To see if the kite is stable: keep it horizontal and drop it to the ground. If 'kips' his nose: nothing good. If he falls on his bud: nothing good. If it slips smoothly to land on the chest: so well! Mine was fine. He swept a little -- a little-- to the left, but the whole thing was more than acceptable. A rope was fastened to the 'sine-arch' and then it was time to go on the air. We went to the beach, and excited as a boy I launched my prototype for the first time. Too bad the camera didn't work, but I tell you this kite flew like a pro in the air higher. The first time it went a little too far to the left, but after adding some weight (a small piece of electrical wire) to the right wing it went straight up. Do you know my best moment? When I got rid of the rope, the honey poiana flew smoothly to the ground, like a real one! so well!!! Enjoy the building, I will add the floor as soon as possible! Girls dressed in matching T-shirts chat under neon signs in the shape of guitars, attracting the sound of live music emanating from bar after bar. While this is a regular weekend in Nashville, one of the most popular bachelorette party destinations in the U.S., it's just a small slice of music music if your view of this Tennessee gem is limited to cowboy boots, whiskey, and country music, you're ready for a treat. While the party scene attracts a lot of attention (and for good reason), another side of Nashville has taken shape quietly of late.
