Covet fashion hack 2019

Brittany is a mobile gambling addict! Her favorite items are simulation, casual, RPG, tycoon, fashion, adventure, puzzles, and city-builders. Check out cheats, tips and tricks, and a detailed presentation on The Fashion Covet in this Ultimate Game Guide.What is coveted fashion? Covet Fashion is a free fashion/style game for Android and iOS. The game allows you to dress an avatar (you can change avatar elements such as hair, makeup, and skin tone at any time), and dress her in clothes by real fashion designers. You win apparel in the game to dress your avatar with, and the game is great fun for anyone who likes fashion, dress-up games, or simulation games. Download Covet Fashion for Android or iOS. So how can you do well at Covet Fashion? This ultimate guide covers everything you need to know about the game: how to get started, join challenges, create looks, win prizes (including how to win Top Look), enter Jet Set Challenges, add friends, create a Facebook account for Covet fashion, and how to make money, save cash and earn diamonds. This article was updated in September 2019 to include new information! I will update this page accordingly with any new additions to Covet Fashion! Use the following table of contents to find the category you are interested in: Table of ContentsContented entry challenges dressing your model winning jet set awards challenges adding friends making money modern models All the images in this article were taken from my game and made by me. Starting Thing to download and install the game on your mobile phone or tablet, you can get started! You can choose to either link the game to your Facebook account (a little more on it later) or play without linking it. Do I need to sign in with my Facebook account? I would definitely recommend linking the game to your Facebook so you can add friends, which will come in handy during challenges later. You can go ahead if you want to learn about the Covet Fashion game with your Facebook account. Sidebar Navigation's get into the game, you will see a sidebar with various options. Inbox: Get the daily installment of 100 diamonds and 20 tickets, and each event rewards you win. Home: Find the results of previous challenges here. Style Challenges: The main page where you enter challenges for money and prizes. Vote to Show: Vote to show in challenges to win tickets. Shop: Go shopping at the mall game for more clothing options for your model. Shop Online: A real online mall featuring some of the real life clothes and designers used in the game. Fashion Feed: Fashion news in and out of the game. Fashion House: Join a group of other Covet players, compete for prizes, chat, and seek advice on your appearance. Game recording: It may not be available on all devices. record your game and post it on social networking sites. Get Cash & Diamonds: Buy premium currency, or searches and offers for free diamonds (more on this below) Premium Store: Buy premium currency here. Account: Change your username, Facebook account information, etc. Currency There is also a line along the top with currency options. There are three forms of currency to use in Covet Fashion: money, tickets and diamonds. Money is used to buy clothes in the game so you can enter challenges. Tickets are used to actually enter these challenges (most challenges cost between 15-25 tickets to enter). And diamonds are premium currency that you can use to buy expensive clothing, or even convert them for tickets or cash. Choosing a Challenge Click on style challenges link to the sidebar to enter your first challenge. The Style Challenges menu will open, and you can browse through the various challenges and find one you want to import. Each challenge is an issue and will give you a brief description of what your model is doing and what you should be wearing. There are also requirements for each challenge. You always have to pay a certain amount of tickets to enter, but you may also be required to wear certain garments in order to satisfy the particular issue. Challenges last for a limited time. Most challenges will give you two to three days to enter, some special challenges may have less time, while the Daily Challenge always stays for 24 hours. After the timer expires, you cannot enter an expired challenge. Buying Apparel So players (especially, new players!) to buy ONLY the garments required for each challenge. When you first start the game, you are only given \$5,000 and you should use your money sparingly. I would also recommend (at first, at least) only entering challenges that will give you a decent reward, you need to win. Most challenges will automatically give you a monetary reward when you sign in (usually between \$100-\$200 and the daily challenge always rewards \$500). Try not to spend more than you'll get back to at the beginning. If you end up spending more, make sure the rewards for winning are things you really want. If the reward, for example, is a dress that you may never see yourself using, it may not be worth it to even enter. Keep in mind that clothes can be reused an infinite number of times, but you can't sell them back after buying them, so buy items you can buy clothes on the Shop tab. Tip If you really want to go shopping, I recommend going to the beginning of the new season. Buy yourself some classic pieces: a pair of black heels/pumps, a pair of jeans, a nice blouse, a nice cocktail dress, and a set of jewelry (earrings, necklace, bracelet). These signature pieces will help you get started during a new season. Wardrobe Value Every garment that belongs to you in the game adds to your total wardrobe value. This score is very important in the game; as you increase you increase value, you can unlock more options for hair and makeup. You can increase your closet value by buying new clothes or winning new items by entering challenges. You will see an increase in your closet value with each new item added to your closet and every time you reach an important