## Fallout 4 prima guide download

Want more? Advanced embedding of details, examples and help! Welcome to fallout 4's free walk. Use this guide to complete all major quests, side quests and find each collectible including Bobbleheads, Logs and Holotapes. You will also discover additional features guaranteed to keep you alive a little longer during your adventure through the wasteland. Bethesda released Fallout 4 for PS4, Xbox One and PC on November 10, 2015. The game takes place about 200 years after the events in Fallout 3. The players leave Vault 111 and explore post-apocalyptic New England, called the Commonwealth. Over time, they will gather resources, build settlements and produce a wide variety of items needed for survival. They will also use Pip-Boy, an electronic device displaying current missions, inventory, maps and video games. There's also the free Fallout Pip-Boy app, which allows players to view their statistics, radio, map and play Holotape games on their smartphones and tablets. Finally, The Fallout 4 Pip-Boy Edition comes with a working copy of the gaming device. Campaign Walkthrough Main Quests Fallout 4 - War Never Changes Select Male or Female Character and then Avoid Nuclear Destruction by entering Vault 111. Fallout 4 - Commonwealth Pearl Explore the former baseball stadium and agree to find Nicky Valentine. Survival Wasteland Fallout 4: How to build and maintain settlements keep survivors happy, plant crops and put defenses on. Tips for playing Fallout 4 During war never changes the mission (beginning of Fallout 4), we suggest aligning both intelligence and strength to level 3 at least. Doing this gives you access to a walnut pistol and armored personnel carrier perks, allowing you to change weapons and armor. You should also adjust the perception to level 4, so you buy a locksmith perk. Check out Pip-Boy. This handy gadget will save your virtual life more than once. Use it to view your inventory, burn supplies, restore your health and view the map, among other things. All the more reason to download the free Fallout 4 Pip-Boy app for iOS, Android and Windows. For the first time, you get the opportunity for a base building in Sanctuary Hills. Pay attention to the following: weapons, workshop, workbench and workbench armor. Each of them gives you the opportunity to craft or transfer. You can share resources with different desktops in the same area. Otherwise, you will need to physically transport items to the right place. For example, elements of the sanctuary are not automatically transferred to Red Rocket Workshop because these places exist in different areas. In some cases, you can access the workshop by going into it. Other times you will need to kill threats in the area, earn the right to use the workshop or comrades and accept it. The latter may sound like can revoke your Workshop privileges for any reason, forcing you to make potentially deadly choices. Reduce walking time by travelling quickly to different locations around the wasteland. To do this, edd to your Pip-Boy, and then select a map. There are some general rules, though. You have to discover the area to travel quickly to it. Plus, it's a better idea to travel fast while outside, and finally you won't be able to do that if you exceed the maximum weight; aka, you have too many things. Save early and often. You can save anywhere, and Fallout 4 allows you to create multiple save files, which is great in case your adventure takes an unwanted turn. Take advantage of V.A.T.S., otherwise known as the Vault-Tec Assisted targeting system. Activate it by pressing L1 or left bumper depending on the platform. This slows down the action and highlights the enemy's weaknesses. Some of your decisions have long-standing consequences that can affect your situation with different groups of people. Pay serious attention to the decision taken. PC requirements Minimum OS: Windows 7 / 8 / 10 (64-bit OS required) Processor: Intel Core i5-2300 2.8 GHz / AMD Phenom II X4 945 945 3.0 GHz or memory equivalent: 8 GB RAM Graphics: NVIDIA GTX 550 Ti 2GB/AMD Radeon HD 7870 2GB or hard disk equivalent: 30 GB free Locations Recommended: Windows 7/8/10 (requires 64-bit OS) Processor: Intel Core i7 4790 3.6 GHz/AMD FX-9590 4.7GHz or memory equivalent Memory: 8 GB RAM Graphics: NVIDIA GTX 780 3GB / AMD Radeon R9 290X 4GB or equivalent hard drive: 30 GB of free space Go above ground with confidence!
