# Mo creatures addon

Mo'Creatures Mod 1.12.2/10.2 adding more than 60 new animals with mobile monster minecraft, as well as the ability to tame and ride some. Each movement in the animal word collection comes with a splendid textures skin, realistic movement and behavior. These creatures aren't just simple additions to the environment either. Some may be tagged, you may ride some, others will attack you and will drop items etc... The same mode comes with its own menu coming so you can adjust how many times a mob will appear. So if you don't like the sharks because they are too aggressive, just change the setting to stop them spaning. Features: Mobs Mobs' Creatures mode adds about 58 new mobile minecraft, with both realistic, human, and fantasized animals, such as the majestic pegasus and horse making, and even vanomous dragon-like dragon-like dragons. Some mobiles can throw blocks at you, or destroy them. Others can hunt you down on sight, and can even run at your own pace. All these mobs span naturally in the Overworld and the Nether, and a few can get to the Wyvern Lair dimensions. The turned eggs are located in the Creative Mode menu. Default press E and find the Table Mocreatures. Many mobile will either attack the player or fight amongst each other, whereas others can fly or even dig under block. Block Animal Mo' mod adds several new minecraft blocks. Most of these blocks generate in the Wyvern Lair dimension. The Ogre Lair blocks are unused and are only found in the Creative Menu. The word creature's dimension mod adds a dimension to Minecraft, which was Lair's Wyvern. This dimension, as the name suggests, is home to wyverns, bunnies and snakes. Other dimensions, Ogre Lair's, is still in development. When war is over, he will come home to ogres and three princess ogre. Word Creature items' mode adds a variety of minecraft items. Most of these items are either found as drops from mobile when they are killed, or are made by the player. Some items may be useful for navigation of weapons and various weapons. Other items include employees of teleport, which can be used for your teleptor at any desired location, the wyverne portal staff can take you to another dimension, amulet can store your pets, and the built hammer can help you with build. ArmorEd Mo'Creatures mode adds different types of armor that can be turned off by the player to provide extra protection. scorpion weapons, for example, can give you special benefits when it turned out like severe regeneration or being able to breathe underwater. Although armored horses have been vanilla Minecraft items, it is listed here since horses and wyverns can wear it. Screen and surfing recipes: Ents Show Content » » Ents are peaceful creatures that will immunity any kind of weapon but axe. They are attracted to nearby small creatures and span small plants. Moles Shows Content » Moles are very sheepish and hidden under land of larger beasts. Mini Golems shows content » » Golm Mini are mobile that spawn at night and throw rocks at the play. Silver Skeletons Show Content » » Silver Skeletons are mobile aggressively that spawn at night and on dark sides. They can sprint towards the player with his exit. They drop bones or silver swords. Sword agents are quite effective against Arewolves Raccoons displaying content »» Raccoons attack back if induced. They can take them by giving them any edible items. Small and Medium Fish Show Content » » A beautiful variety of small and medium sized fish that can be trapped with a fish and the fish pole this is how a fish is manufactured: Crabs Show Content » » Spawn on the beach next to water. They can take with Wyverns Fish Show Content » » Wyverns are poisonous, can be found on the WyvernLair. Wyvern eggs can be found by killing wyverns (but only on the wyvern air). A wyvern has a 10 chance of dropping an egg. The egg can haunts in the Overworld by placing it near a bonfire and once the C's wyvern grows, it can be armored and armored. The wyvern instances only be accessed using a Wyvern Portal employee. Elephants and Mammoths Show Content » » Elephants Passed on Desserts, Jungles, Plain and Jungles. Mammoths span on cold biomes. Elephant War Hide an elephant can be broken by giving it 10 sugar balls or 5 tamed elephant cakes are cured with baked potatoes, Bread or Haystacks A harness can be placed on adult elephants to make them ride and attach extra things: If a player 'sneaks' near the elephants, he will sit for a while, where he can ride to dismount an elephant , the rider made it sit first and then it can be demonstrated. Indian