The Raven Queen is the neutral god of the Dawn War pantheon, which emerged in the exponing environment of Dungeons & Dragons 4th Edition, known as Nentir Vale. While some believe that the authors of 4e killed D&D's long-standing fixtures so that they could replace it with Mary Sue, it is likely that she was influenced and/or grounded by the Morrigan, the Celtic goddess of death, war, tug-of-war and domination, also known to monickers such as the Ghost Queen and the Raven Queen. Alternatively, mary sue explains 4e writers we thought we needed a bad god who was not death. How do we do this?. mixed with Neil Gaiman's desire to emulate Death from His Sandman (not important for mary sue analysis for purely commercial or legal artistic reasons -- functional description of a Sue around her role in the story). Raven Queen turns 5, but with a completely different background. Rise to Power[edit] A powerful wizard-queen in life was taken as queen of the female god of death Nerull, who would one day be the Raven Queen (not to be confused with Greyhawk Nerull; they are different gods of the same name). Chief-necromancer, Nerull was trying to use the power he could gain from the souls of the dead to rise to the position of king of the gods. He trained his queen, who he named Nera, to use the power from the souls of the dead. This, of course, proved to be a tactical mistake and destroyed Nera Nerull in an uprising. Even though his body was dead, he managed to exist because of his power over the spirits and seized the coat of the god of the dead who was killed. Other gods saw it as an opportunity and presented the new goddess with a choice: they either became goddess of death instead of dead (that is: guide only the dead instead of their rulers), and those who would be considered a full-fledged god, or they would be destroyed. He reluctantly agreed and was the thodonto of the Raven Queen. Leaving his predecessor's Pluton realm, he went to Shadowfell to unlock the powers of the soul without being disturbed by the mingle gods. Some of the other gods claiming a variant story, namely Nerull's enemies Corellon, Sehanine, Pelor, and Moradin, who actually cunningly help Nera from afar, mostly adding divine charm to help her She falls in love with him as part of a move to take down Nerull. Alan[edit] The Raven Queen is the goddess of death, destiny and winter. Starting with death first, he gathered the other two areas in various battles against other gods. He took Corellon's side in his battle against Lolth, winning the belief in fate. As soon as he won in the battle against the winter god Khala, then the raven god was thrown down by the raven queen to take her coat and her power was taken away. If another divine tussle had started, the Raven Queen would surely have been there to collect the left overs. It is in Shadowfell, the castle of the Raven Queen, who renounced Nerull's former Plutokicity floating empty and silent in the Astral Sea; a large castle cut from black ice and covered with fresh snow. Here in Letherna, the Raven Queen perch directs the souls of the dead to their final resting place. The domination of the goddess of death is dangerous: in the middle of a frozen forest, the Raven is found in the middle of the Queen's house, along with the proximity of her place and shadowfell's deadlines in general. The city itself is far from safe: its streets are followed by other spirits of incorporeal undead who are rejected, do not cross, or yearn for the warmth of the living. Servants[edit] serve a few Raven Queens, but for those who are all more dangerous. Among the settlements of the world, the servants of the lady of death take on the task of careing for the dead themselves. This terrible place in society, combined with the mistresses they hate, makes these people unpopular among humane races. Shadowfell,however, Shadar-Kai, a meritocratic and ruthless people serving the Raven Queen, is just likely to engage in a different humane race of drow, and a little less for its own sake, since they use less covert assassination to reach the prestige position. On the bright side [edit] While widely unpopular (who likes to die?), raven queen followers are at least toned down, partly because of their strong opposition to Undead - if undead has a problem, you can usually call them and wait to pay at least a little less if you went with other Undead Extermination Services. Non-4e Presence[edit] 5 edition, which shows in a UA article as a possible Warlock Boss. He then returns in Mordenkainen's Tome of Foes, which greatly reviews his history. In this new 5e lore, she was an elf wizard-queen led by her faction of elves who chose to follow lolth or Corellon in the civil war dring and sleep. He tried to rise to god to keep Lolth and Corellon from fighting, but the ingrine was sabotaged by some of the sorcerers who helped him, and he. A ghost with a hunger to collect information and memories. The wizards who ruined everything for him turned into monsters called naggas. The Raven Queen now lives with her Shadar-kai servants and spirits and memories in The Shadowfell Castle of Memories. If your campaign is in the world of Exandria, forget all this. Explorer'S Guide to Wildemount resets the Raven Queen to 4E lore. At first, the party thought she was Vesh (because of Kashaw's role in the service), but she appeared during Vax'ildan because she beed the raven queen. Vax offered her life instead of her sister. The Raven Queen reached out her hand to Vax and nodded, accepting the offer. At this point, Vax unwittingly became his new champion. Raven Queen Fan art by MargaretChurchA. Apparently seeing this positively, the Raven Queen physically appeared, allowing vax to be resuscitated[6] and called Vox Machina her meeting behind the Divine Door. This he appeared before her and seemed to accept these terms. Soon after, Vax became a paladin dedicated to his purpose[13]. Most recently, in exchange for his ongoing life as a revenant, his hate-hating Vecna negotiated with him to defeat him. [14]. The orders of the Matron of the Ravens[edit | source] The orders of Ravens'Death's Matron are the natural end of life. There is no pity for those who fall. The way of fate is sacred. Those who fall must be punished. Dying from death is an atrocity. Those who deflect the passage of the soul must be brought down.
