Europe map worksheets printable

The site Amadeus.net has put together a useful page full of printable subway maps for everyone. Major American cities are covered here, as well as subway systems in Europe, Australia, Africa and Asia. Maps come in a printable .pdf form. We've definitely blogs about subway maps before, but this is actually one of the best places I've seen for accuracy. Subway Maps [Amadeus.net] Shutterstock Once your child enters first and second grade, you can strengthen basic measurement skills with these free worksheets. She will have practice measuring inches, inches, feet, yards, cups, quarters and combs. This art spreadsheet is a template for creating your own Mondrian-style painting. Photo © 2004 Marion Boddy-Evans. Licensed by About.com, Inc. Color only exists through another color, the dimension is defined by another dimension, there is no position except as opposed to another position. - Mondrian Create your own version of a Mondrian geometric painting, using this numbered diagram as a template. Think of Piet Mondrian and think of large paintings with primary-colored asymmetrical rectangles on a grid of strong black lines. It is hard to imagine that he began as a landscape painter and was influenced by fauvism, symbolism and Cubism on his way to his characteristic abstractions. To survive, Mondrian had been a painter of flowers on porcelain for most of his life. Perhaps this explains his hatred of nature. ... [Mondrian] removed curves and all the greens because it reminded him of the trees, which he deteriorated. ... In 1924 the artist separated from Theo van Doesburg, who ... maintained that the line tilted in a 45 degree tilt better corresponded to the dynamism of modern man. (Art of our century, ed Jean-Louis Ferrier, page 429.) You will need: • An impression of the template. • Paint in the following colors: black, white, red, blue. • A brush. It may be easier for you to use a large and small brush for large/small tagged areas from 1 to 3. Or a separate brush for colors 1 to 3. What are you going to do: • Print the template and paint it directly or use it as a guide to mark lines on a larger sheet of paper or canvas. • Decide which colors you will use for numbers 1 to 3. Black should be reserved for the marked areas 4. • Paint in each area in its designated color, taking care to make sure that its lines are straight and that the colors are not put in the wrong areas. Tips: • To get perfectly straight lines, use masking tape to make sure the paint doesn't drift over where you don't want to. • Instead of painting in black stripes, buy a black duct tape and put this on the Site. Be sure to buy it in the right width as it is difficult to cut a tape length in half evenly. 2 Times Tables Worksheet 1 of 5. D. Russell Print the data destination worksheet twice tables in Destination worksheets are made to look like a dart board. The destination number is two and is in the middle of each of the destination tabs. The following ring shows what to multiply the target number, two by and the outer ring of the target is blank and is where the answer (product) should be written. Learning the facts of multiplication can be daunting for children and sometimes helps change the process. These destination worksheets change it a little to provide a different experience of traditional horizontal or vertical worksheets. To ensure that today's children learn the facts of multiplication and commit them to memory, it takes 10-15 minutes of practice three or four days a week, usually for the school year and sometimes longer. Worksheets like these should be revisited frequently throughout the year. Use an egg timer or stop the clock and record how long it takes a child to complete a spreadsheet for gage progress. Playing beat the clock often stimulates some extra fun. 2 Times Tables Worksheet 2 of 5. D. Russell Twice tables are usually the fastest to learn and engage with memory. In fact, random events should only be done after the child has learned the time tables of two, five, ten and square (2 x 2, 3 x 3, 4 x 4, ...). A sequence must be followed in getting children to commit the facts in memory. For both tables sometimes, a lot of oral jump count helps you learn the facts. The jump count refers to 2, 4, 6, 8, 10, 12, etc. However, when you skip the count, don't always start at 2, use a variety of entry points to skip the count. Take turns telling them orally, start in various numbers. For example, I will say 4 and the child will say 8, I will say 2 and the way of child say 4, for every number I say, the child must provide the product by multiplying my number by two. You can also find the 100 chart useful for displaying counting patterns by two. When using the hundred chart, have the child's shadow in the multiples (2,4,6,8, 10) of 2. 