Always consult your doctor before going on a diet or Starts. WAUSAU, Wis. (WSAW) - Monday, November 2 marked the first day back to personal lessons for students in the Wausau School District, after almost the first three months. Wausau School District Superintendent Dr. Keith Hiltz said on Monday that despite some minor problems, the day went very well overall. To see students again and to see staff excited to see students was great, Hiltz said. Students of all levels in the Wausau School District marched their way back to in-person learning, but heading back to school during a pandemic has its challenges. We're doing a lot of things that we haven't used to do and to do something new in your position has really become commonplace right now, it's the norm, Hiltz said. He said the first day at school was successful when children go to school every day they are required to disinfect. Desks are also more than six feet apart and masks are needed at all times for everyone in the building as well. Hiltz said now is the time to work out the kinks and communication between the district, teachers and families are going to be key in the student success work out. Trying to help parents understand what in-person learning [will] look like, it's not going to look like it did before and how will virtual [learning] continue and even try to help staff try and complete class lists, he said. Some families may have experienced busing problems on the first day back, Hiltz said it's a problem the district is aware of, but it can be difficult for drivers to figure out with many kids still learning virtually. They've worked hard and furiously to make sure they know where everyone gets picked up, because obviously, some students remain virtual as well, so we just encourage parents to contact the bus company, they'll work that out, Hiltz said. NewsChannel 7 reached out to First Student for comment on possible busing problems, but did not return calls. Primary school pupils meet five days a week, while high school students are in a hybrid/cohort model, meaning pupils are split by their last name. Hiltz said he hopes to continue this model in the district for the rest of the school year. Copyright 2020 WSAW. All rights reserved. Reserved.
