TH Top Country Page Locked In order to expand 21st CENTURY, YISD gives students, teachers and employees access to a filtered Wi-Fi network in accordance with federal guidelines of the Children's Internet Protection Act (CIPA). Students and staff may voluntarily bring their personal equipment to school so that they can be used for educational purposes. That's not a requirement. It is important that these devices are used correctly. With this in mind, these BYOD guidelines regulate the use of personally-owned devices in our schools. The aim of THEOD is to provide students with access to the tools needed to learn the skills needed for college and career readiness, and to enrich and engage learning. Student-centred learning opportunities are amplified by 21. BYOD allows students to voluntarily bring their personal device to school so that they can be used under the supervision and management of a teacher. It's not about devices, it's about creating constructive changes in learning and teaching practices. It gives students not only to be consumers of information, but to be content creators and curators. For the purposes of the term DeviceBYOD, a device is a privately owned wireless and/or portable electronic hand-held device that includes smartphones, laptops, tablets, e-readers and other school-based devices. These devices should use the area's visitor network. Digital citizenship and online safety yISD students and employees use technology and applications in a safe, legal and responsible way. We embrace the following facets of digital citizenship. Respect & Protect: Yourself: Select the online names that are suitable; Carefully consider the information, images and content that you post online. Do not share personal data, contact details or activities. Others: Don't use technology/social media to bully, tease or disparage others. Report abuse/bullying and do not provide/share inappropriate material or information. Intellectual Property: Correctly quote any and any use of books, sites, content, media, etc. Please allow others to use the work, respect their response. (Copyright for children) Personal device liability for students and students may be used as a personal device to the extent authorized by a class teacher for instruction in accordance with the YISD Acceptable Use Policy (AUP), the Code of Conduct and student and staff manuals (see policyFNCE, CQ, student and employee manuals). Students can also use their personal device in supervised common areas, such as libraries and cafeterias. Students and staff are responsible for technical issues related to their personal device. Students and staff are fully responsible for their device. YISD is not responsible for the safety of any personal devices. Educational devices cannot be used during evaluations unless directed by a teacher or administrator. Students must turn off and turn off a personal device when directed by a teacher or administrator. Keep the device in quiet mode unless it is directed by a teacher or administrator. Printing of a student from a personal device is not allowed in school. You should use cloud-based services to create, share, and collaborate (Google Apps, Office365, etc.). Students are expected to use the YISD network when using the property of the region (no personal internet service providers/service). Students must ensure that their personal device does not interfere with the learning of others, does not endanger the health or safety of others, invade the rights of others in school, or engage in illegal or prohibited behaviour. Students do not use a personal device for photos or videos school day or school territory, unless authorised by the teacher/administrative authority (for mentoring purposes). Unauthorized access to data or information is inconsistent with AUP and results in disciplinary action as described in policy, AUP, student manual and code of conduct. YISD has the right to collect and investigate any device and content that is or was the source of an attack or virus. Misuse of personal devices may result in the revocation of BYOD rights and internet access, as well as appropriate disciplinary activities as described in the policy, code of conduct and the student/employee manual. District Obligations YISD provides access to a guest WiFi network filtered by the Internet. YISD can give students/employees access to web-based email services, cloud apps/storage (OneDrive, Google Apps for Education), and other third-party apps so they can be used at school or at home. These accounts help develop academics and 4Cs. YISD is not responsible for damaged or stolen equipment. YISD does not support, repair or replace personally owned devices. YISD only supports 802.11 AC wireless networks. DisclaimerPange note that the Internet provides access to networks and information around the world. Even using a filtered network, as described in federal CIPA guidelines, it is possible that users may be exposed to inappropriate or inappropriate material. Although the district is taking reasonable steps to prevent access to such material, it cannot be prevented in its entire way. YISD does not provide any warranties, express or implied, for this access. YISD is not liable for: damage caused, including, but not limited to, loss of data resulting from a delay or interruption of the service or loss of files. information received through regional networks, resources or personal data schemes resulting in criminal or terrorist activities. to support, troubleshoot, or install apps on your personal device. or is responsible for the safety, loss or damage to your personal device. any data and application costs or other charges that may arise during school-related use. Use.
