Designed for beginners, this quadcopter comes with headless mode and set height technology. It is also equipped with other features such as the following. Back to menu \*No drone is easy the first time, nor is it hard not to try. The Zuzo FX1 drone is designed for beginners and is easy to fly. It has a user-friendly design and features. Headless mode makes it easy for first timers not to worry about which way to fly. You don't need to match the direction of the nose and for the flight in the forward direction. Read the guide carefully before you take off and take off on your first flight. With the app, you will find it easier to fly and especially pilot landing. FX1 comes with powerful blade protection. However, you should be careful with this as this can be a small quadcopter and tress or clash into walls. There are 4 extra knives included in the package for you. back to menu \*Zuzo FX1 is equipped with a 2 MP HD camera for your benefit. Enjoy taking photos and recording videos while your drone flies. Photography isn't the main purpose of the drone, so don't be surprised if the images don't meet your expectations. However, the drone has an HD camera so the experience will be valuable. The negative point of this camera is the noise of the engines during flight. This does not affect pictures but the videos will be noisy. At this price, the drone is a hit among other low-frills drones if you check customer reviews. Back to menu \*The flight time for FX1 is approximately 10 minutes, which comes with a control interval of 100 meters. Charging takes only 60 minutes. A single key rotation helps the drone easily return to its main point. In addition, the height lock allows you to allow the helicopter to fly at a certain height, so that Lost. The 6-axis jiro allows FX1 to fly up, down, forward, back, right and left. It can also do 360° somersrs. The main thing on this drone are the integrated LED lights. Help this helicopter fly in the dark and enjoy the views at night. \*With stunning features back on the menu and good flight time for as low as \$40, Zuzo FX1 is the right choice drone for everyone at beginner level. It can also be used by professionals for the application. Customers are ratinged as one of the best quadcopters and we can't have any misthinking like that. If you have this drone, write your opinion in a comment box. CAUTION: The recommended age is 14+, the package contains small parts, so be careful if you have children under 3 years of age. This model does not require FAA registration. 8.5 Total Points ZuZo can fly out of the box immediately, with very little drift (not enough to need to adjust). Like most quadcopters, running lights are not easy to see in bright sunlight. For novices, we recommend starting out in headless mode, which flies in the direction of pushing the quadcopter control bar. The flight time of 8-10 minutes actually seems to be 20 minutes. Remember that there is a tool to play as it is fun. It can't stay on your shelf; You have to fly it. There are times when a user manual list comes in handy. If you are a novice pilot or an experienced one who has purchased a new drone, you need to know how to assemble it. Handy drone guides on this page will show you how to fit propellers, engines and air cameras. Calibrating a transmitter and synchronizing it with your drone is frustrating. Incorrect calibration may cause your drone to de-route. In some cases, your drone will remain in the ground. These drone instructions show you how to configure your device. You may have had the drone for a while but you may still need instructions on how to use it. It needs an update. You can do it with a drone guide that teaches you how to update your firmware. The Quadcopter user guide can rely on drone guides to help you, whether you want to pilot the DJI Phantom 4 or parrot bebop. Our site offers first-class, precise drone instructions. The guides here come from the manufacturers themselves. These guides are easy to access. All you have to do is go to the drone, click on the link and download the drone manual. Soon he'll fly your device like a trained pilot.
