Read more Photo: Troy-Bilt FLEX SystemNext spring a shipyard care system will revolutionize the way homeowners stock their sheds. We are used to the fact that the lawnmower, leaf blower, snow blower and pressure sink are all separate machines, but the FLEX line from Troy-Bilt unites them all in a single, first-standing outdoor tool. At its heart, FLEX is a single engine designed to power a suite of attachments, each designed for a specific purpose. Choose only the attachments you want on top of the ones you don't need. In addition to the four that currently make up the FLEX list, the company plans to develop the following in 2015 and 2016: - Power broom - Log splitter - Water pump - Chipper/shredder - Generator - Aerator – Dethatcher – BrushcutterEach accessories will be sold separately, in a la carte way. The only component all customers need to buy is the power base. From there, it's a matter of need. If you live in a warmer part of the country, the attachments you choose are very likely to be different from those chosen by a homeowner in Northeast.FLEX System Lawnmower and Leaf Blower unitsThe real advantage of FLEX is how it frees you from having to store a swarm of single-function outdoor tools, each with its own bulky engine. According to Troy-Bilt, the FLEX line takes up to 60% less storage space than a traditional collection of the same equipment. Plus, there is only one engine to maintain. FLEX System Snow Thrower and Pressure Washer units When FLEX hits stores in March, the power base is expected to retail for \$399, with a four-year limited warranty. Attachments will range from \$279 to \$499, each covered in two years. It may seem like a long time to wait, but we've waited so long to fit the car in the garage again, we can probably hold off a little longer. How do I know I can trust these reviews about Troy-Bilt? Nothappy by Desoto, TX Verified Reviewer Original review: September 6, 2020I bought Troy Built 42 riding lawnmower/garden tractor in 2018. It cuts well, has lasted up to almost 3 seasons so far, and with the exception of having to buy a new battery after season 1 it has done what I expected it to do. This is only used for the front yard because I bush hog most of the rest of the 10 acres we own. Good: It cuts well if the grass is not terribly long. Starts straight up. Has very good safety features. The price was phenomenal. Not so great: I realize it's a yard tractor, but if the turf tires even see a small

drop of water, it will get stuck. The fuel tank should be twice the size of the current one, so you can finish a decent sice yard on a tank. The engine probably needs an extra horse or two. And finally, some of the security features really need to be reconsidered, ie, why can't you cut into reverse? Read the full review Frances of Columbia, SC Verified Reviewer Original review: September 4, 2020I am a woman and never had a riding lawnmower, but as I get older because of the size of my yard, I knew I needed help. I was a little scared at first but it wasn't bad at all and easy to handle. Very grateful I made the choice for purchase. Don of Milwaukee, WI Verified Reviewer Original review: September 1, 2020I ride this twice a week on my lawn and then my elderly neighbors. Perfect cut every time, with an excellent turradius. Pros: crank set all the way up, easy to drop the tire while under power, light on the gas to brake & respond to a heavy throttle when needed. Stores with ease and can add a battery bid with a pigtail to plug & play in the winter months. Wheels perfect size. Cutting grass! Priced right for its use. Cons: Not a mulcher, tires should be on a 4 in the summer months. Never throw the tire to #1. Not hydraulic and must be in forward gear when you drop the tyre or it will stall in reverse. Doesn't have a hitch or a plow plug. Dave by Kennesaw, Georgia Verified Reviewer Original review: August 31, 2020Troy Bilt is a well planned well-built lawnmower. This mower is hard and reliable. Every time I come out on my lawnmower and cut my grass, that's something you want to look forward to. It's easy to Craig and for two years now I've never had to do anything but change the oil, put some air in the tires and let her go! Benjamin by Berea, KY Verified Reviewer Original review: August 30, 2020I as my Troy-Bilt because it's built stronger than cheaper Especially the front components used to turn the wheels. It starts up easily and has a plug that makes switching the oil faster and easier. There are still some aspects they could improve though. The seat springs are too firm for people and the button used to hold the blade around when you go in reverse sometimes turns off by itself. Robert of Virginia Beach, VA Verified Reviewer Verified Buyer Original review: October 28, 2020I Owned a Troy-Bilt Bronco (2005) model. Used it for 15 years. For all these years it works very well. Now, it was time for another so I bought a 2019 Troy-Bilt Bronco. After a year, I need some great work. Trying to secure