Most levels have answers that do not concern any specific topic, except for level 6 cities of the world and level 11 famous people. For each puzzle, you are asked to look at some images and try to guess the word they represent. At first you are given a single image and some blanks and letters to insert into the blanks to create the answer. If you can't figure out the word from that single photo, you have the option to reveal 1 or more of the remaining 3 photos to give you additional suggestions. If you leave some hidden photos you will get extra coins. Speaking of coins, you start the game with some and you can earn more while playing. But if you run out of coins you can buy some by tapping the coin icon at the top. Coins are useful for buying suggestions: if after seeing all 4 images you still can't guess the right word, simply tap the question mark in the center of the screen to see the HELP menu. You will be given the option to remove extra letters for 150 coins, reveal a letter for 100 coins or skip the word for free if you wish. With the latter option, you can never get stuck in this game, which makes it much less frustrating than some of the other type 4 photo 1 word games.
