Popular at 11 Main Street Boulevard, Hattiesburg, MS 39401 Upcoming Recent Events 3/31/2020 12/5/2019 12/3/2019 Recent Activity Blackboard has countless features to manage your course, from sharing materials to communicating with students to organizing assignments. This page focuses on getting started with Blackboard and using some of its most commonly used features; other pages in this section will walk you through other commonly used but more complex features, such as the Grade Center. How do I access Blackboard? You will need to know the username and password of your Maine.edu. If you do not have this information, we recommend that you log in to the USM MyCampus portal; you'll find a Blackboard button in the Launchpad area on the left side of the screen. For future reference, you can find a link to the MyUSM portal at the bottom of each page of the USM website. It is recommended to use the MyUSM portal because it will also automatically register you in most of the other online tools offered by the university. However, if you want to go directly to Blackboard, you can do so by visiting bb.courses.maine.edu. How do I get started with Blackboard course. More frequent (and important) Tasks Make your Blackboard course available to students By default, your Blackboard course begins as unavailable to students. There will also be no students on the enrollment list. This allows you to set up the course before they can access it. MaineStreet will automatically add students to your course the day after it has been made available. make your course available at least one week before the start of the semester to give enough time to the system to add your students to your course and to accommodate anxious/ambitious students who like to sign up early. Once you're ready to open your course for students, you'll need to your availability settings before they can access it. Here's how: Go to the course you want to make available. Click the Customization link in the Course Management section of the menu on the left to display your options. (If you don't see the Customization link, click the Control Panel link to make sure all of your menu options are visible.) Click the Properties link. A page with course property options is displayed; scroll down to find the Set Availability section. Select Yes for the option next to Make the course available. Click the Submit button in the lower-right corner of the page. Your course is now available, and students will also be automatically removed from their Blackboard course. Students who have left the course will continue to appear in their Grade Center, and any work they've submitted will be saved to Blackboard, but they will no longer have access to the course site. Steps 2 and 3: Navigating to your course's property options in Blackboard Step 4: Changing the availability settings for a course on your Copy Content from One Blackboard Course to Another property page Is generally easier to copy an entire course and delete any content you don't want after the copy is complete than to copy parts of a course. (See note below for more information.) Navigate to the previous course, that is, the one with material that you want to copy to a new course. Click the Packages and Utilities link in the Course Management section of the menu on the left to display your options. (If you don't see the Packages and Utilities link, click the Control Panel link to make sure all of your menu options are visible.) Click the Course Copy link. The Copy Course page opens. Click the Browse button next to the Target Course ID text box to select the course in which to copy content. A pop-up window opens showing a list of courses. Click the course to select it. Click the submit button at the bottom right of the window. The pop-up window will close and the code for the course in which you are copying content will now appear in the Target Course ID text box. Select the check boxes for the specific types of content that might be out of date, such as ads. IMPORTANT: Before proceeding, the note below if you are copying discussions, assignments and/or tests and surveys. Select the Copy links and copies of content (include the entire course home folder) option in the Attachments section. This will ensure that you keep copies of the course files for the long term; if they are only linked to them, they will be removed after two years. Click Submit at the bottom right of the page. You will see a confirmation message that the copy of the course has started. The copy process can take several minutes; you will receive an email once it is completely complete. The new content you copied will appear at the bottom of the course menu. Steps 2 and 3: Localizing the Course Copy link in the Packages and Utilities menu Step 4: Navigating the course in which you want to copy content; and Step 7: The Select All button, our recommended option to select content option (include the entire course home folder) in the Copy certain content types attachments section can be tricky. Here are some considerations: Discussions: To delete threads and responses and include only the original forum when you copy discussions from one course will see posts made by students in your old year. Assignments: Be sure to select Grade Center Columns and Settings and the content area where an activity is located. Otherwise, it will not be copied correctly. Tests or surveys, and Groups, and the content area where the test or survey is located. Otherwise, it will not be copied correctly. Editing essential items Turn edit mode on and off Before