Bose sounddock 10 bluetooth

Bose is not far behind to get the best iPod/iPhone speaker and introduces SoundDock® 10, which, with its revolutionary wave guide technology, provides powerful and natural sound for the iPhone and iPod. The perfect design and sound quality speaker SoundDock 10 can play any source, as it has a mini connector of auxiliary input and video output, but is specially designed for the iPod and iPhone. And if you don't like cables, there's a wireless connection to your computer with an additional Sound Link accessory, or a phone via Bluetooth Dock. The Bose SoundDock 10's high-quality sound contains a subwoofer and two Bose Twiddler speakers, a combination of high and medium speakers that receive digitally processed sound, eliminating sound distortions. And, of course, amplified by using the power signal on, which prevents the use of an external transformer. With the Bose SoundDock 10 speaker, you can enjoy a wide range of frequencies, thanks to a new new design and high performance, equipped with a magnet larger than conventional woofers, and advanced wave guidance technology, a long tube bent inside the system that enhances the sound of the woofer to provide a deeper and more powerful bass. In addition, at the back it has a bass reflex output. A total of 5 speakers that provide the best sound, which thanks to its chain of digital signal Bose achieves more accurate sound control, guaranteeing more even and natural musical reproduction, even at low volume. Bose's mission is to get the best sound, but without losing the compact speaker design. The easy-to-use SoundDock 10 speaker is very easy to use. If you have an iPhone or iPod, just place it in the dock and start playing. If it's an MP3 or DVD player, just plug it in. The remote will allow you to interact between the device and the speaker, select an assisted input, turn the device on or off, and view iPhone or iPod playlists. His video output manages to play video from an iPhone or iPod on a TV while playing sound on SoundDock®. Apple Products Despite Bose SoundDock 10 playing other sound sources, it is specifically designed for iPods and iPhones as the base is made for iPod and works with iPhone certification, being compatible with any iPod equipped with a control wheel or iPod Touch, as well as the iPhone 3GS, 3G, iPhone Original, iPhone 4 and 4s. When you connect the iPhone automatically to the dock, it will also be expensive. SoundDock 10 remote control is designed to navigate lists iPhone or iPod. Your iPhone or iPod will never sound so good with the Bose SoundDock 10, the best iPhone speaker ever created by Bose. Technical features made for iPod, iPhone and iPad. Auxiliary input mini connector 3.5 mm. Exit video. Bose Weidgid's own technology. High performance, the size of The Wufer. 2 media and two triple speakers. The release of the SLR bass. Dimensions: 22.1 cm (H) x 43.2 cm (W) x 24.4 cm (D) Weight: 8.4 kg Extra accessory: Bluetooth adapter that is able to memorize up to 6 different sound sources. The 5990 Bluetooth adapter is only valid for SoundDock 10 allowing you to play Bluetooth stereo music without connecting the iPhone or mp3 to the speaker base.