milestone, the game will congratulate you on your new closet value and give you a summary of the new hair and makeup options you have unlocked. After choosing a challenge to enter, it's time to dress up your avatar. Take a look at the requirements to see what items you should wear. You can look through your closet (or use the sidebar to sort your closet) to see if you have the required clothes. If not, you can buy them directly from the challenge menu. In addition to the requirements, you need to add things to make a full look: shoes, shirts, and jewelry, or other accessories are recommended. Try your best to make your outfit match the challenge at hand, read the description and try to follow it. If the model is supposed to be outdoors for a hike, don't dress her in a ball gown (though you'll see a lot of players doing that on the voting menu!). Looking for tips to get dressed? Check out my Covet fashion look guide with tips on how to get Top Look and Best Look! By selecting Skin Tone As listed above, every time you enter a challenge, you can choose a new skin tone, hairstyle, and makeup for use in your model. Skin tones range from light to darkness, and are all unlocked regardless of closet value. Your model will automatically wear the same skin tone you used last time, but you're free to change it from challenge to challenge or use the same skin tone in all your challenges. I always choose to use a dark leather model. I like to reflect the real skin tone of my life. Some players change skin tones depending on the challenge (for example, many players changed their models to an olive or tan skin tone when the challenge was Samurai Warrior). Choosing hair and makeup Pa hair and makeup options are limited to the value of your wardrobe. Each time you level it up, you will unlock three to five new makeup and hair options. Once you unlock a hair style or makeup, you can always go back and choose the old ones you've unlocked in the past. The makeup menu has many different makeup options to choose from; from a more naked/natural look, to glitzy/glam looks. Some of the makeup styles look different in each skin tone, so you can play around with your model's skin tone and make-up to find a perfect look. Hair has more options once you choose it, the majority of hairstyles have many different colors to choose from, so you can have the Chignon hairstyle, for example, with lavender hair if you want. It's always a good idea to try and get hair/makeup that goes with the challenge. If the challenge concerns an entrepreneur, for example, you may not want to hairstyle or nightly makeup look. If the challenge is a rocker chic, it could be a good time to choose one of the boldest hair/makeup options. There is no limit to hair or makeup, so you can use and reuse the same options as many times as you want! Hair Accessories A hairstyles in the game have additional hair accessories that can be applied to them. Accessories range from everything to crowns and wedding veils, with bows and head wrappers. Not every hairstyle has an accessory option, and not every accessory can be applied to every hairstyle; accessories apply only to specific hairstyles, which you can learn by clicking on the hairstyle and see which accessories apply to it. Accessories can be a great way to really dress up for challenges. You can add a beautiful veil to a wedding dress challenge to polish up your look, or give your model a crown to make her look perfect for the princess challenge! The only drawback for hair accessories is that they are usually only be purchased for real money. Depending on your location, hair accessories range from about \$6-\$14 dollars/here, in Australia, it's \$13.99!). You need to buy an additional credit to unlock a hair accessory (which can then be applied to any hairstyles it goes with, as long as you have the hairstyles unlocked). Currently there is no way to use the game currency to buy a hair accessory. Sometimes, however, hair accessories are given as prizes for special challenges, style sprees, or for winning a fashion house rally (more on all of them below). There are also, occasionally, sales for hair accessories credits (for example, there was recently a Thanksgiving sale where you could buy a credit for only \$1.99 AUD), so keep an eye out for ways to get free or cheaper hair accessories! Props Props are newly added accessories that you can use to further customize your look! You can access props during challenges after completing level 5 in the game by clicking on the small stick icon in the upper right corner of the sauce menu. Your model can have a total of three props per look: one prop in her hand (e.g. a mobile phone, a bouquet of flowers, etc.), one behind her (such as fairy or angel wings), and one in front of her (such as a cute puppy or cat). Most challenges allow you to add props, but I would only recommend adding them if it really fits the If you dress up a model who is at a fancy event, it will make no sense to add a dog or a flying eagle behind her. But if she's dressed for a wedding, why not use the floral bouquet brace? The majority of props are free to use and some rotate monthly. There are also special prop packages, which you can win by completing limited-time challenges. If you are not involved in the challenges, you can then purchase the backup package, if desired. You can choose from a variety of props to your model! Borrowing Clothes Although you haven't linked your account to Facebook, you can even borrow clothes from friends. If you have joined a Fashion House, you can also borrow from members. You are only allowed to borrow one item per challenge and can only be borrowed from every Facebook friend every three days, and from the Fashion House (in its entirety) every 20 hours. Keep in mind that you can only borrow the same item once from each person. For example, if you borrow the Zimmerman Weave Buckle Belt from your friend Sally once, you can't borrow the same item from her again. You can, however, borrow