you can make changes to your course, edit mode must be turned on. Click the Edit Mode button in the upper-right corner of any course page. The options for adding content will now appear. Click the Edit Mode button in the upper-right corner of any course page. to see a less messy interface and focus on other tasks like grading, engaging in discussions, etc. Step 1: Locate the Edit Mode button in Blackboard student preview mode allows you to view your course exactly as it appears for your students. Navigate to the course you want to preview as a student. Click the Student Preview icon in the upper-right corner of the page. (It's a circle with two arrows around it.) The student preview mode will be activated and you can view the course exactly as a student sees it. Click the Exit Preview button in the upper-right corner of the page when you're ready to close student preview mode. Step 2: Localize the Student Preview icon in a Blackboard course Add a file to your course The areas of and content folders are effectively the same in Blackboard. The main difference is that content folders are effectively the same in Blackboard. created within a content area. Yes, it's silly. Blame Blackboard, Navigate to the content area or content folder where you want to add File. Hover over the Generate Content menu button (a) to open its drop-down menu, and then select (b) Item. Enter a name for the file to add in the Name text box, for example, Course Schedule, Enter information about the file in the Text text box. If the file has nothing but a text page, copy and paste it into this text box. While this may seem redundant, as you are also attaching the file itself, it allows students to simply read the text of their file directly into Blackboard without having to download the file. Click the Browse My Computer button in the Attachments section. Select the file on your computer. Click the Submit button. Avoid using the File option on the Create Content menu. It does not allow you to enter a description, and your file will not be visible on some students' computers. The method presented here makes your file compatible and accessible to everyone. Step 2a and b: Options to create a new Item within a content area Change the page students see when their course, but you can change it by setting a new entry point for your course. Go to the Customization section in the course menu. If it is not visible, click the Control Panel link to expand its menu. (if it is not already visible), and then click the Customization link to view its menu. Click the Entry Point drop-down menu, and then select a new entry point for your course, that is, Ads or another page, Click the blue Submit button at the bottom right of the page, Engagement announcements and assignments are an ideal tool for communicating time-sensitive material to students, such as reminders about upcoming due dates or program changes. They appear in the Ads section of the course menu and can optionally be emailed to all students. Click Ads on the course menu (if it's not already set to be the first page that opens in your course). Click the Create Ad button. A page will open with your new ad settings. Type a title for your ad in the Subject text box. Type the ad body in the Message text box. Select whether the ad is restricted by date, i.e. it can only be viewed after and/or up to a specific date. If it's Click Restricted Date, and then enter the dates in the text boxes that appear. Select the Send a copy of your ad by email. Click the Browse button if you want to create a link to an area of the course. Click the Submit button on the corner of the page. Adding a discussion tool is the primary way for you and your students to interact asynchronously in a course. Each Blackboard course has a discussion board that contains a collection of forums. You and your students can post threads on a forum, which others can add answers to. If you intend to use a discussion forum as a graded activity, be sure to set a point value for it in the forum options before students start posting to it. See step 7 for instructions. In the next steps, we actually start by creating a LINK to a discussion forum and then create the actual forum in the process. Navigate to a course content folder. Click the Tools button to open its drop-down menu. Select the Discussion Board option. The Create Link: Discussion Board option. The Create Link: Discussion Board option. name for your forum in the Name text field. Enter your forum instructions in the Description text box. You may want to highlight and copy this text to the clipboard for use in step 12 (Ctrl+C on Mac). Click Grade Discussion Forum in the Forum Settings section if you intend to gualify for participation in this forum, and then type a number in the Possible points text box. Change any of the other default settings in the Forum Settings section if you want. Click the Submit button at the bottom right of the page. You will return to the Create Link: Discussion Board page, which will display your new discussion forum in the Select a Discussion Board Forum list box. Click the name of the new forum you created. Click the Next button at the bottom right of the page. The Create Link: Discussion Board page will change. Type a description in the labeled text box. You may now want to paste the same text that you used for the forum description in step 6. Click the Submit button. All Blackboard courses have a discussion board that contains forums. Forums consist of user-posted threads that other users can respond to. Steps 2 and 3: Creating