Have up to 37 mammoth machines and trailers. - Review by Mick This installment of 18 Steel Wheels (18 WOS) series puts you back behind the large half-truck wheel of 18 wheels. 18 Steel Wheel: American Long Haul allows you to get a sense of what life is behind the wheel really like. Following the rules of the road is a must as you will be fined a lot for any expression you do. From hitting your trailer to dropping it without details left behind. Difficulty Free Adjustment Play is the only way to experience this edition of 18 WOS. You can adjust the difficulty settings from easy to hard. The difference between the difficulty levels is how much money you start and how accurate you need

when putting the trailer to get off. It's easy you start with \$50,000 and the trailer doesn't have to align properly. Simple gives you \$20,000 to get started and the trailer needs to be put right. Finally, the hard mode gives you \$20,000 cash and a \$100,000 debt to pay off, and the trailer needs to be put down exactly that. Apart from the initial features and parking trailers there is not much change with the difficulty rating. Parking trailers can be difficult at first but with practice being quite simple. After paying off the initial debt, the hard mode doesn't seem to be harder than simple mode. Select Your Load to Haul To get you started you choosing a load, attach a trailer and think about how to get to your destination. There are different types of loads to choose from such as construction equipment, food, gas, and more. Many will have a specific location and the amount you will make for shipping. Make sure you choose a lot of profitable because, if you spend more gas than you get to deliver you have washed your time. Upgradable Truck After You have Some money you can upgrade your truck. You can buy things like new engines, transmissions and brakes. Upgrades can make your truck faster and allow you to make your shipments faster that makes them worth the money. Excellent graphics Graphics, as in all 18 WOS games, are incredible. Cities are modeled to reflect how it is as well as local vegetables. Trucks are modeled well inside and outside. Its interior includes a rear-view mirror as well as CB radio to communicate with other truck drivers. All highways are all named correctly and include signs to tell you how to get to the city you need. The weather plays a factor in driving conditions. When it comes to snow, you need to slow down to avoid slipping. His details add to the deep impact of the game. Annoying Traffic Law and Long Drive Times There are some weaknesses in the game. Traffic laws are sometimes impossible to follow. Stopping at the red light in a moving truck with two trailers is not a quick thing, so sometimes you'll run a red light. This infraction will cost you. Also the huge amount of time it takes for the trip can be excessive. Travelling from one side of the country to another can involve several hours of driving. Without saving and returning to him later this can be very boring. Conclusion - Recommended for Fans of Truck 18 WOS: American Long Haul provides and experiences awesome truck driving. Seeing varying landscapes from Mexico all the way to Canada gives you a lot to explore. Multiple loads and locations means you don't have to estimate the same into the same place twice. With all the features in this game, you'll have endless hours of entertainment. Throw in your truck hat and hit the road.
