapter-opening roadmaps help students keep an eye out for big picture concepts to organize information; memorable, well-known analogies describe and explain structures and processes clearly and simply; an expanded number of overview tables and focus figures help students focus on important details and processes; and a greater variety and range of self-assessment questions help them actively learn and apply critical thinking skills. To help students prepare for future healthcare careers, Career Connection Videos and Homeostatic Imbalance discussions have been updated, and the conclusion of Chapter Clinical Case Studies has been extensively reworked to include new NCLEX-Style issues. Mastering A&P includes new Interactive Physiology 2.0 tutorials, new Focus Figure Mini-Animations, and new customizable Practice Anatomy Lab (PAL 3.1) Flashcards that complement Human Anatomy & Physiology and provide a consistent learning experience for today's students. Also available with Mastering A&P Mastering™ is the teaching and learning platform that allows you to reach all students. By combining trusted author content with digital tools designed to engage students and imitate the hourly experience, Mastering adapts learning and improves results for each student. Mastering A&P tasks support interactive features in the text, including new Interactive Physiology 2.0 tutorials, new, customizable Practice Anatomy Lab (PAL) Flashcards, new Focus Figure Mini-Animation Coaching Activities, new Building Vocabulary Coaching Activities, Dynamic Study Modules, Learning Catalytics™. 3D animations, lab study tools, Get ready for A&P, plus a variety of Art Labeling Questions, Clinical problem solving activities, and more.
