Bought it when I was fifty and now I am 83 years old have allergies and like the filters in it. I have used it on the ceiling, clean indoors and outdoors, made a leaf blower outside with the air outlet, cleaned gutters, cleaned air filters. I use it in my garage. Diana by Hewitt, Texas Verified Reviewer Original review: May 4, 2020I have been using the Electrolux brand for 45 plus years. Mine is a container style with multiple attachments plus the separate attachment for furniture and the separate carpet attachment with its own engine. The wands make it easy to reach high places or to make plinths. I can always count on its performance and durability. It has excellent suction in removing animal hair, large and small particles plus dust. Mine is equipped 2 hepa filters plus an inverted mode to blow. Judy by Knob Noster, MO Verified Reviewer Original review: April 28, 2020Love my vacuum. No pulling around in a heavy portable machine. I have a three-level house, the compounds conveniently located throughout the 4,700 m² house. I even have what's called vacpans at baseboard level as you just kick open with your toe and it sucks dirt and dirt down. Good suction with multi-level power speeds. Marie of Forest Hills, NY Verified Reviewer Original review: April 23, 2020Electrolux has always been a good name. It's a dunking vacuum. The only downside is that it is heavy and a little cumbersome to move around. I like the fact that it has a bag and is not bagless. It was a gift from my daughter. I think if I had bought it by myself, I would have gone for a lighter model. All in all, it picks up everything, including cat hair.J. by Macon, GA Verified Reviewer Original review: December 18, 2019I would avoid Upright's period - just watch out for them, hard to repair; (plastic part break), but understands easy to store, etc. I repaired Electrolux vacuum cleaners for over a year, I have extensive experience in electrical engineering. Had an NCEES log. The weakness of the old style Electrolux Before Arius or whatever (sold door to door) is the electrical connection of the hose - it eventually wears out due to normal use - the snake 30 years ago cost \$40.00 plus. They will eventually I suppose be I bypassed this, set a default standard plug and cord on the power nozzle, and just connected the power nozzle to an extension cord to an outlet not vacuum, recently took the engine apart - a bag was defective, the engine was in excellent condition. The only improvement in engines is they now use rare earth mineral, so they can be smaller, and just as powerful. I won't go into detail about this, look it up, rare earth minerals in magnets, and motors. The cannies and engine are built like a brick outhouse, it will last for decades if one does not vacuum liquids and the engine is dismantled and cleaned if a bag breaks (wet bag). I saw several vacuum cleaners that had the engine replace with a NON OEM engine - basically micky mouse, weight was significantly smaller than the OEM engine, which is still available for about \$100 on eBay or Amazon. Using original maybe OEM Bags, the bags typically at your grocery store only have two layers of filter, one external, one internal, the OEM bag has four interior filters, liners or whatever. Downsize it is very heavy and hard to carry on top and it is complicated to put on attachments. Also uses bags, unlike Dyson, but Dyson doesn't have enough suction. Judy by Marlboro, NJ Verified Reviewer Original review: May 6, 2020I own two of these machines. They have been excellent artists and would highly recommend them. They are reliable and long lasting. The accessories work satisfactorily on stairs and runners. They are a pleasure to own and need very little maintenance. SVETLANA in New York, NY Verified Reviewer Original review: April 29, 2020I is extremely pleased with electrolux vacuum cleaner. This vacuum cleaner is powerful and still very quiet when in use. Would be better if it came with several other attachments, so to be able to vacuum sofas and such. Laura of Ocala, FL Verified Reviewer Original review: April 26, 2020This vac is the best. It gets close to the wall. It is bagless and not as noisy as some. The quality of the parts and prices and well designed for easy use. Wonderful pet hair collection. Easy container to empty and wash. Scherry by Payson, Arizona Verified Reviewer Original review: July 12, 2019 The only negative points are the lifetime of the brush accessory and Velcro on the small brushless attachment. Both wear out quickly. Also, all attachments have a proprietary form, and only those manufactured by Electrolux can be used. Next Great Suction PowerSuperb to remove deeply embedded dirt particlesSuperb to remove pet hair from carpetsExt. Electrolux UltraSilencer Delux EL7066 did particularly well when cleaning bare floors and removing pet hair from carpets. Additionally, it performed well at cleaning embedded-dirt particles from carpets. Perhaps the most notable feature of this container, though, is its incredibly quiet engine. Consumers also had the option to operate vacuum from the handle or use their feet to power the device. Vacuum also has adjustable suction power, which means you can increase or decrease the vac's pull based on the delicacy of the surface cleaned (less suction for sheer curtains, more for heavy padding). electrolux.com. It was also excellent for removing pet hair from plush blankets, and not tip in any direction when the snake was used. Despite its excellent performance, it was a heavy vacuum (definitely not the one to lug up and down the stairs) and had poor suction power when using the hose (not great for cleaning up furniture and inside crevices). But if floors on a level of your home are your biggest concern, it will suit you just fine. electrolux.com Type: Upright Vacuum Manufacturer's Warranty: Limited Two Years Reviewed: September 2010Price When Reviewed: \$299.99 This content is created and maintained by a third party, and imported to this page to help users provide their email addresses.