other items from Sally, or borrow the Zimmerman Weave Buckle Belt from another friend in the game. You can borrow items from your in-game friends and use them to enter challenges. Bonus Clothes There are clothing bonuses for each appearance you put together-one for the upper items and one for seasonal items. You can get up to 0.30 stars for the current season figures of +.50 stars for unworn items. Try to maximize these bonuses by wearing any applicable unloaded items and staying in season with your clothes. You can tell at what time each garment is in by looking at the description under the garment thumbnail. With bonuses you can almost get a full star more after the votes have been counted, so do your best to get your full bonus with each challenge! You can get up to 0.50 stars for the current season figures of +.30 stars for unworn items. Boost Unworn Wing you enter challenges, you sometimes have the option to Boost Unworn. This option applies only if you have unworn items in your closet that will be equal to or more than the value you need to maximize out your unworn allowance. For example, if you need \$756 dollars worth of clothes to max out your unworn but haven't dressed your doll accordingly, the toy will suggest items in your wardrobe that you haven't worn that are worth \$756 dollars or more, that you can use to enhance your look to the maximum. Choosing Boost Unworn allows you to choose a garment to max out without actually dressing your doll in it. Try to use garments you don't think you'll really use in a challenge (perfect for the ugly dress you won, but don't plan to wear, EVER). You can choose from one of your ady clothes to enhance your entry to the maximum! Prizes Every time you enter a challenge, you can take a look at the prizes available to win. Prizes vary from challenge to challenge, usually you earn a cash reward when you sign in (between \$100-\$500). If you win four stars, you will win a garment (sometimes related to the challenge itself; if the challenge requires you to wear clothes from a particular designer, you will earn one of their items as a reward). At 4.5 stars, you'll win 25 diamonds. In 5 stars you will win a secondary element - usually something that is more expensive. I've seen expensive handbags, jewelry or dresses in this section. Is it, to increase the value of your closets. Finally, if you win 5.8 stars (achieved only by winning top look), you will win the grand prize of 5000 diamonds! Styling Spree The Styling Spree is a contest that runs every week and allows you to win a premium wardrobe item. You can win Styling Spree simply by getting into the normal challenges. Styling Spree eligible challenges are noted in the description, and there are generally 28 of them per week. Once you've signed up for all 28 challenges, you'll be rewarded with the Styling Spree award (check your inbox to see it!). Prizes are usually dresses, expensive jewelry, or handbags, and the value is usually \$4k or higher, so entering all the Spree styling challenges is a great way to increase your wardrobe value and add premium items to your wardrobe. You can also enter the Spree Styling Challenges after the end of the week, as long as the challenge is still available on the sign-in page. Try to enter all the challenges and win these exclusive prizes! Results The results of each challenge come after a few days of voting. Your results will be sent to your inbox. The results tab shows the voting score given to you by the other Covet Fashion players (including your bonus points) and any rewards you earn. Clothing and accessories will go straight to your closet, and add to your closet value. All winning diamonds will be added to your diamond count. You can also see all your previous results and looks by going to your profile and clicking Past Looks. They will all be archived there for you or anyone else looking at your profile to look back. Best Look in Level/Best Look In Level is a kind of consolation prize for when your look results really well, but not quite the perfect score of 5.0 required to win Top Look. This reward is given to the highest score participation in the challenge, and is generally rewarded in an appearance that scores 5.70 or higher (but below 5.80). Winning Best Look in Level rewards you with all the regular prizes for winning 5.0 stars and above, but you also earn an extra 500 diamonds and your look appears on the Covet home page/runway. Best Look in Level is really a nice way to be rewarded when you're close to a Top Look, but not enough. As always, you need to max out your unworn and in season to have the best chance of reaching Best Look, and the rest is up to the voters! How to Win Top Looks Winning Top Show! I think it's safe to say that having a Top Look is every Covet player's dream! Not only do you win the two clothing awards, but you also win 5000 diamonds (actually, 5025, including the 4.5 star bonus), and your appearance appears on the runway homepage of the Covet website. Winning Top Look certainly seems hard to do at lower levels; chances are, you won't win it until you level it up significantly. Personally, I got my first top look at level 19. A lot of it has to do with. With the best hair and makeup that is available only at higher levels. Players tend to vote for certain hairstyles above some of those lower levels, so once you have access to your favorite hairstyles, you have a better chance of winning. To win Top Look you definitely need to max out/so you need to keep everything in season (even 1 point off can mess up your chance), and you need to max out your unworn items. After that, it's really down to luck! There are tons of inspiration groups on Facebook where you can search the trending garment for each challenge, and try and style your doll in a look that "could" win, but you never really know. Most of my top looks were a complete surprise! Just try to think about what the challenge requires, choose the hair and makeup that suits the situation (and sometimes it's good to try and emulate what the model wears in the cover photo), and MAX out. From there, it's up to the voters. Don't take it hard unless you win Top Look or the best prize, though. The game is just a game, after all, and it's all in good fun! Keep trying and keep it together; it really looks like, it doesn't just seem like you think you'll win. Eventually, you score a Top Look, and probably when you don't expect it! Jet set challenges work a little differently from regular time challenges. You can access them by going to the Style Challenges menu and clicking Jet Set in the top menu bar. Jet Set challenges are open forever and have no time limit for them. You can enter and re-enter them whenever you want, as many times as you want, although they require 15 tickets to enter each challenge. Entering the Jet Set Challenges Each Jet Set challenge will have a theme based on location and style. The idea is that you and your model jet around the world to different locations and get dressed depends on where you are the subject of this particular photo shoot. Each New Jet Set destination comes with three entries, and each entry has a requirement. The requirements are usually a little easy to pass, so almost anyone can enter, regardless of wardrobe value or level. Unlocking Jet Set Challenges Things themselves work just like time challenges; Dress up your model as usual, and may receive bonuses for unlaiden clothes or seasonal items. However, you do not win a prize at the end of the vote (the results of the vote return in 8 hours for them). Instead, you earn a score of 5 stars. If you receive the amount of stars required to open the next Jet Set destination, the game will unlock the new destination for you and will also give you a reward of 500 diamonds. As you climb higher up the jet set challenges, you'll probably need to repeat the old challenges to get higher ratings and more stars. But Jet Set Challenges is a great way to get free diamonds. Tip When it comes to the end of the season and you have a bunch of adies left left This is a great opportunity to repeat some of your Jet Set challenges and max them out as much as you can! You can get a full star more sometimes just by maxing out for unworn/in season clothes, and it's a great way to make sure that your unworn garments for the season don't go to waste! Facebook Covet Fashion's coveted link allows Facebook integration with the game, so you can add your real-life Facebook friends and borrow items for their wardrobes. Having a lot of friends is great in the game, so you'll always have access to more clothes to borrow. It's really great, especially when you enter a challenge that requires a particular item that you don't own and don't want to buy (or can't afford). You can just look through your friend's closets and borrow from them instead. If you have friends in real life you are already playing the game-great! Sign in with your Facebook account by clicking the Account and then clicking on the Facebook link. The game will automatically scan your Facebook friends and add friends who are currently playing the game. Then you will be able to borrow clothes from your friends and vice versa. You can also share a link on your Facebook page for your friends to download and play Covet Fashion with you. You have three referral links that you can give out, and if someone clicks on your link and is a new player to Covet Fashion, you will be rewarded \$1,000 for referring a new player. Invite your friends! In addition to being able to borrow from your friend's closets, they can also borrow from them! Each time they do, you will receive 2 tickets to use for entry challenges. You can collect these tickets by going to your Inbox and reviewing the Friend Activity tab. Creating a Facebook account for Covet Fashion If you are a serious Covet player, I really recommend creating a Facebook account just for fashion covet. It's really easy to do and thousands of other players are doing exactly the same thing. Set up an email address from any provider you want (I use Gmail), and then make a new Facebook account. I think it's best to put Covet somewhere in your name (for example, I'm Brittany Effect on Facebook) so other players will recognize who you are as a player of the game. You can also change your profile picture to your avatar or game model. Once you've made your covet profile, there are a few to find other Covet players to add. You can post on the Covet Fashion Facebook page and ask people to add you. You can also join one of the many Covet Fashion Add Me groups, where people are always looking for new friends. You can start adding other players, and Facebook will automatically suggest players around me. I found that adding friends snowballs very quickly, though. I started a new account and added 100 people. . . after a few days, this amount tripled, at present, I have close to 1,000 and the majority of them found me. Found. Don't worry about not having enough friends-you'll probably have too many at some point! You're not going to make it through all their closets anyway. Joining a Fashion Houses Fashion are groups of other players that consist of the game. You can join a Fashion House from the main sidebar menu and then search for a home of your choice. There are a few benefits to joining a Fashion House: Chat Room: You can chat with other members of your Fashion House whenever you want. This is the only way to have a conversation in the game. Ask for advice: Being in a Fashion House enables you to post any of your looks before entering a rally, and you can seek advice from fellow members of your home. More closets to borrow from: You will have access to any of the members in your FH closets, however, you can only borrow from the FH in its entirety once every 10-24 hours. Runway rallies: This is really the #1 reason to join a Fashion House-entering Runway Rally. Rallies can be thrown by your FH leader and made by you and your FH members entering the timed