Satellite image of the North American continent: This illustration is a composite satellite view of North America, presented as an orthographic projection, centered on 40 degrees north latitude and 95 degrees west longitude. It was created in 2002 as part of nasa's Blue Marble series. It is a redesigned and cropped part of the most detailed true color image of the entire Earth created at the time. The creators of blue marble images stitched up months of satellite images of the Earth until they came up with an almost cloudless, true color mosaic. Most of the data used to produce this image was obtained from NASA's moderate-resolution spectroradiometer, which flew more than 700 kilometers above the Earth's surface aboard the Terra satellite between June and September 2001. Topographic shading was added using the GTOPO30 altitude dataset compiled by the U.S. Geological Survey. You can learn more about this image and get higher-resolution copies in other projections from NASA's Visible Earth catalog. North America is a continent north of South America, between the Atlantic Ocean and the Pacific Ocean. North America has a wide range of natural resources.
