Our mission We, at Midwest Pediatric Dentistry, enjoy creating a comfortable and fun dental home that will lead to a lifetime of health and happiness. When a child enters our office, expectations and experience are met to each child as an individual. It is our mission as a pediatric dentist to provide the best treatment available in a comfortable and caring environment. Your child deserves the best, and we know we can give it to your family. Why a Pediatric Dentist When a child goes to the doctor, they see a pediatrician. When your child goes to the dentist, they can see a specialist as well. A pediatric dentist is a dentist who specializes in treating children through adolescence. A pediatric dentist receives two or more years of advanced, specialized training after earning his DDS/DMD degree in dental school. A pediatric dentist focuses on pediatric and adolescent growth and development, disease and prevention, child psychology and management, and all aspects of the highly specialized pediatric restorative techniques. Pediatric dentists emphasize the establishment of trust and confidence in children with their dentists. They also specialize in the care of special needs patients. This includes children with medical complexities as well as children with sensory integrative sensitivity. To book a pediatric dentist appointment, please contact us. Your Pediatric Dentist in St. Louis, Mo Our Pediatric Dentists maintain a high standard of excellence for their practice and the care given to each child. They are committed to continuing education, and as members of the American Academy of Pediatric Dentistry and the American Dental Association, they stay up to date with the latest technology. See our doctors! To book a pediatric dentist appointment, contact us today! Our staff looks forward to working with you to provide you with the pediatric dental care that your child needs. Whether you are new to the St. Louis area or simply looking for a new dentist, we at St. Louis Pediatric Dentistry would like to welcome your kids to an amazing dental experience! St. Louis Pediatric Dentistry has a fun, positive, and engaging approach to ensuring an excellent dental experience for your child or teenager! Our offices are designed to make every visit enjoyable, equipped with the TV in the rooms, tablets, Treasure Towers, and much more! Our doctors have an age appropriate and child-oriented style, which allows them to get to know each child personally and communicate with parents and children to create a lifetime of healthy smiles. Welcome to a child love office, where every patient, regardless of age, is treated with the latest advances in dental technology! YOUR CHILD'S FIRST DENTAL VISITDental Care early is important. American Academy of Pediatric Dentistry recommends your child child their first visit on their first birthday. By the time they have multiple teeth, we can start monitoring their dental health and help them get used to the dental office, making it fun and easy for them to get the continued care they will need to thrive and have a happy, healthy smile for a lifetime! WHAT TO EXPECT On your child's first visit, we will move at their pace to help them become confident and familiar with our team as well as the sights and sounds of the dentist's office. We will perform a degree and ensure that their first teeth are healthy and progress normally, followed by a prescribed professional fluoride treatment. As long as your child is comfortable we will start introducing to other exciting things too! At St. Louis Pediatric Dentistry, we have an open door policy, and encourage parents to accompany their child at every visit. To avoid confusion for your child and ensure a positive experience, we only ask that parents be part of the appointment as silent followers. We will make your child's first visit fun and interactive by encouraging curiosity, providing entertainment like TV, tablets and toys to make their meetings something they look forward to. CONTINUED CARE AS YOUR CHILD GROWSFor every visit, we will continue to monitor your child's growth and development. We will check that their teeth are healthy and eruption as expected. In addition, we will keep an eye on common conditions such as decay (cavities), gum disease and bite adaptation. As your child becomes more confident, we will introduce cleanings and prescribed X-rays when needed. Eventually we can recommend other preventive measures, such as sealant too! Since each child is different, we will make the recommendations that will meet the needs of your child. We maintain a focus on prevention and treating decay if necessary, before it has a chance to aggravate and potentially cause pain or even tooth loss. Welcome to our St. Louis Pediatric Dental Office! Our entire team looks forward to meeting you and helping your kids have the healthy and comfortable smiles they deserve. Cinema's coming soon. O'FallonDes PeresChesterfieldLadueDr. Lindsey Reed, one Diplomate of the American Board of Pediatric Dentistry is originally from Atchison, KS.
