Laticrete 9235 pdf

Features & Benefits equipped with antimicrobial technology - Inhibit the growth of stainless bacteria on the waterproofing membrane. Safe - No solvents and non-flammable. Inside and outdoor use. Vertical and horizontal surfaces (including ceilings). Thin - only 0.02 (0.5 mm) thick when cured. Anti-fracture protection of up to 1/8 (3 mm) over shrinkage and other non-structural cracks. Extra heavy duty rating per TCNA performance levels (RE: ASTM C627 Robinson Floor Test). IAPMO and ICC Approval. Apply quickly with a paint brush or roller - no special mixing or application equipment required. Quick healing-usually ready in hours for finishes. Install tile brick and stone directly on membrane. UL GREENGUARD GOLD CERTIFIED. Easy cleanup- use only water while fresh. Protect concrete & reinforcement of steel from corrosion. Learn the right way to use a wet movie gauge when installing liquid waterproofing membranes. 5 out of 5 based on 3 customer ratings (3 customer reviews) TILE PRO RATING: GoodBetterBest Laticrete 9235 waterproofing membrane provides ultimate water proofing protection for your most demanding continuous immersion tile installations! Have no fear of doing pools, fountains and health club showers! Laticrete 9235 waterproofing membrane kit backed by LATICRETE Lifetime System Guarantee. Known as the Industry Standard, Laticrete 9235 waterproofing membrane is specifically formulated permanent waterproofing and anti-fracture protection in wet areas such as in pools, showers and spa and other ongoing water immersion applications. Laticrete 9235 waterproofing membrane is suitable for tile, stone and glass mosaic installations and will bind to a wide variety of substrates. Laticrete 9235 waterproofing membrane e consists of two components: a reinforcing substance and a liquid, self-healing rubber polymer that will heal in just hours and is easily applied with brush or a paint roller forming a seamless, flexible waterproofing membrane. Laticrete 9235 WATERPROOFING MEMBRANE is accepted for shower pan applications by ICC and IAPMO; complies with ANSI A118.12 and ANSI A118.10: comply with all VOC requirements; and is non-dangerous. There are certain parts of any house that are usually moist or wet for most of the day. Think of the bathrooms, toilets, laundry and the areas around the pools. There are a few things construction and design teams do this that it does not affect the rest of the house. For example, the design is made so that these wet areas do not open residential areas or other public areas of the house. Some areas that see very sunny home designs with such areas towards getting more sun. Smart designs also in adequate range of ventilation in the house without compromise on privacy. It that the wet areas of the house are not too moist or too hot. But apart This design moves, the construction of such areas itself should be done in such a way that the structure is waterproof made to the maximum extent possible. It not only protects the dust from the building, but also prevents the forgoing of water from the wet areas to the other rooms. Apart from the waterproofing properties of the building materials, another thing to be taken care of is the slope the rooms that have wet areas. This will prevent the collection of water in small pools, which can lead to soapage to other parts of water. Accumulated pools of water are also a major security hazard, especially for homes that have the elderly, babies or children. Laticrete 9235 provides both waterproofing and crack insulation protection in a single product. It has in-plane movement up to an eighth of an inch. It provides corrosion protection to both the promotion of steel as well as concrete. It is certified by Greenguard as safe for children and schools. It can both be applied to outside surfaces and within surfaces. Apart from ease of use and application, the Laticrete 9235 waterproofing membrane application can also be easily cleaned. You don't have to worry about the level of the surface changing too much compared to the surrounding areas. The total thickness is about 0.02 when cured. I also contain the own Microban antimicrobial protection. It keeps it safe from shape and shields. Finally, your installation is protected by the Laticrete Lifetime System Guarantee. Shipping & Delivery Times Waterproofing and Crack Insulation Protection of one product (in-plane horizontal movement up to 1/8) Laticrete 9235 waterproofing membrane is ideal for continuous immersion applications as in swimming pools, showers and spas Laticrete 9235 protect concrete & promoting steel from corrosion Safe - no solvents and non-flammable; Certified Children and Schools by GREENGUARD Laticrete 9235 for indoor and outdoor use; Vertical and horizontal surfaces (including ceilings) Laticrete 9235 apply quickly with paint brush or roller-gene special mixing or application equipment needed Quick cure-usually ready in hours for finishes Easy cleanup-only use water while fresh Thin-only 0.02 (0.5 mm) thick when curing Microban® antimicrobial protection of shape and milk protection.