2 Times Tables Worksheet 4 of 5. D. Russell 2 Times Tables Worksheet 5 of 5. D. Russell When children study grammar, one of the most basic lessons they learn involves the parts of speech. The term refers to the category to which words are assigned based on how they work in a sentence. Knowing and understanding the parts of speech help children avoid grammatical errors and write more effectively. English grammar consists of eight basic parts of speech: Nouns: Name of a person, place, thing or idea. Some examples are dog, cat, table, playground and freedom. Pronouns: the place of a noun. You can use it instead of girl or him instead of Billy. Verbs: shows the action or state of the being. Verbs include words run, look, sit, am, and it is. Adjectives: Describes or modifies a noun or pronoun. Adjectives give details such as color, size, or shape. Adverbs: Adverbs: or modify a verb, adjective or other adverb. These words often end in -ly, such as quickly, quietly and gently. Prepositions: Start phrases called prepositional phrases that describe the relationship between other words in the sentence. Words like, a, and between are prepositions. Examples of its use in one sentence include: The girl sat by the lake. The boy was among his parents. Conjunctions: Join two words or clauses. The most common conjunctions are and, however, and o. Interjections: It shows a strong feeling. They are often followed by an exclamation point, such as Oh! o Hey! Try some fun activities with your children to help them learn how to identify each part of your speech. An activity could be using a different colored pencil for each part of the speech and underlining them in old magazines or newspapers. Print these parts of voice spreadsheets for your children to complete: Beverly Hernandez Spend some time discussing parts of the speech with your students or children. Provide plenty of examples of each. Then make students complete this part of the speech vocabulary sheet. For a nice practice identifying parts of speech, remove some of the children's favorite books and find examples of the different parts of the speech. You could treat it like a scavenger hunt, looking for an example of each. Beverly Hernandez How children look for the names of the speech parts in this word puzzle, encourage them to review the definition for each. See if they can reach one or two examples for each part of the speech, as they locate their category in the puzzle. Beverly Hernandez Uses this crossword puzzle as a simple and engaging activity to review the parts of the speech. Each track describes one of the eight basic categories. See if students can successfully complete the puzzle on their own. If they have problems, they can refer to their completed vocabulary spreadsheet. Beverly Hernandez You can use this challenge spreadsheet as a simple quiz in all eight parts of the speech. Each description is followed by four multiple choice options from which students can choose. Young Beverly Hernandez students can use this grammatical activity to review all eight parts of speech and brush up on their alphabetical skills. Children must type each of the word bank terms in alphabetical order in the blank lines provided. Beverly Hernandez In this activity, students decipher the letters to reveal each of the eight parts of the speech. If they get stuck, they can use the tracks at the bottom of the page to help. Beverly Let your students play super sleuth with this challenging secret code activity. First, they must decrypt the code. Then, they can use their decoding key to identify the parts of the speech. There are clues at the bottom of the page to help if you have problems. Browse our collection of free printable maps for everyone geography studies. Improve your geography study by clicking on the map you are interested in downloading and printing. You can use these map contours to tag capitals, cities and landmarks, play geography, color and more games. Each individual map clearly illustrates the silhouette of each location and includes a star that represents its capital. Large Map of the United States (2" x 3' size) U.S. unlabelled map (font size) Large map of Canada (2' x 3' size) Map of Canada without label (font size) Create a small flag using a toothpick and a piece of paper or cardboard. Type the name of a state or country and let your student place it in the correct location of the map. Make your own puzzle (using the large map of 2" x 3') to have your child cut the shape of each state, province or country and tag it. Then make them set each piece of 'puzzle' to create the map of the country or continent. Take a step further by making your child write the capital for each location. Let your child select a map and draw the flag of the state, province or country on a piece of paper. You can do more research to learn what the colors and symbols of the flag are. Print a map of state, province or country and have the children's label of neighboring states or countries. Create flash cards on each printable map and type things like status nickname, abbreviation, and capital on the back. Make a board game of various maps and give your cardinal child directions to find a particular state, province or country. For example, from New Mexico, move north of a state, and then lead a state to the west. They should land in Utah. PreK - 8th \$19.95 monthly, first student (\$14.95 monthly for each additional student) 9th - 12th \$30.00 monthly, per student (Includes 4 courses per student) Now is the time to start!
