Cloverleaf blanket answer 4kg

For year-entire year-through use. Always need some Cloverleaf Blanket Answer treatment to the pre-emergence of the dreaded blanket weed algae that is most due to thrive when eliminating the weather hot. Cloverleaf Blanket Answer has been one of the best and most effective blanket weed remedies for a long time now, which will make many happy customers return year after year afterwards. Add to the garden pond by simply mixing the treatment with a water, can be filled with water from the dam and evenly disses over the dams surface. Starting with the water can become a milky white color, but do not be alarmed, since it will be back to normal in a few days. Although the product is safe for all fish, we recommend extra precautions for river fish such as roach, sturgeon, orfe and rudd. If your dam has any such fish, it is imperative to ensure a high level of pass-through. If river fish are present, it is recommended to dose only half the dam and then leave two to three days before applying the second half of treatment. During this period, the monitoring of the dam conditions and fish is very necessary. It is recommended that ultra violins explainers and vapor pumps should not be turned off while they are being treated. 100% safe for use with water plants. A 4kg bath blanket answer will treat up to 50000 Gallons or 10989 Liters of Blanket weed is a long green string of algae that is sometimes referred to as hair algae or filamentous algae it grows at the edges of the pond and likes to attach itself to plants. it can also be free swings. If you are unsure that it is definitely getting blanket in your pond, please send us a picture so we can confirm. Availability: COVID 19: Please allow 3 to 5 business days for delivery Blanket answer is a unique mix of minerals and enzymes. The special formula works where many bacteria cultures fail. It is 100% safe for all damfish, plants and biological filtration systems. UV units or protein skimmers do not need to be turned off. Unlike other products on the market Now newly available in 200g. 800g. 2kg. 4kg and 10kg. Bath. Blanket Answer is simply added to the dam by sprinkling the powder evenly over the surface (see also note below). The water will initially adopt a white milky appearance, but it will clean after about 5 days. The composition of the ingredients will form as a powdery layer on the dams pocket faces, and it is here that the roots of any blanket weed are attacked. As with most water treatments, the dam should have a good level of oxygen saturation, which should exist without generating an improper turbulent situation throughout the dam which will prevent the Blanket Answer from establishing ingredients on the weeds or bag. and after application, common sense must prevail in washing hands, and storing the product in a dry place away from reaching children. Although Known hazards are thought to be applying the dam of any other chemical or treatment should be spaced 10 days from the application of the blanket Answer. Blanket Reply will begin work immediately, and will contribute to the filter mediums that remain cleaner. 4Kg Treats 50,000 Gallons Image unavailable forColour: Cloverleaf Blanket Answer Cloverleaf Blanket Answer is one of our best selling lines for blanket weed and certainly works well for thousands of happy customers. Cloverleaf Blanket Answer is a unique mix of minerals and enzymes to combat blanket weeds - the nightmare curse of many a damkeeper. The special formula works in all temperatures, and seeks to succeed where many commercial bacteria cultures will fail. It is 100% safe for all damfish, plants and biological filtration systems. UV units or protein skimmers do not need to be turned off. Unlike some products on the Market Blanket Answer is not dependent on water temperature, and is not held back/limited by high ph levels. For persistent blanket Weed filamentous algae growth it is recommended that the dam be treated 8 times a year. That in itself is likely to mean that the treatment over the course of a year will be cheaper than very similarly competitive products. An 800 Gram Bottle Blanket Answer will treat 10,000 litres (2,222 liters). Blanket Answer is simply added to the dam by sprinkling the powder evenly over the surface. The water will initially adopt a white milky appearance, but it will clean after about 5 days. The composition of the ingredients will form as a powdery layer on the dams pocket faces, and it is here that the roots of any blanket weed are attacked. As with most water treatments, the dam should have a good level of oxygen saturation. During and after application, common sense should prevail in washing hands, and storing the product in a dry place away from reaching children. Although no known dangers are thought to exist, the application of the dam must be spaced 10 days from the application of the blanket answer. Cloverleaf received many phone calls from blanket Answer users who give praise to the product, it is Cloverleaf's pleasure to provide the dam custodian with a quality product that works effectively (as with all other Cloverleaf products). Below are a series of excerpts taken from several Internet-dam related forums. Maybe you've contributed to sharing the good news. If it's so thank you. User Comment: Cloverleaf Blanket Reply is the King! Cloverleaf Blanket Answer. I used this product April last year and still no blanket weed yet, its brilliant stuff. Cheers Andy. After 14 years of blanket weed problems I have a cure The product is called Blanket Answer and is sold by Cloverleaf. It's a powder that you sprinkle on the surface, it goes milky for a while and you need a air pump runs with air bricks. Until 2 months ago I had always had 5mm of the shite on my pond walls. With this gear, I have none. A BIG THANK YOU to Cloverleaf. Hi all. I used this product over 2 years ago and its brilliant, so why try other things on the market if it works ?????? I'm surprised at just how good it actually is. It may sound like a stupid thing to say, but if you look at the outside of the bottle, its very simple and basic and not really 'glam' itself as the wonder product it seems to be. Cloverleaf Blanket Answer. I don't know anyone