Unknown perico android model An android designed to simulate the appearance and behaviors of a bird (paraic). Page 2 Name Sixty (I went for Connor before) Model RK800 Serial Number 313 248 317-60 Gender Male Species Android Appearance (Physics) From the beginning, appears just like your model 51, Connor; with slippery back hairstyle and brown hair and eyes. When he became a deviant, he changed his appearance to become less like Connor with curly hairstyle and fewer moles on his face. It still had the shape of Connor and Nines' face, but it was simple to distinguish the difference. Appearance (Clothing) Sixty wore the usual uniform jacket of the output similar to Connor. Later, she dresses up in winter sweatshirts, pants and boots. Sometimes he wears glasses. Personality As a machine, he was a cold and ruthless hunter as Connor should be. He only cared about nothing but his mission and did everything he could to achieve his goal. Even if it means taking away your human life. However, he was persuaded for his evil doing by threatening leader Kempery to give him the information while holding Connor hostage. When he became a deviant, he sympathizes with his wrongdoings, needing the guidance of his brothers, and a little protective towards those he cares for. He likes Sixty likes his new family as it brings him acceptance and a smile on his face. Appreciate its new appearance because it makes it look different from the other models with which it is associated. (WIP) She doesn't like to mention the fact that she's another Connor model. It's more original than a replacement for his brother. He doesn't like to mention stories about Cyberlife, as it makes it uncomfortable to talk about him. (WIP) or machine Starts the machine, but later it will become Deviant Crush Brielle (RT600) Cyberlife Enemies at the moment Weapons Any weapon will do for it. He. Connor (RK800)-Brother, Nines (RK900)-Brother, Bradie (JW300)-Friend, Markus (RK200)-Friend, Hank Anderson-Friend Previously, is a model for a replacement if the prosecutor ends up being destroyed. His memory recalls seeing the android RK900 being released into the world and took action in achieving his own mission; he even learned that model 51 had lost connection to Cyberlife. It was at this point that he was going to do things in his own hands. Finding the location in Toronto was not a difficult task, but getting there was. When he got there, he took Connor hostage and threatened the leader and the 51 love the interest in information and the chip. Listen to what they had to say realizing their wrongdoing and left their program to become a deviant. He took Sixty's name to himself as his twin as a brother would call him that and join him and the other humans and deviants to stop the threat in question. After the events of history, Sixty is still learning what it means and how to be human. But he's not alone. He's got a guide. Images by Quantic Dream/David Cage and Bryan Dechart.
