Data Pokémon Data Mechanical Game Mechanics Games Pokémon Games Other community / Other This checklist was created by pokedexchecklist copy saved copies saved With the re-release of Pokemon Red, Blue and Yellow on Nintendo eShop, we are really seeing who played the games back during their debut and who did not. That's how you tell who you want to be friends with, after all (just kidding!). But there are elements that new players can't understand or need help figuring out. Amazon HMs are special hidden moves that you can use outside of battle to solve different puzzles you will find scattered throughout the red and blue Pokemon. They are quite simple to find and use (as opposed to catching Mew) and it is usually easy to figure out where you need to use said moves, but if it's the first playthrough you might be fighting. This is one of the simplest HMs to find. You'll have to have entered S.S. Anne, for which you need an S.S. ticket. You'll have to go to Vermilion City to board S.S. Anne and fight your rival. Once you fight and defeat your rival, you can enter the captain's cabin. You'll find there an older man who has seasickness. If you give him a backrub, you'll be rewarded with HM01, which is Cut. You can use it in and out of battle, either as a powerful attack or to reduce the bushes in your way here and there throughout the game. It's an absolute necessity like the rest of the HMs, so make sure you get it in the game as soon as possible, so you can open up additional areas to explore. This HM is one of the most useful and also one of the easiest to obtain. You just need, after getting the Thunder Badge in Vermilion City, head to Route 16. You will find a girl there who is in a secret resort area. In exchange for your silence and not telling anyone where it is, it will give you HM02 - Fly. This will then allow you to travel all over the world at the drop of a hat using a flying Pokemon. You'll be able to reach places without traveling there on foot, an obvious advantage if you're tired of walking everywhere and wasting precious time! This ability is essential if you want to exploit Missingno, glitch or other tricks in the game, so you will definitely want, especially as a strong water type movement. You'll find it in the Safari Zone, and you'll purchase it for 500 of Pokemon currency. It is the only HM that you are actually asked to buy in order to get it, but you have to do this to finish the game. You're going to want to. If you have seen boulders or similar elements in the world you were probably curious about getting them out of your way or if you really can. You can, and require HM04 - Resistance element. You're going to have to go back to the Safari Zone to find this HM. Fuschia City you will find a guard who has lost his golden teeth. You have to go to the Safari Zone to find them. Explore the bushes until you see a Poke Ball element after walking down a few steps and you will find golden teeth. Go to the left of the screen after you pick up the item and go into the house to get Surf, if you haven't already, and then walk around until you automatically exit the Safari Zone. Go back to Fuschia City and introduce them to the director. You will then be rewarded with HM04 - Power. This is one of the simplest HMs in the game to get, and you'll be given very early around the boulder State Badge in Pewter City. It is found on Route 2, south of there. If you had a Pokemon that knows the Cut, you will be able to continue through this path until you see an area close to the Viridian Forest. There's a help teacher waiting here to give you Flash if you've caught up to 10 Pokemon before this point. Thank you for letting us know! Tell us why! I have previously addressed about Pokemon who can learn Cut, this question has been asked several times. Now, let's talk about the second most asked question, which Pokemon can learn flash? Below are some of the important details about flash move, and the table shows the full list of Pokemon that can learn flash, including learnsset; if they can learn using TM/HM or by the top level. Most Pokemon who can learn flash is by using TM (70) or HM (05). Only Volbeat (Gen 4 starting), Morell and Shiinotic can learn flash level up. Meanwhile, with Pokémon's release: Let's go, Pikachu! and Let's Go, Eevee!, both Kadabra and Alakazam can learn flash level up. Changes in generations from 1 to 3, Flash motion decreases target accuracy by one stage and was HM05, the flash has 70% accuracy. In Generation 4 and later, Flash accuracy has changed to 100%, and now it's TM70. In Generation 7, everything has changed because the flash is no longer usable outside the fight. Flash effects can ignite dark caves. In generations 1 and 2, the movement of lightning illuminates the entire caves and returns to normal as the player exits. But in subsequent generations, the lightning movement will only light up around the player. In generation 4 and beyond, when a Pokemon has Normalium Z, and use Z-power; Flash turns into Z-Flash. As a result, the user's evasivity was raised by one stage.