challenges. If you and your colleagues get a fairly high cumulative score, you'll get a piece of a puzzle board. If you unlock all the pieces, you'll win prizes like premium apparel, cash or even diamonds. If you're someone who likes to enter a lot of challenges, anyway, joining an active FH that also does so is great! Basically, you have the opportunity to double the prizes with no extra effort on your part. You can find Fashion Houses either by searching for the game itself, through word of mouth (if you have other friends playing), you can ask them which house they are in), via Facebook (join one of the many Covet Fashion Facebook groups and you'll see tons of FH recommendations), or you can even make your own Fashion House! One of the hardest things about Covet Fashion is to make and save money. You need money to buy clothes, you need clothes to enter challenges, but each garment is quite expensive and sometimes you need to buy three to four garments in order to enter a challenge. Then you get a small entry reward of \$200, and you can't even win the prize in the end. Unfortunately, this often happens, so you could end up spending \$600 on a challenge, you only get \$200 back, and you could be out of \$400. When you just start the game with 5K, that money will go very fast. So how can you budget and save in a game like Covet Fashion? Save money from everyday challenges! Measure you make the daily challenge every. Single. Day. The entry fee is \$500, and the Daily Challenge doesn't require you to have a particular garment-you just need to create an appearance. Obviously, you'll want to create the best look you can possibly get a good score and earn a reward, but you don't have to stay in season for the Daily Challenge, and you don't have to buy anything new. I never buy a garment for the Challenge, that way I'll get \$500 cash a day without spending anything. After a week, that's \$3500 (and maybe a few reward garments if you put together a good look! don't spend more on the challenge than you get. Back On regular time challenges, try your best not to spend more money on the garments for the challenge than you'll get back on entry. . . try not to spend more than buying clothes, so that you get a real profit back. If you need to buy specific clothes, try to borrow the most expensive you need, and then buy the cheapest for you. Earn, buy or store your diamonds Having diamonds are almost a necessity in the game. Because no matter how much your budget or how well you save, eventually, you'll run out of cash and need more (especially when a new season starts and you need a new wardrobe). The only way to get more cash is to convert it from diamonds. I don't personally spend a lot of money buying diamonds from the Premium Store. Some players have disposable income and are able to spend the money to buy large packages of diamonds, and if you are willing to spend \$100+, you can as well. However, I do not recommend doing this. First of all, from time to time, Covet runs discounts on diamonds. You can get up to 80% off to 1575 diamond pack at least once a month, and this is the only time I'll buy diamonds (for example, it's usually \$7.99 AUD to buy this package, with the discount, it's only \$1.49, that's less than the price of a cup of coffee). In addition to buying diamonds, you can win diamonds by completing free promotions through Covet Fashion. There's a Win tab in the Premium Store that will give you options to win diamonds. The main way to win diamonds is by completing free offers (such as downloading an app and running it, or downloading a survey). They usually pay anywhere from 20-15000 diamonds. Before you start making offers though, keep in mind that Covet Fashion (and Tapjoy, the company that runs these promotions) often make 2x Diamond promotions when for an entire weekend, each offer is worth twice the amount of diamonds! Since you can't cash out and you can't trade diamonds, you need to be smart about how you spend them. There are also double diamond weekends, several surveys, etc. This is an easy and effective way to win thousands of diamonds. Just keep your eyes open for a double diamond weekend! Where are my rewards? Sometimes Tapjoy doesn't reward you for all your offers and you may end up losing diamonds. The standard protocol is to email them with a screenshot of the completed survey or app you downloaded. Modern Models Update In January 2017, Covet Fashion underwent an important update, and the biggest feature included modern models. Before the all models at Covet Fashion were the same height and body shape. Although you could change skin tones, there were only six preset skin colors and all the dolls had the same exact face (which you could just layer different makeup on). The new modern update introduced 50 new female skin tones, facial features, heights, and body shapes! The modern update was originally rolled out to all players and was the only way to play the game, however, you can now choose to play either the modern or classic version of the game on Covet's setup page. Here's a look at some of the models in the modern update! Different challenges will present you with different models in Modern.What is the difference between modern and classic game? Obviously, the main differences between modern and classic are that in Modern, there are more body types and ethnicities available to play with. The other main difference is that in Modern, you are actually given a model to dress-you can't change skin tones or body types when entering challenges. Some covet players hate this restriction, but personally, I find it a fun challenge. While all different body shapes wear the

