Naruto fighting games unblocked 77

Comic stars fight 3.6 9 switching endless health mode Super Smash flash 2 v0.9b 1 switching endless health mode; 2 Add NARUTO BATTLE CR score: KAKASHI – There are so many different options in this online fighting game. The player of the game must be in control of the boxing he chooses and let this fighter fight against different opponents to defeat them one by one. data-scroll=display:block;text-align:center;field-right:auto;field-left:automatic;width:480px;height:320px;> One Piece vs. Naruto, an unblocked game, is an exciting fighting game. In this fighting game, you will control characters from Once Piece and Naruto anime. Like all other fighting games, your goal is to win all the battles in the game. Play One Piece modes against Naruto You can play this in 2 different modes that are 1 player and 2 player modes. You can fight either against the computer or any of your friend. However, you should keep in mind that 2 players mode is the better option. How to play One Piece vs Naruto Unblocked When you select 1 player mode, you will use the keys A, D, S, L, I, K, U, J and O to control your fighter. To move your fighter, you must use A and D keys. While key A is to move left, the D key is to move to the right. To protect, you must press the S key. If you want to get shot, you have to use the key. In addition, you can make your fighter jump with key K. You can use the U key for a long-distance attack while you can use the J key for a common attack. For help, you must use an O key. When you select 2 players mode, the first player will use A, D, S, L, I, K, U, J and O to control their fighter. On the other hand, the second player will use the left arrow, right arrow, down arrow, 3, 5, 2, 4, 1 and 6 keys to control his fighter. The left and right arrows are to move the fighter to the left and right sides. The down arrow should be used for protection. While the 3th key is for a dash, the 5 are for the comm. In addition, the 2 keys allows the second jump of fighters. 1 is for attack, and four is for long-distance attack. For help, the second player must use a 6 key. » You may like...
