Any mistake in this manual, or any damage associated with it or any alcohol cabinet supply, performance or after use. ' Information in this document is subject to modification without advance notice. Wasting old equipment is potentially dangerous to children. Before removing your old wine cabinet: . . . remove the door. Leave the shelf so that the children cannot easily get in. ' Don't allow children to work, play with it or climb inside the devices. 1 To ensure that the instructions for the installation before changing the wine cabinet are perfectly level. This will reduce any company. Your cabinet is equipped with 4 seditfeet feet. However, we recommend that you make the back foot more and more rigid and then use the front foot at the cabinet level. Important: The wine cabinet wait edited for 12 hours before standing the Vatican and switching on it for the first time. Safety Instructions : Heat up a fan through the empty rented down ' It should be well-planted by any heat source. . It should not be kept directly in sunlight. ' It should not be in a place (laundry, pantry, bathroom, etc.) . . . it must be perfectly level. ' It must be a proper installed and reliable power supply to be properly fitted. ' Use of a multi-skat or extension lead is not recommended. ' This wine cabinet must be amust to provide protection in the form of an electric circuit. ' It is installed with a electrical bone ending the ground wire in a 13amp plug. ' Consult an educated elector or service engineer if grounding instructions are not fully understood. Warning: Incorrect grounding can result in the risk of electrical shock. 2 Operating instructions should be placed in the wine cabinet where the temperature is between 5-35 degrees Celsius (41-95 degrees Fahrenheit). If the temperature is at or below that limit, the unit's performance may be affected. For example, in extreme cold or hot conditions your unit can cause the internal temperature to rise and the 5-18 o C (41-65 degrees Fahrenheit) range. * * * * * جلائش اشارے روشنی الومانی کی نشاندہی کرتا کہ لٹا کولنگ موڈ اس وقت آپریشن میں * * * * * Light/band to control the inner light. Power off/off to control this device. (Press and hold this button for 3 seconds); The upper set button to set the temperature of the upper chamber. Reduce buttons to set the temperature of the lower chamber. Displays the temperature of the upper chamber. Lower lower chamber shows temperature. 1. Every colling basket of wine cooler (upper & lower) is controlled independently. 2. To set the temperature: Attach the electrical bone properly to the ground shop. In case of power interruption, all previous temperature settings will automatically be eliminated and each basket will be set to pre-set temperature setting: for the upper basket for 6oc and 12oc for the lower basket. 3. Set the required freezing temperature by pressing the button near the top set/set low program. Each drop of the button will be able to scurry through the available temperature settings (for each basket) in a 1 degree increase. The selected temperature will flash in the LED display for about 5 seconds, then the interior cabinet will return to show the temperature of 4. Upper basket: Temperature setting can be adjusted from 5 a.m. to 10 a.m. to 5. Low basket: The temperature setting can be adjusted from 10 a.m. to 18 a.m. Press the set temperature (at any time) and hold the same button for about 5 seconds, the set temperature will temporarily flash in the LED display for 5 seconds. 3 7. Brightness LED : Set 8. Stable LED : Cabinet temperature 9. This unit has the option to display the temperature in the celcis or the fernet. To change the configuration, press both buttons and hold (set up/down) for about 5 seconds, as well as a quick (bep) sound and a blue pilot light adjacent to the C or F mode al-Omanati. Note: To temporarily disconnect (stopping) the cycling cycle, you must disconnect the electrical bone from the power store. Note: There is no off position on the electronic control panel. When the door is partially open to prevent long-term colling (operation), the door is partially open to avoid the crack/chipa from staying inside the door. Note: Always wait 4 minutes before the unit resumes if the operation is interrupted. To fit the shelf installation or remove the shelf, tilt the shelf according to the diagram and just pull out, or push the shelf until it safely sits on the support bracket. We recommend that someone help you during the process. Required tools: Philips Scrio Drawer. (A lower left hand capture is provided with each cabinet.) 4 picture. B. B. Picture. D picture. E • اوپر قبضہ • بابان پر قبضہ (دائیں) • دروازہ • اوپر قبضہ • (بائیں). Please capture the bottom (right) . . . remove the assembly too. (Picture. A & Number B) Remove the 3 scroofa of the right upper capture, then remove the right upper . (see picture.) Use the patch you removed from the right side of the left top & bottom s . . . (see picture. D&Picture. E) Rotate the door at 180 degrees then collect the wine cabinet in its last position when the fitting swatches are installed according to the route, stainless steel checkpoint should be installed. Remove the protective tape from the stripe that is sticking to the back of the post and then place the wine in a position at the bottom of the folding cabinet. The flow of air through the grill should not be affected at any time. Failure to act on this will be denied guarantee. 5-Your wine cabinet is designed with an autocycle defrost system. When the run cycle stops, the fridge level of the wine cabinet (the interior rear wall) automatically. Defrost water is located behind the wine cabinet in a drain pan next to the compreser from its powder. The recovery system of the sand is equipped with a system to maintain the correct level of alcohol. If the amount of salt is too low, insert small plastic deposits on the top shelf. Fill these deposits on 3/4 full of water. ' Wash the shelf with a light-dittsolution solution. ' Control panels, or any electrical parts when cleaning the excess water out of the sphinx or cloth. ' Wash out the cabinet with hot water and light liquid ditter. Clean the dry with well-split and clean soft cloth. Power failure : Maximum power failures are corrected within a few hours and your device's temperature should not affect if you have a decrease in the number of times the door is opened. If the power will be exhausted for a long time, you need to take action to protect the material. Holiday time : Short holidays: Leave the wine cabinet work during the vacation of less than three weeks. ' Long holidays: If the wine cabinet will not be used for several months, remove and disconnect all items. Clean and dry the interior well. To prevent the growth of smell and snoring, leave the door a little open (if necessary to open it). Move your wine cabinet . . . remove all bottles. ' Safely tap all the shelves inside the cabinet. ' Change the sedest legs based on to avoid damage. . Tap the door lock. ' Make sure the device stays safe and direct during transportation. Also protect outside the wine cabinet. (for example with a blanket). Energy saving tips : Wine cabinet should be located in the best area of a room, away from heat-producing appliances, and directly out of sunlight. 6 Trouble Shooting Guide You Can Easily Solve Many Common Wine Cabinet Problems, Saving You a Potential Service Call Cost.
