The 11,404,380 Popular US Monthly Visits in Action Training Systems helped set the standards of firefighter training video products in 1988 and have consistently delivered high-quality programs expected by both voluntary and paid fire departments. Our program teaches to currently recognized national standards and is designed to be used as part of the overall curriculum, led by instructors. EMS Online Interactive Courses and several fire courses are approved for one hour for continuous education for state and NREMT CE requirements. Price shouldn't be an issue when it comes to something as important as training. We offer a wide range of options to help meet your needs and budget. Our training is designed to be used as an instructor resource to get in and out of the classroom. Interactive ATS courses provide teaching, testing and detection through our Learning Management System. The ATS Online Video Library allows you to stream our DVD content in or out of the classroom. Our skill demonstrations and training objectives are developed in accordance with current industry standards and carefully reviewed by matter experts. Our content surveillance and courses are provided by a committee of highly qualified EMS educator programs, pre-hospital care providers and medical professionals. Our industrial firefighter training is based on skill and very visual, covering everything from fire extinguishers and alarm systems to industrial water supplies and tank fire control. Stay up to date on new products and online interactive course update offerings Update DVD series updates strong sharing and support from well-known publishers expanding our global reach and enabling ATS to deliver emergency response training worldwide. Content is based on nationally recognized standards and enables continuous educational credit and certification. Home / Product / Resource Instructor / FITS Quiz Generator & Banks Questions / IFSTA Hazmat First Responder 4th Edition International Fire Services Training Association Edition CompanyOklahoma State University College of Engineering, Architecture, and TechnologyFounded1934Country from originUnited StatesHeadquarters locationStillwater, OklahomaPublication typeTraining manual, curriculum, video, eBook, application, course management system of the International Fire Services Training Association is bomba service members who are dedicated to leveling up fires and other techniques of emergency and safety response through training. Ifsta's mission is to identify the requires training materials and to foster the development and confirmation of training materials for fire services and related fields. IFSTA publishes manuals such as Fire Fighting Needs, Fire and Emergency Services Instructors, Fire and Emergency Services Company Officers, Chief Officers, Construction of Fire Services Related Buildings, Dangerous Materials for First Responders, and more, in print and eBook formats. Other training materials produced by IFSTA include curriculum, study guides, videos, applications, and ResourceOne course management systems. IFSTA is governed by an executive board comprising 12 elected members, 3 to 6 appointed members and one executive director. Board officials include chairman, vice chairman, and executive director. IFSTA itself does not have its own employees or funds. IFSTA operating expenses are funded solely by Fire Protection Publications (FPP). The FPP office is considered the official headquarters of ifSTA. Fire Protection Publication is an outreach programme of the College of Engineering, Architecture, and Technology (CEAT) a division at Oklahoma State University (OSU) in Stillwater. The IFSTA motto was written by firefighters, for firefighters. THE IFSTA Conference confirmation conference for the IFSTA Conference is held every July. The committee of technical experts meets and works at a conference addressing the current standards of the National Fire Protection Association and other standards manufacturing groups as it applies to manuals certified IFSTA. These technical experts review all manual drafts and verify that the contents are valid. Committee members do not accept payments to participate and typically finance their own travel expenses to attend the July meeting. The Active Committee also meets at the IFSTA Winter Meeting held every January. The publication of Fire Protection funds travel members to attend this meeting. IFSTA Executive Board The Board has the sole policy making authority for the association as long as the policy does not conflict with the Oklahoma State University procedures. The board's duties include creating policies, establishing positions, ad hoc, manual authentication committees, stopping projects, setting up new projects, approving scope and purpose statements, approving titles for new and revised training materials, advising Fire Protection Publications on related matters, and maintaining external relations with other organizations. Twelve board members were selected by representatives of the IFSTA Confirmation Conference. Up to one-third of the board members may be appointed to the board