As mentioned earlier, the minecraft PE 1.13.1 fix is mainly focused on fixing issues related to character creators: players were blocked while loading skins fixed. Besides character creator issues where users don't currently have to share the same skin, the developer also tackled some crashes that can occur when trying to join featured servers or realms. You may also notice that the chest may not look like it used to, that the language settings are improved, and that you can use the portal properly (entering the intended location and dimension). MCPE 1.13.1 Features Developers are still working to fix tons of mistakes and errors that occur in the game. For example, the crash was probably the most annoying player trouble. Fortunately, Minecraft PE 1.13.1 is doing its best to fix it. The game no longer ends after joining realm worlds or featured servers. Also, the game can end unexpectedly after you throw a residual potion. All in all, Mojang Studios has made the game better than before. Character Creator One of the most exciting and important features of the Village & amp; Pilage Update is character creators. This newly built system completely redefines the way skins work in MCPE 1.13.1. The character is a canvas, so you don't have to choose from skins that have already been adjusted, as you can change them as needed. For example, you can get a fancy farmer's hat or dress up is not normal at all. In addition, MCPE 1.13.1 fixes portal issues. It turns out that some users have been tele-reported to absolutely the wrong place in the void. They had to die to lose everything they had and keep playing. Japanese and Korean characters are now displayed correctly in language settings. The most extravagant idea added in mob Minecraft PE 1.13.1 was about foxes. These fantastic creatures are horribly timid. When the fox sees the player, it runs away. Unfortunately, you can not tame them, but you can not tame them, but you can get along with them. Foxes love sweet wild berries. In addition, they can hold a lot of items in their mouths - even swords and immortal totems. By the way, MCPE 1.13.1 has brown mushrooms.
