They are perfect. Nice blend of laser cutting and manual work (I can't imagine how they use a laser to cut glossy stainless steel) - Glen, California This is beautiful and will live on my workbench for daily use as I apply the gold average rule to my design – Bob, Vermont Box and clamps arrived safely... very classy. Will make a great gift - Grahame, New Zealand Clamps are breathtakingly beautiful! I'll show them to my potter friends & teachers! - Michael, Australia Set of clamps arrived yesterday, and they are wonderful!!! - Dianne, Texas I look and work great, and I've already used them to help me design a decorative fence and gate – Scott, Utah I just got my clamps and they're totally amazing – David, Ohio Caliper and the box look very, very nice – Gerhard, Austria's War appeared and its great) – Adam, Sweden has received in great shape – a very nice job – Scott, Texas For artists and designers... Useful for creating or checking layouts or compositions - especially useful for the dimensions of the human body. These terminals are designed for smaller or more accurate measurements, especially on faces. They are specially designed to work in the field of plastic surgery and micro-blading eyebrows, although artists and jewelers often use them. From time to time we will create limited editions of the project... or offer discounts. There will also be experiments and prototypes... things that we find interesting, and in case anyone else thinks they are interesting - they are on offer here. We are (among other things) a digital production and design studio - so things here will not be limited to clamps. Ok, this is 2020 now I think. [br] I've been doing Golden Mean Calipers for about 10 years. [br] In 2019, I wrote 2 blog posts... it's not enough to achieve the various goals of blogging, among which are: [br]- to find out what you think [br]- to show people that you are still alive [br]- to show google (et al) you are still ... click here for more. I thought it might be useful for people to be able to compare all the clamps on one side, so I made a comparison chart. CaliperDescriptionSmallest measurementFor the largest measurementsCean (USD) Most commonly used by small clamps 120mm or 4.5 high - the smallest of the 3-armed clamps 9.5mm or .37 189mm or 7.5 \$35 Beautician Artists working with details, or smaller pieces ... click here for more. Over the years, I have built a collection of Golden Ratio Calipers... and I decided that it could be very useful for people if I made a video comparing them. Some of them are really good - some horrible. So I set up the camera... I found that my video space looked a bit bare... Need So I decided... click here for more. Quite amazing video will be in mathematics why flowers (and pine cones, relative leaf positions, etc.) are so so based on fibonacci numbers. and it's pretty amazing because I actually understood it. It was loooong time because it tangled with square equations, but (on 2 watch) it actually makes sense to me. I always thought that with ... click here for more. I was tinkering with these colors some time ago... and then someone with a unique taste and style made a big order for a whole range of colorful ... and everyone was ooh!!! So I did some for a local art gallery - and they all sold as well. So I made inquiries about getting a lot more... click here for more. Not available forColour: Image not available forColour: The Golden Mean (also called The Golden Ratio, Phi, The Divine Proportion) is a simple ratio (1 to 1,618) that is considered aesthetically beautiful and which has been used in art and architecture for thousands of years. It often appears in nature and in the human body... especially the human face... which could somehow explain their popularity in art. As it happened, the function so much in human physiology is a bit more of a mystery. They open/close a bit like a compass or divisor... distance ratio from a to b is always average gold: 1,618 to 1 In addition, the ratio of a, and the entire width ... a+b, there is also the Golden Average. Mainly artists and designers... but they were also used by musicians, furniture manufacturers, specialized craftsmen (potters, pipes, wood producers), architects, product designers and even dentists and cosmetic surgeons. Besides, these are just neat little gadgets :) How are they made? The parts are initially laser cut in Miramar, Wellington NZ – aka The Hobbit-Land. Then they are combed, sinking, polished, and the parts are riveted. Packaging takes about the same amount of time. That's not all. How much are they? \$88.99-\$104.49 includes Caliper + container type Is there a warranty? Lifetime manufacturer's warranty – if something goes wrong – replacement or refund. Wikipedia has a pretty good article about the Golden Ratio, click here. If you have questions about the product or availability, please talk to our competent sales team!
