Step 2: Learning Korean NumbersOnline Resources: is the second step to learning how to speak Korean numbers. In Korean, two number systems are in use and we have lessons on both of them. Lessons are explained in English, but knowing the Korean alphabet will help pronounce numbers. The first system is the Chinese-Korean numeral system adopted by the Korean language from Chinese. Indes numbers are often and very easy to learn. You just need to learn the first 10 numbers plus 100, 1000, 10000, and the like. The rest are all combining base numbers together. For example, the number 2 이 (i) and 10 십 (sip). And 22 of 이십이 (isipi). This number system is used for a few different things like money and calendar dates. It's the most useful numbers system, so learn it first. It's easy to learn because it's structured. It follows patterns, and it may even be easier to learn than numbers in English. The second system is the Native Korean Numbers system that was later created. It takes a little more effort to learn these numbers. Pronunciation is a little more challenging and does not follow the simple patterns of the China-Korea numeral system. For example, four 넷 (pure) and five 다섯 (daseot), while forty 마흔 (mahon) and fifty 쉰 (swin). Korea's native counting system only goes up to 99, but even those numbers can be hard to tell. You'll use these numbers to say your age, or count values like how many bananas you want to buy on the market, and so on. Just start with the China-Korean system lesson and learn to count to 100. Then move on to the next step. You can mark the lesson and then learn more about native Korean numbers later. Even if you don't use the right number system when you talk, people understand what you're saying. It is the goal that you speak Korean as soon as possible!