same clothes, the garments look different depending on the height and weight of the model, which is realistic and a nice addition to the game. It's also great to see that Covet chooses models that accurately match the challenge (for example, if the challenge is Japanese Princess, it should really be presented with a model that looks Japanese-born, rather than being able to choose a skin tone that isn't exactly appropriate). With Modern, you can also choose only from certain makeup styles- each skin tone has makeup specifically for them. This limitation is not my favorite, but it allows more realistic and varied models. Last but not least, if you play Modern, you can only finish against other modern players once the challenges go to the vote. So if you dress up as a curvy medium-skin model for the challenge, you'll only compete with other players who have the same model. Obviously, this prevents the fight against unfair voting or discrimination. Modern is a great update for the game. I have to be brutally honest: as someone who has been part of the Covet community for over three years, it was very obvious for a long time that Covet players tended to idolatry and vote for a model of beauty; usually, blonde hair, blue-eyed models won Top Look in every even the ones where this look doesn't fit. Now, you can see all kinds of body types, skin tones, heights, and shapes gain top looks, and it's a wonderful change! Modern Challenges Although modern challenges are locked in relation to body type/skin color, you can play with whatever skin tones and shape models you like by going to the Create Look section of the game. Have fun Styling! This is for The Ultimate Ultimate Fashion guide! If you have any questions, comments, or other tips and tips, feel free to leave me a comment below! I'll add to this guide every time I discover new tips or information about the game, so check back regularly if you're a fan. Good luck, and have fun styling! This content is accurate and true to the best of the author's knowledge and is not intended to substitute for official and personalized advice from a qualified professional. End the question: How do you earn more money at Covet Fashion if you have hardly any? Answer: Enter the daily every day and do not spend money on it. You get \$500 per day (\$3500 a week) just by doing that. Follow all the tips above as well, to earn more money and get the diamonds. Question: How can you switch to the modern model body type at Covet Fashion? Answer: You can go back by going to the profile (the small face icon at the bottom of the menu) and then clicking on the settings (the gear icon) and switching your models to modern. Question: How do I get hair accessories at Covet Fashion? Answer: You can buy a hair accessory credit in the app and then choose any hair accessory you want. Question: I've been playing Covet since 2013 and I'm only at level 26. How are some of these Covet players at level 67, unless they buy in-app purchases? I've done that, too, and I still feel like I'm never going to get there. Answer: The only way to level it up is to increase your wardrobe value, which is done by buying more clothes in the game, and clothes are purchased only through Covet cash or premium currency-diamonds. These people at level 67 could be spending real money to buy diamonds so they can turn it into coveted cash to buy clothes. They could also earn TL (5k diamonds at a time) and invest in clothes, or they could be part of a really good Fashion House that wins their rallies. They could even get free diamonds from TapJoy. Either way, they are somehow getting clothes (either through buying diamonds, winning clothes, or getting free diamonds) to increase their resume and level up. Question: What do you do fascinates me at Covet Fashion? Answer: Symbols are new! I'll add a new section to do with them- right now I don't know what I'll actually be used for or how it will work, but I'll update the article once more information is out. Question: When I go to the premium store in Covet Fashion and click the tab there are no free diamond offers, is this normal? Answer: It may not be available. Unfortunately, free diamond deals vary from region to region. Keep looking as it does renewal occasionally with new offers! Question: Is there any way to search for specific garments in Covet Fashion? Answer: Unfortunately not! Hopefully, the game will include better search filters in the future. Search/filter options have become much better over the years, years. If I get into a Covet Fashion challenge that later becomes part of the rally, does my look count on it later? Answer: Definitely does. I usually get a big chunk of challenges at a time when I have time because I'm busy a lot during the week. Everyone counts for your rally later, no matter how early you get into the look. Question: How can you change back to the classic model at Covet Fashion? Answer: You can go back by going to the profile (the small face icon at the bottom of the menu) and then clicking on the settings (the gear icon) and switching your models to classic. Question: What dates do the seasons change at Covet Fashion? Answer: It seems to vary from year to year, but you are given notice a few weeks before it happens. Also, start at the store to see if you see clothes added for next season, and this is a good indication that a new era is coming around. Question: In fashion, what is a double challenge? Answer: A double challenge means that you can use clothes from two seasons- i.e. in winter and spring, or in summer and autumn. These challenges only come when one season is near the end and another is about to begin. Question: At Covet Fashion, I've seen accessories like guitars, dogs and baby strollers. Where do these come from? Answer: Covet was testing a new feature with charms - guitars, dogs, baby strollers, etc. It lasted about a week. The favors haven't returned to the game yet! Question: I'm new to Covet. I bought a few things for my wardrobe to get started and after a day they either want to reset the items or just disappear completely. I'm not connected to Facebook. I'm connected to Gmail. Do I have to keep buying the items for use in the Covet app? I thought I'd stay permanently in my closet to reuse! Athin: Welcome to the game! Once you buy an item it stays in