UV Protection Lens 400 blocks UVA Rays & UVB is harmful, improving visual comfort by protecting the eyes from Ultraviolet Radiation (wavelengths up to 400 nm) Durable Acetate frames made by cutting, forming, and polishing multiple plastic sheets that give it strength even as plastic and make it ideally used for modern eye wear frames Rich Design keeps classic things Tr uly proves to be defined as fashionable and stylish. Meet Practicality Functionality: Available in 3 different lens types - Tinted, Mirrored, and Photochromic (Light-Adaptive) Lenses to meet your daily fashion needs. Product Dimension Product Display EDITH All Black - Limited Edition Imagine what if Tony made Rhodey a pair of Edith in Full Black? Special Edition - Mirror Reflective Lenses If you are sensitive to light, mirror sunglasses are very effective for blocking and reflecting sunlight. The advanced coating makes it more durable and scratch resistant compared to untreated lenses. Special Edition - Photochromic Lens / Transition Darkens sun exposure and protects your eyes from harmful ultraviolet (UV) radiation. Now you can stay shady and stylish anywhere, anytime. Transition lenses begin to darken when they are exposed to UV light. The greater the intensity of UV radiation, the darker the lens. When UV rays no longer exist, the lens begins to fade back. Transparent & Dark Transparent & Light Blue Due to COVID-19, the movement of people and international goods is severely affected as countries implement additional border controls and restrictions. Share Tony Stark †Nick FuryTalosPeter ParkerQuentin Beck † Peter ParkerQuentin Beck † Spider-Man: Far From Home I am E.D.I.T.H. Tony Stark's augmented reality security and defense system. So he made you for me? Wakakak But you have access to all tony protocols. —E.D.I.T.H. and Peter Parker[src] Even Dead, I'm The Hero (E.D.I.T.H.) are augmented reality artificial security, defense, and tactical intelligence systems created by Tony Stark and bequeathed to Peter Parker following Stark's death. Wearing sunglasses, the E.D.I.T.H. gives its users access to Stark Industries' global satellite network along with an arsenal of missiles and drones. The history made by Tony Stark E.D.I.T.H. stands for Even Dead, I'm The Hero. Tony likes the acronym. —E.D.I.T.H. to Peter Parker[src] E.D.I.T.H. is an AI created by Tony Stark that is given the nature of security, defense, and tactical intelligence, capable of accessing Stark Industries' global satellite network and hacking almost any computerized device. Believing that the Avengers will succeed in reversing Snap, Stark arranged for the E.D.I.T.H., which he uploaded in a pair of his glasses, to be given to Nick Fury if he died, intending for Fury to hand it over to Peter Parker, whom he had programmed to be the only authorized user of the E.D.I.T.H.[1] Used by Peter Parker Peter Parker to use E.D.I.T.H. After Tony Stark's death, E.D.I.T.H was given to Nick Fury to hand over to Peter Parker. However, Fury outsourced the task to Talos, a Skrull he had asked to impersonate. Talos sent the glasses to Parker eight months after Stark's death while trying to recruit him to help fight the Elementals. At first, Parker was passionate about aspects entrusted with such power. However, after accidentally starting a drone strike against classmate Brad Davis, he began to feel that he did not deserve this power and then bequeathed it to Quentin Beck, believing Beck deserved to be The next iron. Parker would eventually reclaim the glasses from Beck after the Battle of London. [1] Used by Quentin Beck Once Beck had control of the E.D.I.T.H., he sent it into his system and through him, obtained from stark industries defense satellites. Through this, Beck now has access to Stark Industries Combat Drones that are caged in them, greatly strengthening his scale and illusion capabilities. He also took advantage of the E.D.I.T.H.'s hacking capabilities, using it to discover that Peter Parker and Michelle Jones had his projector missing, which led him to eventually deceive and defeat Parker with his illusions. Beck took advantage of the increasing number of his drones to create the Elemental Fusion, destroying much of London. Beck uses the E.D.I.T.H. to steer his drone to try to kill Happy Hogan and parker's other classmates through a screen on his wrist. When Parker finally confronted Beck, Beck ordered the E.D.I.T.H. to fire all the drones, with him protesting that he was in the firing line. Finally, after defeating mysterio's illusion, Parker picks up the glasses and is welcomed back by the E.D.I.T.H. He orders all drones to be turned off, and possibly back to the satellite. This will later be used against Parker by Beck's team when revealing Parker's identity. Parker then takes the glasses back to New York, perhaps continuing to exploit them in his fight against evil. [1] Capabilities E.D.I.T.H. is the user interface to the entire Stark Industries network. It allows users full access to the entire Stark satellite network, which is equipped with several hundred tactical drones. The E.D.I.T.H. also provides backdoor access to many of the world's largest telecommunications companies that give users access to all of the target's personal information and potential hacking capabilities to a large number of communications systems. Description Review Additional information (9) Like Jarvis and Friday, the AI in Tony sunglasses has the nickname: EDITH, or Even Dead, I'm the Hero. EDITH controls weapons systems connected to satellites that hold drones. Our 'Edith' frame is designed to pay homage to the legend! Silver/Blue glasses contain 400 UV protection lenses to protect your eyes from harmful ultraviolet radiation from the sun. Sunglasses are made of high quality and sturdy materials with high quality alloys and fine hinges for durability. Anti-reflective lenses and Non-polarized Lens Width: 56mm Lens Height: The 43mm frame is designed