elephants can give a special luxury dress: In addition to the garment, a beautiful seat can then be given to the elephant. Two sets of chest can be placed on each elephant, allowing it to carry the inventory of a key used to open the inventory. Mammoths can also carry two extra regular chest. Three different types of reinforcement tusk can be manufactured: wood, made and diamond. They can provide them to capture adult elephants with seeds, and take off with a pickaxe. While they are set to reinforcement and climb by the player, they will break blocks. (However that feature is disabled by default in multiplayer, to prevent grief) Mammoths are more from breaking blocks past elephants. Wooden Tusks: Tusks Do: Diamond Tusks: A platform can be placed on the Songhua Mammoth, allowing to bring a second play. To have a passenger, the first rider makes the omit sitting, then the second player 'sneaks' while locked in the oven. The second player can chance the tenths by pressing the sneak key. Komodo Dragon to show Content » » Komodo Dragons spawn on mark and full. They attack animals or players. Komodo's dragon poisonous poisoned them. They release hidden reptile and the largest Komodo Dragons have a 25 chance of dropping eggs. An egg can cleave if placed near a toch and the infants that can cause Komodo Dragon will be tamed. Tamed Komodo dragons can heal by giving it rat rats or turkeys before all editing. You can set up adult Tamed Komodo dragons so he can get rid of me. Golems Show Content » » Golems spawn at night, and first consists of only three blocks: the head, the Core and a cube or a valid cube. When Golem is near a player, he activates and forms his body. Golems have a powerful mixed attack, they also have a row attack, where the Golm is thrown off one of the blocks in his arms. When a Golm is attacked, there is the chance to destroy one of its blocks. The chance to destroy a block depends on the level of the difficulty. If the chest is opened and the core of the eraser is exposed, it will suffer damage. As the Golem suffers damage, it becomes more dangerous. A suggestion of the danger level of the golm is the flow of its power aura. Blue is seen in a non-attacking Golem. Jon on a Golem that began to attack, Orange on the Golem that suffered considerable damage. Red seen on a Golem about to explode. The golem is still trying to find replacement blocks. Whenever a block is accomplished, the golem is healed (the amount of the healing depends also on the difficulty level) It may be wise to look for shelter when the golem power aura is red, as there is not too much time before the gomlem explosions. When a Golem dies, it drops all the blocks that were part of its body (including worth or the cube). Nailed show content » » annatant photos ... They're show and hidden from their shipships, except when they don't have a sterilla. In this case they're just slow. Balls drop nails. Bug Show content » Including butterfly, flies, aries, fireflies, dragonflies and cricket. Just for the sake of Turkey ambient to show content »» Turkeys... they drop turkeys when they are killed that can be cooked. Pretty simple stuff. Horse show content » » Horses are the first controlled mountains in Minecraft. You'll need to take them before you can ride them. Once the ground is overturned, they will not surpass. There's 36! different types of horses available. Only regular horses, asses and grass spans in the wild. Horses need a single device to be rid. You can use either regular devices or horses they. Once you mount the horse, you'll need to break it by riding it repeatedly, you can make the process easier by eating the horse's horse hay, sugar ball or apple. Tamed horses can be pulled with the following combinations: This is the formula for Essence in Undead. The heart of demons is a rare drop in the mobile undead horses, found at night. The word sense is used to find self-healing horses and heal them. When ride with horse defeat, mobile won't attack you. To find rare horses, you need a Zebra and the rare essence: Essence of fire. The heart of the fire found only as a rare drop of nightmares on Ni's. Sense of gloves. That darkness is a rare drop in bath. Bathors are aggressive mobile horses found at night, mostly on rock holes. The light essence is made by combining the other three senses of grass can get more frequently on plain biomes. You can increase the frequency of Zebras swing by changing the 'Zebra Chance' option in the mode. Wild Zebras will run on sight unless you're running a white horse or horse cow (tier 4 horse) or if you're