your closet forever, however, it will only have the unworn bonus once. You can wear the clothes forever. I've had clothes in my closet since 2013! Reset simply allows you to wear it as if it's new again (and then you can point to your unworn bonus when entering challenges). Question: Do you have any cheats on how to earn more coins at Covet Fashion? Answer: You can get more cash by completing free promotions and winning diamonds. Watch videos, take inquiries and make tapjoy offers. Once you reach 500 diamonds, you can convert them into cash. Question: I'm on level two in the Covet game and running low on diamonds. What research can I do to win diamonds? Answer: Complete jetsset challenges! Every location you unlock rewards you with 500 diamonds. You can also get 100 diamonds every day when you log into the game. Also, don't use diamonds unless you really need to, this is the number one mistake that most newbies make. Question: When I'm ready to take a survey it always says I don't meet the requirements investigation. What research are you doing? Answer: Depends on each person, their area, any previous inquiries they have received, etc. You can get blacklisted by completing investigations if you rush through them or enter false information, so be careful of it too! Question: I'm in the Golf Jet Set challenge. Do you know how many levels there are beyond that? Answer: For now, this is actually the latest Jet Set challenge. Covet developers currently have no plans to release more, but you can always repeat your previous challenges to get a higher score. Question: Can you send gifts (clothes, cash, etc.) to friends or other members of the fashion house playing Covet? Answer: Not exactly, but there are a few things you can give people. You can buy a Fashion House Gift in store for \$4.49 AUD and give your fashion house a 10% discount at the toy clothing store for 6 hours. You can also give away two \$1,000 gifts to friends in the game if you're new to Covet. Question: How do I get to higher levels in the Fashion Covet game? Answer: Continue to enter challenges and win prizes, keep buying clothes, and you will increase your wardrobe value and level up. Question: How do we know that there is a sale in diamonds or accessories at Covet Fashion? Are we notified or should we check the Covet Fashion game daily? Answer: The game alerts you occasionally, but you just need to keep an eye out. There are usually promotions/double diamond weekends during American holiday weekends (Labor Day, President's Day, Thanksgiving, etc.) Question: Is there any code cheat to earn money to play Next? Answer: There are no cheat work codes for the game. Any cheats or hacks could seriously mess up your game data, and/or ban you from playing! Question: I read that you can now change the look of your fashion model covet after you've entered a challenge, as long as the vote on that challenge hasn't started. Where can I take advantage of this? Answer: Yes, if you scroll down the feed and look at the challenges you've introduced, you can click on them and change your appearance before going to the vote. Question: Please explain reset to unworn for me. Why do I pay again at Covet Fashion if I use the items again? Answer: Restoring an unworn item gives you points as if it were a recently purchased item. You can use it if you have a specific component required for a challenge you bought the hat specifically required for this challenge a few days ago, and already wore it), and you need to increase your unworn bonus. Having fully maxed out unworn-in-season points is the only way to get a top score. It's a strategic part of winning the game, but you don't have to reset your undead objects if you don't want to. Question: How does Top Looks know what to wear and where do they find clothes? All eyes are the same! There must be something secret! Answer: There are many clone groups on Facebook Facebook people copy the same look to try and get high scores. I personally don't participate in them as it feels like cheating and it's not as much fun as creating your own look, in my opinion! Question: How do you get a guitar in Covet? Answer: The guitar was a charm- it was a new gameplay technique covet developers were testing on some challenges. It seems that the tests for this are over at the moment, but it may be back in the future! Question: I know that a look that has been introduced to a challenge can be edited. In Covet Fashion, is there a limit to the number of looks I can edit in one day? Answer: There is no limit to the number of impressions you can edit or even how many times you can edit a look before going to the vote. Question: I've seen models wear feathers or other special accessories. Where can I find wings at Covet Fashion? Answer: These are props! You can learn more about them in Dress up. Question: How did you get excessive ice spikes and warrior crowns and stuff for Covet Fashion? I can only find flowers and hats! Answer: Many of them are hair accessories! They can only be bought for real money, earned in a fashion house, or occasionally through participation in challenges in the game. Question: I feel like I'm never moving up the ladder, even when I'm buying stuff. How do I proceed to Ultimate Covet Fashion? Answer: It can be difficult to flatten sometimes. I recommend joining a good fashion house that participates in wild rallies (at least). You'll start winning challenges and a lot of prizes and you'll get faster levels. Usually I can level up every one and a half weeks when I'm rallying. Question: Can you switch off while at a rally and how will this affect your rally results at Covet Fashion? Answer: If you switch before a rally starts, you can't win prizes and your scores aren't counted on anything. Toggling off mid-rally allows you to collect prizes (if your home wins), but you can also potentially drag down their score if you don't score well. I think it's a bit of a glitch in the game, honestly, as toggling away shouldn't allow your