The post was reported successfully. Note: You will only be able to change your skin if you have already transferred your premium account. So, to change your skin, you will first need to transfer your account to Moyang. Player skin upload (Minecraft: Java Edition) To create your own skin, download the classic or thin reference skin below and edit it to your liking. Then log in to your Minecraft profile minecraft.net/profile and load your skin. Outer layer of skin Like Minecraft version 1.8, the skin may have a second layer on each part of the body. For information about creating custom skin, visit the Minecraft Wiki.Only the inner part of the two layers of skin will be visible if you use it while playing minecraft edition older than version 1.8. Skin models If you haven't uploaded a custom skin, you'll have a classic Steve skin or a newer Alex skin that has thinner arms. Which default shell you receive is randomly based on your account ID and cannot be changed. This skin is also displayed when you do not have a connection to skin servers. You can create your own skin according to any model using the following reference templates: Slim-armed skins are fully supported in versions 1.8 and up. If you have thin armed leather selected version earlier, you will see black pixels on your hands. Troubleshooting Why does a website say I have to pay to change my skin? This message appears if you are not currently logged in to an account that is a paid copy of The Java version of Minecraft. If you can play only demos, visit this article. Why don't I see my skin multiplayer? If you can't change your skin or don't see your skin multiplayer, visit help.minecraft.net to see if the skin server is temporarily down. If you see the default skin in the game, first check the server status, then update it offline and again. If all skins are displayed as the default, the server can run in offline mode. I loaded new skin; why hasn't my skin changed? Skin changes in Minecraft version 1.7.9 and should later occur immediately. If you are playing version 1.7.8 or earlier, skin changes may take up to an hour to be applied. If you play version 1.3 or earlier, skin changes will not appear in the game. Why are there black lines on the hands of the skin? In versions 1.8 and up, you'll see black lines, followed by 1.8 versions, followed by the classic model you choose, but you've added thin skin. To work around this issue, visit the [Minecraft.net/profile](https://minecraft.net/profile) and load the correct shell type for the selected model. You'll also see this problem if you've uploaded a thin armed skin before it's implemented in the game (version 1.7.9 or earlier). To work around this issue, visit the [Minecraft.net/profile](https://minecraft.net/profile) and load the classic skin. Skins other Minecraft publications Skin packages are available buy on the bedrock rock Market. You can also load your custom skin by clicking on a blank character pattern in the upper left corner of the skins menu and selecting Choose New Skin. More information about skin replacement in these editions can be found on the [Minecraft Wiki](https://minecraft.wiki). Last Updated Dec 27, 2020 1:26:52 UTC Did this article be helpful?
