Go to the My Games & Apps website, and then tap Install. Error 0x80080204: Check for updates in the app. If it doesn't disappear, uninstall the program and reinstall it. Error 0x80070017: Try connecting it to your PC. If you don't, you'll have to change it. Error 0x80bd0004: Wait for Xbox Live to update. Error 0x800c0005: Checks the connection if it affects the online service. If not, reinstall the program. Error 0x80080204: Check for console updates. Error 0x80073cf3: Go to my games and apps, find out if there's a game, and uninstall it. Error 0x803f8007: This usually happens if you've requested a refund, so talk to support. Error :0x803f8003: Restart the console or game in Windows 10. Error 0x80270300: Reinstall the game. Xbox LiveAlso Xbox One ports are already a well-prepared machine for elegantly solving this problem, you may still need to open Xbox Live ports on

your home router. To do this, you will need to grant access to Port 80 (UDP)Port 3074 (UDP and TCP)Port 53 (UDP and TCP)Port 80 (TCP)Port 500 (UDP)Port 3544 (UDP)Port 4500 (UDP)Restore PefiA, then I will detail to you how to recover your profile if it is damaged or has problems starting games. Go to Settings Accounts Delet accounts. Once inside, you just have to choose your profile and then put it again. Be sure to tell the console only to delete the profile, not the data associated with it, such as games or games. We will continue to update this list continuously as we investigate more bug codes on Xbox One, Xbox 360, and probably also on Xbox Series X. Xbox Live allows you to buy all kinds of content such as games and content, but sometimes there may be some errors when making online payments. Users reported error 807b01f7 and, This error occurs every time they try to make a purchase on Xbox Live. This can be a big problem, but there are some solutions you can try. Xbox error 807b01f7, how to fix it? Fix – Xbox 807b01f7 Error Solution 1 – Check the status of the Xbox Live Xbox Live service depends on certain services to work properly, and if one of them does not work, you may get error 807b01f7 when making a purchase online. You can check the status of Xbox Live services simply by visiting the Xbox website, but if none of the services are running, you can only wait for Microsoft to fix the problem. Solution 2 - Check your Internet connection Depending on users, you can solve this problem by simply testing the network connection. Here's a simple procedure, and you can do it on Xbox One, follow these steps: Open settings on Xbox One. Select Network . The Network Settings screen opens. Under Troubleshooting, click Test Network Connection . When scanning is complete, select Test multiplayer connection . To test your Xbox 360 connection, press the Guide button on your controller. Go to Settings> System settings, and then go to your network settings. Select a wireless network or Wired network option. Now select Check Xbox Live Connection. If you're having network connection problems, you'll need to fix it before you can make purchases on Xbox Live. Solution 3 – Delete your Xbox profile and upload it again This error can sometimes appear if your Xbox profile is damaged and one of the best ways to fix it is to delete your profile and download it again. To do this, on Xbox One, follow these steps: on the home screen, scroll to the left to open the Guide. Click Settings> All Options . Under Account, select delete accounts . Tap or click the account you want to remove. Click Delete to confirm. When you're done, click Close . Now you'll need to add your account again by following these steps: Scroll left from the home screen to open the Guide. Scroll down on the Sign In tab, and select Add & Manage . Click Add New . Enter your Microsoft account sign-in information. Read the Microsoft Service Agreement and privacy statement, and then click I agree. Follow the on-screen instructions to set sign-in and security options. To delete your Xbox 360 profile, follow these steps: Go to settings and select System. Select Storage . If you have an external storage device on an Xbox, such as a USB flash drive or portable hard drive, select All devices. If you don't have an external device, select Hard Disk. Select Profiles and select the profile you want to delete. Click Delete. Now select Delete profile only . This option will delete your profile, but keep saved games and achievements unchanged. After deleting the profile, it must be added again following the following steps: Press the Guide button on the controller. Select Download profile. If this option isn't available, you'll need to verify that you're signed in to your Xbox profile. If so, press the X button to log off, and select Download profile. Click download profile on the Download Profile screen. Enter your access information. Now select a storage location and wait for your profile to load. After you delete and load the profile, you should fix the problem again. Solution 4 - Clearing the Xbox 807b01f7 system cache error may appear because the cache is corrupted and if you want to fix this error, you must clear the cache. This is a simple process, and in order to do this on xbox One, you need to follow these steps: Press and hold the power button on the console until it turns off. Unplug the power cord from the console. Now press the power button several times to completely drain the battery. Plug the power cord into the console. Wait for the electric light of the brick to change from white to orange. Press the power button on the console to turn it back on. To clear your Xbox 360 cache, follow these steps: Click the Guide button on your controller. Go to Settings> System Settings . Select Storage or Memory . Select any storage device and press Y on the controller. Select Clear system cache. When the confirmation dialog box appears, click Yes Restart console. After clearing the cache, verify that the problem is resolved. Some users suggest clearing the cache after deleting their Xbox profile, so you might want to try it. To learn how to delete and upload an Xbox profile, be sure to check out our previous solution. Solution 5 – Keep trying to make a purchase Depending on users, you can avoid this mistake by trying to make a purchase again. Users reported that they were able to make a purchase after several attempts. If this fails, wait an hour or two and try again. Solution 6 - Start the game and sign in to your Xbox Live account Some users claim they just fixed this bug your game and login to Xbox Live from the game itself. This is a simple solution, so be sure to try it. Not being able to purchase content on Xbox Live can be a big problem, but as you can see, there are several solutions that you can use to fix an Xbox 807b01f7 error. Fix: Downloadable content changed Xbox Bug Fix error: Xbox login failed 0x87dd0006 Fix: Mandatory storage device removed xbox bug Fix: Xbox bug Current profile not allowed