score to count or to win prizes, in my opinion. Question: How do you tuck into a shirt when you play the mobile game Dress Up Fashion? Answer: Click the tuck button at the bottom of your model while styling. Some things can't be stuffed, like sweaters. Question: I'm struggling to recruit new members to my fashion house. I loads of arrivals in FB, but still no recruitment. Any ideas? Answer: It can be difficult to create an FH from scratch. I'd probably just recommend joining an existing one, and maybe once you've made more friends in the game, you can go away and create your own. JErthy: How do I set a phrase under my name in Covet Fashion? Answer: The phrase you see is actually the name of their fashion house. If you join a fashion house, his name will be his name, appears with your username. Question: What if your house has won all the prizes on the runway rally board for the month? If you play again, will you win some of the prizes again? Or is it better to wait for the next boat? (It's two days until the new month) Answer: My FH will generally take a break from rallies for the last days of the month if we clear the board as you'll only win the sad \$100 cash prize if you win anything else. Question: Can you sell the clothes and accessories you bought at Covet Fashion when you need money? Answer: Unfortunately no, there is currently no way to sell back any of your clothes or items. Question: How do I maintain my progress in Covet Fashion when I change my device? Answer: Link the game to your Facebook account. You can then connect to multiple devices or switch to a new one. Question: What are tickets to Covet Fashion? Answer: Tickets are how you get into each challenge. This is explained in the article under the Currency header. Question: How do I get to another level at Covet Fashion? Answer: You can only level up buy your wardrobe value increase, which is done by having more clothes. Enter challenges, or join a rally to win clothes as prizes, or just buy new clothes. Question: I accidentally switched off right before a new rally was about to begin. Will I still get the awards for the rally at Covet Fashion? Answer: If you switch before the rally started, unfortunately it's too late. Just make sure you switch back before the next one starts in three days! Question: I do not understand the purpose of my style rating in the fashion covet mobile game. Can you explain how it is used? Answer: It's really not used for anything but ranking on the Leaderboard (the little trophy icon at the bottom of your screen). If you have a high style score, you'll appear in the Top Style Score section. Question: Why should I unlock worn and pay again for what I already have at Covet Fashion? Answer: No need to unlock worn out: I personally will never use it unless you need a particular garment and want to max out your unworn bonus. Question: How do I get back into a Jet Set in the fashion covet game? Answer: Go to the Jet Set tab and click the one you want to re-enter. Then create a new look. Question: When you play Covet, because you won't allow us to sell old stuff, I mean it could be a great way to earn some cash when you're out is that it? Answer: I agree and wish to implement this, but I don't think they will. Forcing you to either reset unworn or buy new clothes means forcing the player to get more Covet cash, which in turn ensures that players will either play the game more or hope to spend real money to buy diamonds and convert it into cash. The company wouldn't want to limit ways to make players play more or spend more money. © 2017 Brittany BrownCommentsBrittany Brown (author) from Sydney, Sydney, on May 19, 2019:Hello! This is a difficult situation, I think you need to link it to Facebook in order to share again. Unfortunately, I don't think there's a way around it, but maybe covet support will get back to you with another answer. Good luck!quarkum on May 19, 2019:Hi Brittany! Great article, thanks :) I'm just starting out, but I'm already hooked on Covet, so the advice is really helpful. I'm having a problem though: I can't borrow items anymore. I went the route of creating a covet profile on Facebook and logged on to the game, but then I decided to delete that profile (it was shown as a suggested friend for my friends and I felt a little weird about it). So I deleted the profile from Facebook and assumed Covet would go back only allowing me to borrow items from members of my Fashion House. But no, now that I'm trying to borrow something, it tells me to reconnect facebook and there's no option to say 'disconnect'. So I can't go any further, and I can't borrow from my fashion house anymore. Any ideas? I sent a message of support and didn't hear anything. Thanks and have fun out there! Jubles on July 6, 2018: When I first started the game I thought yes this is great fun what more could a girl want great fashion to design clothes, but unfortunately after a while it became clear to me quickly running out of cash and diamonds so pretty much stopped playing it wasn't fun anymore. If it was an easier way to earn both cash and diamonds I would definitely play a lot more. Kristen Humphrey on June 27, 2018:Need dimonds n cash for covet fashionBrittany Brown (author) from Sydney, Australia on April 01, 2018:Hi Kimigiri! I'm sorry I took so long to answer! You don't have to download the TapJoy app- you can still access the in-game offers by clicking on your diamonds at the top of the page, then going to win and then clicking on Claim your free diamonds! Link. It will show all of TapJoy's offerings there. Kimigiri on March 17, 2018:Hey Brittany! Thank you very much for this post. It's so useful especially for coveted newbies like me. I made a new fb account for the game and only as you said hehe. Now I'm trying to do the tapjoy thing but I can't seem to find it anywhere (playstore/online) do I feel like it's closed or something? Isn't that right? Also, do you have other ways just like tapjoy now that he's gone? Thanks! Thanks!
