App cloner android kik

Cover image click to edit * Recommended to upload a 720*312 image as cover image Article Description The Cloner app can expand a cloned app to add features like password protection, incoanonimate mode, Android ID anonymity or fake locations. You can also force the app to consume data only over Wi-Fi. There are more than 100 app customization options and each update will be added. PREMIUM VERSION FEATURESThe free version allows for basic copying. Upgrade to premium to enjoy the full set of premium options:

- Copy premium apps (Messenger app, Gmail, VK, fake GPS)
- Make multiple copies of apps and use bulk replication
- Save replication apps
- Replace launcher icons
- Copy apps, view Facial display options
- Change status, navigation colors and toolbar
- Change rotation keys
- Floating apps and free-form windows
- Resize the app screen , language and font size
- Keep screen, role play mode
- Support multiple windows
- Security options:
 - Password protection apps
 - App app input mode
 - Exclude apps away
 - Change Android ID, hide IMEI, Wi-Fi MAC
 - Remove permissions
 - Avoid screenshots
 - Fake locations
 - The storage option:
 - Allow apps installed on SD cards
 - Redirect external storage
 - Clear cache when exiting
 - Remove widget, app icon
 - Disable auto-start
 - Disable default apps
 - The option to connect to a network:
 - Disable cellular and background networks
 - SOCKS proxy
- Notifications select
- Notification filters
- Silent notifications
- Change notification colors
- The auto-automation option:
 - Set brightness and silence at startup
 - Do not disturb, Control Wi-Fi, and Bluetooth
- THU ENTER Not all apps can be muted! The copy application may crash, display an error, or malfunction. Features that rely on app certificates such as Google account sign-in, Google Play Services, Google Play Games, Google Drive backups, or in-app purchases won't work! Copying an application will change your certificate, which means that the copy may not work in case the application validates the certificate or uses its advanced anti-replication capabilities. Some apps cannot be copied:
 - AliExpress
 - GCash
 - BBM
 - Evernote
 - Grab
 - Kodi
 - LINE (LINE 8.11.0 still works)
 - A unit
 - Skype for Business
 - Snapchat
 - Trello
 - Viber (Viber 7.9.6.22 only works)
 - WeChat
 - WhatsApp
 - Most Google apps (Chrome, Chrome, Gmail and YouTube work with limitations)
 - LinkedIn works

All products and brands mentioned above are the property of their respective owners. App Cloner v1.5.21 - GoogleDrive : app_cloner_apk Select Column Add to Column * Changes are irreversible after submitting the Cloner App User's Guide - Tools to Help Clone Android Apps. Didongthongminh.vn Using multiple accounts for an app on an Android smartphone requires you to use it through similar apps from other developers or sign in multiple times. This not only takes time, the insecurity of personal information, but also greatly affects your experience due to the unknown interface. To overcome this problem, Smart Mobile will introduce you to an extremely useful application, allowing us to fold any application with just a few simple steps. That's the app called App Cloner. App Cloner for Android is a smart app from AppListo, Switzerland that allows you to configure and install on Android 4.0.3 or higher mobile devices and also on Android Watch smartwatch devices. With the Cloner application, you can create and install multiple copies of existing applications. Native applications will run in parallel and work independently of their original applications. They will not receive automatic updates, so you can maintain and run a stable version with the original application. With the Cloner app cloner app, users can simultaneously sign in multiple times to apps like Facebook, Twitter, or Skype. The Cloner app also offers many options for adjusting new copies of applications, as well as changing the application name or icon. Replace the launcher icon. Create multiple copies of applications. Human smart watch app and watch face. Save share the app by copying. Remove the tool or launcher icon. Allow or prevent application backups. Allow the application to be installed on the SD card. Disable auto-start. Exclude examples of recent entries. Lock the screen rotation. Remove application permissions. Application support. Enable multi-window support on Samsung devices and some LG devices. Automatically copy expanded files during replication. Fixed the bug. Steps: First you have to download the application here: App Cloner 1.5.9 (Premium + Mod Lite + Special Mod) After installation, you open the Cloner app and accept some requirements such as accessing the system on the machine. In the main interface click on the application you need to copy, for example, here I choose Messenger Move to the next screen, the options are customized for the application to copy as Quantity, Name, Color, icon, as well as security mode options, storage, notifications ... for application. After you have selected, click the green tick to start the copy process. When you're done copying, an installation request will appear on the screen from the APK file,

you choose Install to install the app on your phone Now you can freely use two accounts or two apps depending on your needs and still retaining the original interface with the best experience. I wish you success! All questions in the process can be contacted by the free hotline number 1800.6501 - (8H:00-21H:30) to be answered or pressed by the technical department and click like and Fanpage Dcare.vn - Smart Mobile Guarantee Center for support.
