I'm a good product and I'm enjoying the treadmill since. I hope to get to my destination with this Nordic Track C1900 treadmill. Nordic Track treadmills are famous for their wide range of functions. But it's not just the features that determine the quality of the treadmill. This article introduces the Nordic Track series... Nordic Track treadmills are actually manufactured by Icon Health and Fitness. In fact, if you've read some of our other treadmill reviews, you'll know that Icon is one of the largest manufacturers of exercise equipment in the world. Their impressive portfolio of subsidiaries includes Reebok, Welso, Proform and Weider. Ranging from about \$1000 to \$2000 you can class Nordic Track treadmills in the mid-price range. Smooth treadmills (click for a full review) are fast becoming the gold standard in this price category, so how do you compare nordic track? First, Nordic Track treadmills tend to be more features loaded. For example, most of their running decks use what they call reflex deck technology. In English, this means that when you descend, the deck flattens to absorb the impact, and then springs back into its original shape. It's very convenient to run, but you don't have to duplicate the requirements of the road or track running (if that's what you're training for). Nordic electronic consoles reflect what you can expect from a club machine with a good range of readings and programmed programs. However, Smooth are equal to the match in this section. More importantly, what about component design, durability and stability? A good indicator of the quality of any treadmill (or even any exercise equipment) is the duration of the warranty. NordicTrack treadmills have a so-called 3-2-1 warranty, which covers the engine for three years, the frame and other parts for two years and all labor fees for a year. Smooth hand win down in this section. Their guarantees lead the industry with 10 years on most engines. The likes of Proform and Weslo have guarantees as short as 90 days, so Nordic track treadmills fall somewhere in the middle. In general, the specifications on Nordic Track treadmills compare very favourably to Smooth. Items such as deck size and engine charge are generous for the price you pay. In fact, the nordic running surface is probably more generous than smooth when you compare the price for Smooth's Smooth's on the other hand, they are much better, which probably says something about the quality and durability of the design. Let's look at a few Nordic track treadmills and compare them with the similarly priced Smooth... Nordic Track Treadmills to consider Nordic track treadmills are hard to find online. Short of going to their official website Nordictrack.com paying a full whack, you'll be hard at finding a good choice online. The review below is a form of selection for their official website... NordicTrack S3000 See the link to our full review. The reviews below are in the process of getting the full page there your own as well. NordicTrack C1900 TreadmillOne of the cheapest Nordic Track treadmills on the market. Still at \$1000 you should expect more than a small 1.5HP engine on this machine. CoolAir fans with optional aromatherapy fragrances are a nice touch, but they shouldn't get into the decision-making process. Smooth 5.0 is at the same price with a 2.5HP engine and a more durable warranty. Engine size: 1.5 continuous dutyObything: 55w x 20in Maximum speed: 10mphMaximum Tilt: 10% Heart rate: YesFolding: Yes Nordic Track C2300 TreadmillS 1.75HP engine is disappointing on this \$1300 piece of equipment. The running surface is a good size and the console has some interesting features. All are equipped with CoolAir fans. Compare with the Smooth 5.0 treadmill, which has better specs. Engine Size: 1.75 Continuous DutyObsymption Area: 55in x 20in Maximum Speed: 10mphMaximum Tilt: 10% Heart Rate: YesFolding: Yes Nordic Track E2500 TreadmillW about \$1500 has stiff competition with the likes of Spirit, Trimline and Smooth 7.1. It has some interesting features like these fans and adjustable cushioning, but be sure to do your comparisons before buying. Engine size: 2.0 continuous dutySue: 55in x 20in Maximum speed: 12mphMaximum Incline: 10% Heart rate: YesFolding: Yes NordicTrack Elite 2900 TreadmillAlso in the price range of \$1500, this model adds to the already saturated price market. Some of what is separated from the competition, it's high definition display, long belt and motor 3.5CHP Engine size: 3.5 continuous duty Area estimate: 60in x 20in Maximum speed: 12mphMaximum Tilt: 12% Heart rate: YesFolding: No Track Nordic 7600R TreadmillIt has the same specifications as the upper treadmill for home Nordic Track E4400 below. However, it is cheaper and offers more training programs ... thirty of them! This treadmill is perfect for experienced runners, but compare it first with Smooth 9.2. Engine Size: 3.0 Continuous Duty: 60in x 20in Maximum Speed: 12mphMaximum Tilt: 12% Heart Rate: YesFolding: Yes Nordic Track E4400 Treadmill One of the most expensive Nordic Track treadmills at home at the moment. Offering a huge 3.0HP engine, a top speed of 12mph and a very generous surface area for it is almost commercial class At home. At \$2500 it has a lot of serious competition from Trimline, Spirit, Keys and Smooth. Engine size: 3.0 continuous dutySupply: 60in x 20in Maximum speed: 12mphMaximum Tilt: 12% Heart rate: YesFolding: Yes What alternatives should be considered on Nordic Track treadmills? If you think a good guarantee you need to try brands like Smooth and Keys. Smooth 5.0P and 7.1HR are also mid-priced and offer excellent specs...