a link to your new discussion forum Add a task to your course's task toolBlackboard allows vou to create a digital folder in your course where students can submit their work. When you create an activity, a column is automatically added to the Assessments button to open its drop-down menu. Select the Assignment option. The Create Assignment page opens. Type a name for the mapping in the Name and color text box. Enter a number in the Instructions text box. Enter a number in the Instructions text box. Enter a number in the Instructions text box. described in the instruction set below. Click the Submit button. Steps 2 and 3: Adding a Mapping to a Content Folder Steps 6 and 7: Specify a Point Value for the Advanced Options Selection for Assignments Setting Attach external files that students will need to complete the activity in Mapping Files. Set an expiration date in the Expiration dates section. Click Shipping Details to set the following options: If you use groups, you can convert it to a group assignment in Assignment type. If you want to allow students to practice difficult concepts with minimal penalty for getting it wrong!) If you want to enable plagiarism detection, select SafeAssign under Plagiarism Tools. (Read more about SafeAssign under Plagiarism Tools. (Read more about SafeAssign under Plagiarism Tools.) are co-teaching or have a teaching assistant to give them responsibility for grading this assignment. Steps 1-4: Selecting Advanced Options for a Course Menu Content Area is the Blackboard term for a link in the menu on the left of your course under which you can organize all kinds of course content, including files, text, links, and so on. They are also sometimes referred to as content folders. To add a content area to your course site. A drop-down menu opens, Select the Content Area option. The Add Content Area pop-up window opens, Enter a name for the new content area. Select the Available to users check box if you want students to be able to see the content area immediately; If you prefer to configure the content area will appear as the last item in the course menu. If you want to reorder it, follow the instructions below. You want to see this as a video? Check out the University College version on YouTube. Add a web link to an external website or Google Suite file (such as a google document or sheet) to the course menu. but be sure to follow steps 7 and 8 so that the link opens in a new window. Otherwise, some web browsers may prevent your link from working. Click the plus sign (+) at the top of the screen. A drop-down menu opens. Click Web link option. The Add Web Link pop-up window opens. Enter a name for the link as you want it to appear in the course menu (for example, Syllabus or USM Library). Type or paste the web page address into the URL text box (for example,). Select the Available for users check box. (Otherwise, the link will not be visible to students.) Click Submit. The pop-up window will close and the new link will appear as the last course menu item. Hover over the new link until a gray drop-down arrow icon appears, and then click this icon to open its menu. Click Set Link to open in a new window. The menu will close and your browser. Steps 1 and 2: Adding a web link option in the Course Menu Steps 3-6: Naming the Web Link and Adding Your Address Step 8: Configuring the Web Link to Open in a New Window Add Tool Links to the Course MenuYou can add links to various Blackboard tools, such as Zoom or My Grades, to the course menu. For more information, follow these steps or watch the Video How to add a tool link to your Blackboard course. In this tutorial, we'll demonstrate how to add a link to the My Grades tool so students can check their progress in the course. The process is the same for adding a different name in step 2 and select the corresponding tool in step 3. Hover over the + icon at the top left of the course menu until its drop-down menu opens, and then click the Tool Link option. Enter a name for the link, such as My Grades. It's the last option on a very long list. Select the Available to users box. Click the Submit button. The Link to My Grades will now appear as the last link in the course menu. Step 1: Localize the option to add a tool link to the course menu Steps 2-5: Creating a link to the My Grades tool in the Course Menu To remove a link from the course menu, hover over the item you want to delete until a gray drop-down arrow appears to the right of your name. Click the drop-down arrow, and then select the Delete option from its menu. A Ready To Be Safe pop-up window will open. Click the Delete Content link. A warning message appears. Click the Delete button. The pop-up window and the item will be removed from the course menu. Step 2: Localizing the Delete button. Course Menu displays most course content in lists, not only the course menu, but also discussions, announcements, content areas, and so on. You can reopen these lists in two ways: up/down arrows and up arrow and down arrow Simply click an item to select it, then move it up or down in the list by clicking the arrow buttons. Drag-and-drop: List items can often be rearranged by dragging them. Simply hover over the element you want to move until a yellow vertical bar appears to the left of its name and the pointer changes to a directional arrow. You can then drag and drop the item to a new place in the list. Blackboard provides a wealth of online information about its features. You can also meet with one of CTEL's learning designers for more personalized assistance. Assistance.