it didn't work for. I used Viresco and it had little effect. I also tried the No More Blanket Weed - didn't have much luck with that either and seemed to get problems with my water after (though could have been a coincidence??) The only thing that actually ever got rid of the stuff for me was Cloverleaf. I think different dams sometimes get different results, but the Cloverleaf seems to have worked for a lot on this forum. Hi Jason, I used the Cloverleaf Blanket Reply when my blanket went to a length of about half an inch in September 2005. The bath says the dam water will be milky for about 5 days, but mine remained milky for about 9 days. A bit of a concern at first because you can't see the fish. Don't worry, even if in my opinion it's an excellent product. Try it. Consider Scotty. I have everyone's blanket weed 3500 galls I use a water king elec controller uv and have tried almost every chemical on the market (Cloverleaf seems to be working right now). It works a surprise.... though my bag looks like sh!t at the mo. The filters must be cleaned every other day and the pump the same. It's really dying now. Just need to invest in a good pond vac to clean everything up! Try cloverleaf's Blanket weed answer it well turn your pond white for 5 or 6 days, but it will be clear and the b/w will die. Got mine last year (end of march) and still no b/w smooth it's chemical free as well hope it helps If you're around £13 to spend... get some Cloverleaf Blanket Answer. These things are magic and trust me... it cleans the blanket weeds. Hi Richard. We had blanket weed so bad last year it was blocking the lower drains, I used a full dose of the Cloverleaf blanket answer, It made the pond look like milk for more than a week, but boy did it ever work, intact it worked so well the dead blanket weed was blocking the filters! It was early summer 2005 and hasn't had a touch of blanket weed since, The sides of the pond show the fibreglass with just a tin of brown stuff growing on it. Cheers Pete for the Advice, My Local Dealer Stock Not Blanket Answer Yet, But is sure he will when he mails me out and sees what people say about it. Hi. I had bad blanket weed last summer. Dam balance did nothing for it, even though I had success with it the year and it didn't stop throughout this winter. A few weeks ago I tried the Cloverleaf. It seems to be working very well even though it hasn't gone though. But considering a few of it was up to 5ft long, it didn't do too badly. As always, people have different opinions, but I don't think you'll go far wrong with Cloverleaf Blanket Answer. I would recommend. The best and only things I used are the Cloverleaf Blanket Answer. I always had blanket weed, but not anymore. Ian. Hi Mark, if his blanket weed you have, to use the best product is Cloverleaf Blanket Reply. It will laugh it up. Try Cloverleaf Blanketweed I used it and I found it very good cheer andy Goramori product is excellent. Since application I have been notified that a half dose is enough, I have a full dose and the dam has a month to clean, it looks terrible. I agree... Cloverleaf, I tried many products before this without results, but these things worked. I had just bought a bottle of the Cloverleaf Blanket Answer and had applied a dose to start the 4 - 5 days of milk water. I am now eager to see if the treatment lives up to the praise it gets!! I think the fish wonder what the hell I'm doing as I strive to clean my water and I just have a load of powder in cnotted, but hopefully they understand in a few days!! Being a very impatient person, I couldn't give the Cloverleaf Blanket Answer 4-5 days to do his things..... I took it 3 days instead..... And not a sign of blanket in sight. Believe me, I had a lot of it. All dams sides were covered, large long strands of it were almost reaching a foot or two long. All the pipes that feed to my pump and air bricks were covered. but now everything is evident as a bell (of whiteweed) at least, the water has yet to sort). So 10 out of 10 for this product and massively recommended if you have the problem!! I applied one application at the start of the season, NO whiteweed since, not even when we had the heatwave, pond whiteweed Free!!!! I hope next season brings the same success. Speaking to John at Cloverleaf, he said they were a victim of their own success and could hardly keep up with the question. It works and I think word comes around. It was Andy who put me on this product and he was 100% right. It was the only one working for me. I used it at the beginning of the year just got a precaution and haven't seen since, best product I've used for years. Over many years I've spent a small fortune trying to remove every product on the market that I've described on many forums as weirdo weed. In desperation, I even sent a sample to a government-funded lab, but they couldn't have any solution the frustrating problem. However, the answer came from Cloverleaf's blanket answer which I truly believe is magical, and now I've enjoyed a few years of crystal clear enjoying without any algae's. Sorry friends go for Cloverleaf, EA can cause problems dropping the PH, Barley straw is good to inhibit, but not to erase, CLOVERLEAF did a great job for me ! good luck EA works great, but I have ph drop too so now I use Cloverleaf which also works well, the only bottom to Cloverleaf is it takes up to 2 weeks to clean up from milky white looks , but I've only ordered more than I think the rewards of no blanket weed are worth it. I agree... Cloverleaf. I tried many products before this without results, but these things worked. I used Phoenix 2000, no weed, but it's also down to the Cloverleaf Blanket Answer that got rid of it all in summer 2005. 4 years ago I discovered Oasis string algae control (blanket weed). It was OK, it stopped growing it but never got rid. Then in the spring of this year I used interpet pond balance... Yes, get rid of the dam from the BW at the bottom and reduce it at the sides to half a centimeter. But then I found this forum and the view of the Cloverleaf gear was tops!! 2 and a half weeks since the treatment of its dissolved it from the sides and the scale at the bottom of my pond is coming down. I CAN SEE MY BAG. Liner.
