September 22, 2020 Version 2.74.0 - Pokemon TCG: Champion's Path Extension is available in the game starting September 25.- Bug fixes And full patch notes are available . This game has a great progression system with standard starter decks given to you at the beginning of the game. You gradually get harder than AI's the more you play, and it really shines for veteran players. I feel like if you're new to the TCG scene I wouldn't recommend this app unless you have a friend who is really good at Pokemon or just trading card games in general. The only reason I don't give it 5/5 is that the home screen interface isn't entirely user-friendly in that they don't educate you about which button does what. There are also no redeeming capabilities for card packages in this app game. You should literally go on your computer or be taken on a website safari to cash in your deck and cards. Ultimately if you are a die-hard fan and knowledge of the Pokemon game it gives you plenty of reward systems to be able to purchase more cards. Once you get on a train grind of achieving rewards it feels so satisfying to buy the packages. After you buy the packages there are multiple game modes that allow you to thrive as a player. Personally I'm not really good at building the deck, but it's okay Pokemon TCG provides you with the tools so you can be able to focus on the game rather than the frustration of building the deck. I especially like the deck-themed game mode that's what sold me. I really enjoy playing Pokemon TCG. It's a game with a lot of thoughtful strategy and is balanced in such a way that for the most part, a smart game can help you get back from being behind and can also balance new players with veterans so there's no terrible barrier to entry. The app is also completely free to play and offers a lot of variation so you can play endlessly. But I've been getting really upset about this game for the last six months. They've released two new decks, the Maach. And an imperial command deck. These decks are so defeated compared to all the decks that have been released. It's very easy to do basically one hit kill damage within three, if not two rounds. Every now and then you can come back to win if you get really lucky and if you actually play your cards right. But good luck getting to that point, because half the people I play with use that deck just to grind. They retire immediately if things start going south, and it drives me crazy up the wall. I love playing a game that goes for a solid 10 minutes and provides a good challenge between two equally suitable players, and it has become so little and far between that everyone just uses the same two decks that are the best, and no one really wants a challenge. I wish Pokémon had changed those decks or passed away from them altogether, because they ruined the fun and balance of the game. My daughter grew up loving Pokémon and we even bought her some cards back when it came out. She never played but still liked to get the cards. She and I have been playing Pokemon Go for several years now and she and her fiancé were recently invited by friends to try the real thing. They love it so much that they are on this Pokemon TCG app to hone their skills and get to know the different cards and strategies out there. Because of their enthusiasm here I'm a 46-year-old mother who is now addicted to this app. It's fun and I like to learn how certain cards play together or against each other. I think it's brilliant for people who might find it hard to interpret some of the rules on the cards because it does it for you that helps you learn the right way to play. Great for people who love strategic games. It's like the most fun game of rock, paper and scissors you'll ever play. It was released in Sweden on February 4, 2019, and worldwide except Japan, South Korea and mainland China on February 8, 2019. The app supports English, French, Italian, German, Spanish and Brazilian Portuguese. Blur Pokemon card game game, rejoice! TCG Dex Card is the official app to manage your Pokemon TCG collection. With an ever-expanding world of cards, this will be your only place to browse, manage and set goals for your collection. Pokemon TCG Dex Card has tons of helpful key features, including: browse a growing database of new, current, and previous-generation TCG extensions. Search for specific cards by type, name, hit points or other statistics to make building your decks as easy as possible. Scan your cards into the app using our latest image recognition feature, and see how far you've gone in your collection. Keep track of the cards you've scanned, so you can figure out which cards you still need. The app's features support all published cards since the launch of the Solar and Moon series that should be seen and marked as owners. The cards are sorted by extension and you will filter within each of the extensions by GX, trainer cards, etc. There is also a search feature where the user can search by type, rare, HP, etc. A scan feature allows a user to use the phone or tablet's camera to scan a physical card and mark it as owning the app. For promo cards in Detective Pikachu Extension, tickets cannot be viewed or marked as owner until they are scanned. In addition, scanning these cards opens a screenshot of Pokemon's card from the Film Trailers and Detective Pikachu, which can then be saved in the user's camera roll. iOS Version History Version Release Date Official Note 1.0 Feb 4, 2019 N/A 1.1 March 28, 2019 Additional support for Pokemon TCG: Expanding Detective Pikachu. 1.2 May 29, 2019 Support for X & Y Search via Text Card Bug Fixes Additional 1.3 June 27, 2019 Additional X & Y Cards Allow Easier Viewing of Cards Owned by Additional Bug Fixes 1.4 August 1, 2019 Additional Support for Pokemon TCG: Sun & Other Bug Fixes Moon – Unified Brain Expansion Additional Support for X & Y Additional Cards Additional Bug Fixes 1.5 October 31, 2019 Added Support for Pokemon TCG: Sun and Moon — Expansion of Cosmic Eclipse Added To Music and Sound Effects Updated Terms of Use of Bugs 1.6 November 18, 2019 The addressed app is not loaded on iOS 13 in some areas 1.7 Feb 6, 2020 Additional Support for Pokemon TCG: Sword & Shield Extension Updated Privacy Notice Additional Bug Fixes 1.8 April 28 2020 Additional Support for Pokemon TCG : Sword & Shield – Rebel Collision Extension Updated Privacy Message Bug Fixer 1.9 August 11, 2020 Additional support for Pokemon TCG: Sword and Shield -Darkness Burning Extending Additional Bugs Device Android Version Release Date Official Note 1.0 Feb 8, 2019 N/A 1.1 March 28, 2019 Additional support for Pokemon TCG: Expansion 1.2.14955 May 29, 2019 Support for X & Y Search by Text Card Additional Bug Fixes 1.3.15329 June 27, 2019 Additional X & Y cards allow easier viewing of Additional Bug Fixes Cards 1.4.15840 August 1, 2019 Additional Support for Pokemon TCG: Sun & Moon – Unified Brain Expansion Additional Support for X & Y Additional Cards Additional Bug Fixes 1.5.17950 October 31, 2019 Additional Support for Pokemon TCG: Sun and Moon – Expansion of Cosmic Eclipse Added Music and Sound Effects Supports 64-Bit Android Architecture Updated Terms of Use Additional Bug Fixes 1.6.18770 November 18 2019 Updated Privacy Notice 1.7 Feb 6 , 2020 Added Support for Pokemon TCG: Sword & Protector Extension Updated Privacy Notice Additional Bug Fixes 1.8 April 28, 2020 Additional Support for Pokemon TCG: Sword and Shield – Extending Clash of Rebels Updated Privacy Message Bug Fixer 1.9 August 11, 2020 Additional support for Pokemon TCG: Sword and Shield - Burning Darkness Expanding additional bugs game compatibility fixes can be played on the main article team gallery : Team Pokemon TCG Card Dex Trivia in other languages Pokemon TCG Card Dex Pokemon Trading Card Dex Card Language Title Card French-Dex du Jeu de Cartes à Collectionner Pokemon German Pokemon-Sammelkartenspiel-App Pokemon Kartendex Italian Carddex del Gioco di Cartelezion Colabili Pokemon Brazilian Portuguese Dex de Cartas do Poké Trustpas Ilustradas Russian КарноВекс Коввекионнов Карновов Илр ВокемонКартоDeks Kollektsionnoy Kartochnoy Igry Pokemon Spanish CartaDex de Juego de Cartas Coleccionables External Links References