an authorized service center is a royal pain in the ass. Apparently no one knows how to solve these things. As a result of this will be my last Troy-Bilt something. So check your service center location before you buy a Troy-Bilt Machine of any kind. Jessica of Charter Oak, IA Verified Reviewer Original review: September 8, 2020I've had this Troy-Bilt riding lawnmower for just over a year. In spring before mowing season. I took the mower in to get the maintenance, oil changed, wings sharpened etc. Took it into the store that maintenance it in the spring. Troy-Bilt refuses to pay their guarantee. I would recommend this company. Russell of Moneat, VA Verified Reviewer Original review: September 5, 2020It's an OK lawnmower for the price... Cheaply made but pretty durable... Optional items like baggers are overpriced without a reduced price when purchased with lawnmower. As mentioned, the price makes them popular with homeowners not wanting to make a major investment in lawn care. Jackie of Hobbs, NM Verified Reviewer Original review: September 3, 2020I can use my zero radius to cut my space and I keep the 2 lots next to me clipped just for slow down appeal. They're available. It would be a two day job without my lawnmower. I can do it and be done in half a day. I wouldn't go for my machine. William by Seekonk, MA Verified Reviewer Original review: September 2, 2020The model I'm reviewing is Pony. My basic needs are met with the mower. It has fairly comfortable seating and the controls are easily within easy reach. Not as quiet as other lawnmowers. Next Day's best Troy-Bilt TB516 EC and offers Troy-Bilt TB516 EC is a good edge with three wheels, two in the back for stability and ease of use, and a third in front that serves as an curb wheel. The handle of this lawn edge can be folded, making it easier to store away, and this machine is also quite light compared to others we tested. This means you should be able to use the Troy-Bilt lawn edger with ease and create a crisp edge to your lawn. Troy-Bilt TB516 EC's wings are made of steel the machine is designed so you can easily and quickly get the job done. To read our full round up and check out the other products we reviewed, go to our guide on the best lawn edger. Troy-Bilt TB516 EC: Features Troy-Bilt Ec lawn edger just needs a steady, smooth pull on the string to engage the engine. It doesn't come with a push-button start, but Troy-Bilt offers motor starter, an accessory that adds the ease of starting an electric edge on this engine so you don't have to start the machine by hand if you don't want it. JumpStart is a handheld device that runs out from a rechargeable lithium-ion battery that you insert into the engine and pull the trigger to make the machine run. You can adjust the cutting depth of this edge by raising or lowering the handle near the front-wheel bracket. Moving the handle towards the front lifts the blade, and moving it further back increases the depth of cut. The maximum cutting depth is 1.75 inches, which is sufficient for most tasks, and the machine has six depth settings. However, you cannot adjust the blade to an angle, only vertically. This will be limiting for some users. To increase the life span of the blade, you can pass over the same area a few times and gradually lower the blade with each pass. Unlike you do for gas edgers with two-cycle engines, you don't have to mix oil with gas to use the four-cycle Troy-Bilt engine. The tank holds 0.4 liters of gasoline, which is not the biggest capacity we have seen, so you might want to keep the gas from closing at. The four-cycle engine is more efficient than a two-cycle engine, which means it is less harmful to the environment. A primer bulb helps draw fuel into the chamber, making the Troy-Bilt TB516 EC lawn edger easier to start. The machine operates in temperatures below 40 degrees by heating the engine first. If the engine starts to heat up because you are tackling an area of excessive overgrowth, you can raise the blade so that the engine can idle and cool down. The shipping weight for this edger is 22 pounds, which is relatively light and will make it easier to move around than a heavier model. This low weight, in addition to the three sturdy wheels, makes it easy to steer, even on slightly uneven terrain. Troy-Bilt TB516 EC Lawn Cyclist: WarrantyThis gas edges come with a two-year limited warranty, which is pretty standard. It is invalid if you use gas with an ethanol content of more than 10%, operate the machine with the air filter removed or use spare parts that are not from an authorized dealer. Should you buy Troy-Bilt TB516 EC lawn edger? The Troy-Bilt TB516 EC lawn edge is easy to handle and convenient to operate. Its four-cycle engine saves you the hassle of mixing gas with oil, and it's more environmentally friendly than edgers with two-cycle engines. With its power and relatively low weight, this edger is best for great properties. Today's best Troy-Bilt TB516 EC and deals offer