on the recommendations of executive directors and chairman of the board. The Board of Directors serves three years. The seats are selected by a simple majority of the board. The chair was all board meetings and general assemblies. It is also a duty of chair to appoint a standing committee and ad hoc. The vice chairman is appointed by a seat from board membership. The vice chief served as chairman of the administrative committee and representative selection committee and assisted with other duties as assigned by the board. The executive directors are employees of Oklahoma State University approved by the board. Executive directors are empowered to act autonomously for the executive board in policy questions that are a concern to the association until such a time as the board may give due consideration. Representative Select Committee IFSTA The Delegate Select Committee elects delegates for technical input. The Committee comprises three board members and two conference delegates; the committee is chaired by the vice-chairman of IFSTA. The Committee reviews applications, and delegates are selected based on technical and demographic expertise. IFSTA Technical Committee Serving on the prestigious IFSTA technical committee in the fire service community, and delegates are acknowledged leaders in their field. This unique feature provides a close relationship between the International Fire Services Training Association and other fire protection agencies, which helps attriber the efforts of all concerned. The IFSTA technical committee meets and functions at a conference addressing the current standards of the National Fire Protection Association and other standard checker groups as it applies to manuals certified BYSTA. Committee members also received manual drafts throughout the year and electronic meetings were held on a regular basis, between the two meetings in person. The committee members are technical experts who review all manual drafts (produced by FPP editorial staff) and confirm that the contents are valid. Committee members are not paid, and IFSTA or Fire Protection Publications only reimburse them for their expenses related to attending the January meeting. The committee members participated in their commitment to the fire service and its future through training. The history of IFSTA In 1933, the newly hired Oklahoma A&M Fire Training Coordinator W. Fred Heisler and Stillwater Fire Chief J. Ray Pence invited various fire service representatives from around the state of Oklahoma to Stillwater to discuss fire training efforts coordinated throughout the state. Five two-day courses covering ten basic firefighting topics have been developed. In 1933, Pence invited representatives from Missouri, Arkansas, Oklahoma, and Kansas to Stillwater. The Western Bureau of Characters, a group of insurers, supports this meeting. As a result of this meeting, participants see the need to organize teaching manuals on fire fighting. In the fall of 1934, the West Actuarial Bureau brought together a group of fire training representatives from Missouri, Arkansas, Arkansas, and Kansas to meetings in Kansas City. The participants determined that there was a huge need to organize a teaching manual on the basics of firefighting so that training would be more consistent. The discussions and results from this group formed the basis of the procedures that followed today and represented what was then called the Fire Services Training Association (FSTA). (International was added when Canada became a participant in 1955.) Oklahoma A&M College (OAMC; now Oklahoma State University) was chosen to publish the works. The first professionally developed manual written as a result of this meeting was released in 1937. They maintain the red cover used by previous OAMC fire publications. W. Fred Heisler, a teacher, coach, and director of Fire Service Training at Oklahoma A&M from 1934 to 1951, was a writer, coordinator, and editor of Redbooks for the next 20 years. Heisler retired in 1955. After Heisler's retirement, Everett Hudiburg became editor of the Redbooks publication - the operation was stationed at the OSU Campus Fire Station. By 1965, FPP staff came out of the fire station, and people involved in manual writing and publication were transferred to Quonset Hut #2 – a temporary building of World War II on the OSU campus. Throughout the 1950s and 1960s, firefighters across the country used training manuals published in the OSU. The publication and distribution of the fire training manual continued until it expanded into a separate entity known as Fire Protection Publication (FPP) in 1969. It was led by his first full-time director, Harold Mace. In the early 1970s, the FPP (publisher of Redbooks) and OSU Fire Service Training separated from the Center for Fire Protection Studies and became two cooperation entities. Today, the FPP continues to serve as the headquarters of the International Fire Services Training Association (IFSTA). The FPP operates from an enlarged new office building and a warehouse distribution centre in the northwestern part of the OSU campus.
