How to Play: A Flash-based arcade action game, infinite running, gravity reversal for laptops, laptops and desktop/Mac PC (with certain browsers). There are three different game modes to choose from: Single Player, Endless Mode and Multiplayer Mode. Your task in all modes is to survive as long as possible by constantly flipping gravity so that your runner does not fall through any ravine, or be 'caught' on the left side of the game screen. In single player modes (1-Player and Endless), you can flip gravity by pressing any key on your computer's keyboard or by left-clicking the mouse or touchpad. Most people find that the spacebar or one of the arrow keys are the easiest and most comfortable option. In multiplayer mode, a specific Gravity Altering key is assigned to each player, which is indicated at the beginning of each race. Multiplayer tournaments have 6 rounds, with each round winner being the longest surviving player. If this Flash-based game no longer works on IE11 or Chrome browser on your PC/MAC, try playing Firefox browser with Adobe Flash Player installed.