to be very light UNISEX glasses that one size fits all, look great on whatever face I want to take a quick review of Tony Stark's sunglasses, also know are Iron man sunglasses or (Iron Man-Avengers)-Edith Sunglasses. Tony Stark's spectacles in Avengers, Iron 3, infinity war, endgame, away from home, Marvel replica glasses Tony Stark is the best stylish Sunglasses. PriceCheck Pricel checks should admit they're pretty cool cool are two different versions, one is more of a shade color for it a little darker as well as the other they have is actually closer to what you see than a spider man away from a more bluish house. So I like to get that purple because I really want to act and use it as actual sunglasses. when I Drive and I go out and I like purple sunglasses as a whole and I definitely really like this. So their quick reviews fit pretty well what you guys think isn't bad. I know some dishes some people complain it's too big or too wide overall. I thought, but that's good enough you know. (Here are the best colors, tony stark sunglasses or iron man sunglasses or Marvel sunglasses.) Check out pricetony stark sunglasses! have aviators if you used to e-meter you are a little big too but I think it looks pretty good overall and I'm pretty happy how it looks you can look. Tony Stark sunglasses do have more shade on it you can some pictures of it later on the internet as well. It really looks amazing on a sunny day and you will definitely love it. And you'll know everything is purple but overall it really boils down to your own preferences but I think if you get one or two of these blue ones you'd be very happy just to have them in your collection. You know they look really good overall. Check the PriceWhen you buy Tony Stark glasses. It comes in a box and I know how to say the glasses themselves come in a small bag like this and you also get a cleaning lens cloth there in the bag for your sunglasses which is pretty good now these sunglasses are only 13 to 20 dollars depending on the brand or company you buy. But they're pretty good you know I have a lot of different aviator sunglasses ray-bans you pay for what you get sometimes but I like them this is pretty good material-wise So yes I like this. You can get it with a frame here of plastic so it's quite understandable what you get for what you pay for. And it looks very durable. I was quite impressed with it and I like the quality very good. Myself, I love Iron man sunglasses and I'm sure many of you would love to get them. You know you might be a little slanted in the ear so I've been on this side but it fits fine I'm pretty happy with that. Iron man sunglasses Physical look and MaterialIt looks pretty good but when you put it straight it's not really flat But that's fine. One thing I want to point out is that the nose pieces are not actually rubber or like silicone pieces that are normal enough to have their actual plastic pure. They have a nice design for it but I'm surprised by it because sometimes you know, at least I sometimes tend to get oily faces all day I'll be afraid that you know it's plastic so it might tend to slide on my nose Little. So far I don't have that problem as it's pretty tight at least so they stay pretty good in place. There's nothing too crazy that interferes with the need I need to keep fixing it or something like that but if it becomes a problem, in the long run, I'll replace it well so I can drive with it and I think it would be a good opportunity to show off my sunglasses. Check out PriceTony Stark sunglasses-Price Check On AamazonWhen I actually use them and as I said before I'm happy that these are a little darker than art and movies per se because they really work as real sunglasses and I can actually use them when walking around me driving and they work well. I think in the film they're a little lighter than Tony Stark wears a little bit of color but it's not like this that Peter Parker has like blue so he changes it a little bit but it's almost purple and they look good I think they work well. I think it's all that matters my wife sees me wearing it as she says I look a bit cocky looking they look nice but it looks a bit arrogant but it's a look I do of course, so I don't mind that so we'll see how they fared throughout the day and I think they'll be pretty good overall. I mean these are prop glasses you know they don't mean there are still sunglasses but they're not that expensive so I don't know what to think when I first get them but hey if they block the Sun they look good enough that's what matters. Tony Stark sunglasses 2020- Check Pricel quite happy with this I know this is not entirely accurate screen I know one that Tony Stark has a little more transparent look but they are not really sunglasses although it is actually really good sunglasses for such a sunny day and things like that. So I understand why they make this they make this a little more colorful but I'm happy to do it because as I said the function actually has actual sunglasses so they're pretty good they come up with a lot of different versions they have this which is a silver frame they have a gold one. Tony StarkCheck Price sunglassesif you watch all the Marvel movies Tony Stark has so many different sunglasses literally they are not the same I actually saw through a bunch of movies trying to get some screenshots and things like that literally every movie and even some to have a different scene. He wears new sunglasses all the time Rigby changes smoothly but they are all different so it will be hard to determine exactly where this comes from, to be honest, but I like him they are pretty good as I said before you can still also get the more blue one into the look that Peter Parker has. I think he will happy of them too so it's about that guys are pretty cool 13 for 20 bucks I'm pretty happy and it's about it guys thanks for reading. Long story short I really like Iron man 3 sunglasses to try it out. Try.
