Download your cheat tables here (No Requests) Shinkansen RCE Fanatics Posts: 295 Connected: Fr Mar 03, 2017 2:54 am Reputation: 710 Post by Shinkansen » Fri Apr 19, 2019 22:32 pm Simple table for Forager, may or may not work. GameMaker so table has a high chance of not working/detecting the wrong code/crash. Usage info: Scripts with To Activate: XXX can only be activated after action XXX (put an X in the box). Scripts with To Update: XXX update their effect only after action XXX. Addresses with XXX? (0 = No, 1 = Yes) activates the script effect XXX when 1 is set in the value. Important information. 1. Values may not be updated until something changes. 2. Health may also affect animals. V1004 - 2019-04-25 1. Tested game version V1.0.2. Can work on other versions. 2. Playerstatistics. Added pointers for health, energy, coin. Health and energy pointers only seem to work for the first loaded savegame and may no longer work when cards are changed etc. V1003 - 2019-04-22 1st player statistics. Replaced by some pointers because the previous method depends on the location of the game installation. Hopefully this would be more reliable V1002 - 2019-04-21 1. Tested game version V1.0.1. Can work on other versions. V1001- 2019-04-20 1. Bestandsstatistiken. Quantity on massive. V1000 - 2019-04-20 1. Tested game version V1.0.0. Can work on other versions. 2. Playerstatistics. Slot 0 to Slot 10 allows you to change a specific value. ID value selects the value to change. Quantity Set to Quantity Value? sets the stat quantity to quantity value. For example, the default is - Integrity. - Max Health. - Energy. - EXP. - Skill points. - Coin. 3. Stock statistics. Works. Use instead Slot 0 to Slot 10 allows you to change a specific inventory. ID value selects the inventory to change. Quantity set to quantity value? sets the inventory quantity to quantity set to quantity to quantity to quantity value. As an example, the default setting is - wood. - Stone. - Coal - Iron ore. - Gold ore. - Bricks. - Iron bars. - Gold bars. - Fiber. - Flower. - Steel. How to use this cheat Install Cheat Engine Double-click on the . CT file to open it. Click the PC icon in Cheat Engine to select the game process. Keep the list. Select the trainer options by selecting check boxes or setting values from 0 to 1 Shinkansen Forager V1004. CT 2019-04-25 (63.54 KiB) Downloaded 9145 times Shinkansen Forager V1003. Posts: 1 Connected: Mon May 08, 2017 12:56 pm Reputation: 0 Post from Truth X ile » Do Jun 27, 2019 19:14 pm for those of you want infinite number of items from each item everything, what you need is a VAULT the value type is DOUBLE this can be done in any VAULT in each slot, place an item in one of the slots preferably with 5-10 of this item, look for the value then take 2 away from the VAULT and it should only have a value if you have done it fast enough, if not just take 1 or 2 away at your discretion once you find the value, simply remove all this item and replace it with another item, the VAULT value for this slot is always the same for each item, so you can actually enter an item with only an amount of 1 as a stack and change the values without having to manually change each one individually through multiple scans, there is one thing to note, go to the Skills menu or in a building of any kind will reset the code, just remember the above steps and it is easy to manipulate the elements in the VAULT (example: add element of 10 eggs in the VAULT, eggs are remember in the 3rd slot, they can be in any, scan 9, multiple values, takes out another 8, only one value remains, drag/drag address down, take all eggs, adds 1 electronics, the value in the CE address changes to 1, changes this number to 1000, VAULT now shows 1000 electronics) (Note: Remember that I said it was in 3. Slot of the VAULT, If you find this value, it only changes it for the 3rd slot, so say if you want to make all the slots of the VAULT, you can find all their values and change all of them at the same time, which makes it easier to change multiple items, but you can do them one by one or all at one time) I was able to find the values but not change the inventory, but the VAULT works pretty much the same way : 46 Connected: So Jul 21, 2019 22:55 pm Reputation: 6 Post by KraftCrafterMcCrafty » Fri Aug 30, 2019 22:38 pm While the ability to scan items still works, you cannot use the table in the new beta update due to the change in the way items are displayed. Can you please update the table scripts? You're welcome?
