There are also other ideas for learning about the theme of plants and gardens. It's a great time of year to start studying plant life. I like that the study of plants and nature naturally lends itself to so many practical learning opportunities. As a At these hands-on activities, I have a free seven-page learning package all about plants and gardens. This package of factory worksheets has pages in it that are perfect for children from kindergarten to second grade. Not all pages are suitable for all these ages. However, since the package is free, you won't feel guilty if you don't use each page. Bonus! You may find that some of the pages are also good for students over Grade 2. Again - since it's free - you could grab the package just for those few pages. Free Plant Worksheets for Kindergarten - Grade 2 The free gardening plant and print package contains one page of terms of use and seven pages of various activities for children. Garden Treasure Hunt This page has ten things that can be searched in a garden or elsewhere outside. They might not all be found in an outdoor trip. However, you could either make it a run with several kids to find the most or you could make it a treasure hunt going on over several days until all the items are found. Plant Observation Journal Page This page can be printed several times and compiled in its own journal, if desired. The plant observation log page has two points for a plant observation log entry that includes areas for: the date of the height of the plant observes an open box to draw the plant or to write more observations or data Label parts of a plant This page has a simple plant drawing with four spots that need to be labeled. There is a box of words below with these labels - roots, flowers, stem, leaf. This page is, of course, more suitable for young students in the age group. Simple Plant Life Cycle Cut and Paste This plant lifecycle page contains four boxes as well as four photos of a plant seed plant. Students will cut out the photos and put them in the appropriate boxes to show the order of the plant's cycle. What do plants need? Page This is another simple page with four photos showing the things that plants need to grow. Students will use the word bank to tag each photo. Gardening A to Z This page might be more difficult for young students, so you may want to jump or work on it as a group. Students will try to find an item that is related to the garden or plant that starts with each letter of the alphabet. Plants and Gardening Word Search Students will look for the following words in a search for Sunwater floor air flower leaves roots roots garden roots Seeds use for plants and gardening Learning Package This download is free for personal, classroom, and great group use. This set cannot be sold, published or hosted on other websites. (Example: a person or other blogger cannot upload the file to their website for others to download.) There are additional terms of use on the first page of the download and you can read them here too. Using the means you agree to the terms. Thank you! Download the Free Plant Worksheets for Kindergarten - Grade 2 Learning Package In order to receive the plants and gardening worksheet package, you need to subscribe to our weekly newsletter, which offers lots of free printables, learning activities, ideas to celebrate holidays with kids, and more. You can unsubscribe from the list at any time (even just after you get the package, if you wish). Simply fill in your first name and email address in the box below to receive it by email. If you already subscribe to an email, simply fill in the email address you already use on our list. Don't worry - you won't start getting emails twice. Found the worksheet you're looking for? To download/print, click on the pop-up icon or print icon to print or download. The spreadsheet opens in a new window. You can download or print using the browser document reader options. With her jaunty dissection of the sex life and private grooming habits of the 18-year-old novelist, Helen Memel, Charlotte Roche has turned the previously unspeakable into the national conversation in Germany.Since its debut in February, the novel (Feuchtgebiete, in German) has sold more than a million copies, and is the largest selling book on Amazon worldwide. The book is a dash head down through each crevasse and by-product, physical and psychological, of the body and mind of its narrator. It is hard to overstate the raunchy of the novel. Wetlands open in a hospital room after an intimate shaving accident. It gives a detailed topography of Helen's hemorrhoids, continues in the subject of intercourse and only gets momentum from there, finally reaching the pits of avocados as objects of female sexual satisfaction and - here's where the debate comes into play - just maybe empowering women. It is clear that the novel has struck a nerve, catching a wave of popular interest in renewing the debate about women's roles and image in society.190 pages printed pages
