Sao fatal bullet weapon guide

Edit shared comments There are different kinds of weapons of fatal bullets. Weapons are divided into those categories. Hand Guns (HG) Shotguns (SG) Weapon Sub Machine (SMG) Assault Riffs (AR) & ; Artillery Headlight (LMG) Shooter Launch weapon Gatling Gun Swords; much like accessories; there are different reports, above the hate, the highest amount the Memory Chips a weapon can have. Weapons also have Ranks which effect the base stats of the rank weapon range from Rank 1 to Rank 1 Rank 11. Each weapon can have it increased maximum twice, in a process called Improvement. A+ appears on the end of the gun's name to show how many times it has increased. Double Arm: After a certain point of the main story, you will get the Dual Gun skills, allowing you to bring a copy of your main weapon to your hand. The copy will have the same statistics and memory chips as your primary. Dual wild only working with HGs, SGs, SMGs, ARS, LMGs, and Launches. When using Dual Arms, generally double the statistics (i.e. STR/DEX) in the original weapon properly allows you to double the wildness. If you don't own the required stats of double wild a gun, a popup window will show your current stats, and stats are required in double arena. Sword and Gun Double Wield: After a certain point in the story, you can choose to help Kiritto and he will in turn teach you how to double the wild a sword with mengin. Once you have this capability you will choose the sword you want to use and select the 'alternative equipment' button. This will auto allocate a hand to use as your double gun double You can't select weapon in hand.