getting rid of another Zebra or Zorse. Once you take a Zebra, you can break a Zorse. Zorses are sterile and if given a sense of fire will transform it into a nightmare. Giving it a sense of darkness will transform Zorse's into a horse fight. If you give a sense of light to a nightmare, you'll find a Unicorn. Unicorns can put other animals and fall very slowly, floating down. If you give a light sense of a horse Beat, while bathing high in the sky at the cloud level, it will be transform in a Pegasus. Pegasus and Unicorns can break a White Horse iron, however both will disappear in the process. You need to give them both Essences of light to get them ready for the iron. Also the sense of light is used to heal them. Whether you give a light blue ink, a red ink, or a whitewash piss in a white horse, it will be transformed into a blue, pink or horse made green. Fairy horses can carry a small inventory, if given a chest. The amulets used to take horses. Horses will be released any device, armor or inventory before being captured in the amulet. Only certain horses trapped in the amulet: Amulet in the sky, for capturing pegasus or dark pegasus amulet pegasus for the unfair horse Ghost amilet, which can take horse ghosty near bones. Light used to capture horse skeleton captured horses are now usable in wear injuries, from softer to surdier. They lower the damage the horses receive. Make armored horses Gold Armored Diamond horses with crystal armor for the rare horses This is how you craft the Sadle horse: The only way to dance a horse by clicking the Sir Clear Color (changes) Quick guide on how to break horses: Rules for breeds: -Horses should stay locked (not more than 4 blocks away) – There should be no other horses around (8 blocks) - You should have no other horses around (8 blocks). Giving a sense of fire will transform it into a nightmare. Giving it a sense of darkness will transform Zorse's into inventory: - Donkeys, mules, pegasus, black pegasus and horses that just can carry the bag - horses need to be tasting, and you need to give it a chest (only once) - A key will appear in your inventory. You can use this key to open any horse inventory. If the key is lost, you can nave a new one. How to activate Nightmare's special ability: It must be approved, you need to give it a red. And ride it... and be careful you can craft a rope: which can be used to bind horses with BigCats, and pick them up right clicking on it, they won't run away from the player. You can then give them a medallion to take them. Once you are given the medallion you can name them. The name and health bar can be balanced over/over individually by right clicking while holding a pickaxe or globally using the in-game mode menu. Medallion: L=Leather G=Gold ingot L G Once the cat takes off, it will look for a kitty bed with food or milk. Kitty Bed: P = wood plank I = iron ingot W = Wool (you can use dyed wool as well, it will give you beds of different colors) P P P P W P I You can place beds and litter boxes by right clicking, and pick them up by right clicking while holding a pickaxe. You can transport a little bed or liter box to yourself by right clicking on it without holding a pickaxe. You can transport kitties that are only scary. The name can be changed by interacting with the kitt will want either milk or pets eating poured into the little bed. While the cat is eating or drinking, you can see the milk / food level shrink. Bet kay Manje: nenpot konbinezon de Raw Pork + Raw Pwason Yon fwa yo te manje twous la manje, li pral gade pou yon bwat litè ki pa sou lit. Litter Box: P = wood plank S = sand P P P P S P P P P The litter box will become 'used'. This article is a powerful allergy for monsters. However ogre won't be swept and Creepers won't explode. Zombies will chase and push it when grain skeletons will throw arrows at it. It's quite an eye after a while, a used litter box will return to its empty state. Once they have been attacked, you can name them. you can also change the name by right clicking on the goat while holding a Tamed box, will roam freely, he can become hungry again and look for food in a little bed again, or he'll fall asleep at night, or try climbing a tree. IF you use a cat whip nearby, they will start and won't move. You can also right click on a chat while carrying a whip individually toggle sitting on / on Whip: L=Leather I=Fe Ingot C=BigCat Claws CL L C L C II the cat has decided to climb a tree, you can watch it climbing. A cat that sets up a tree, will get trapped on top and will need help getting down. You can pick up a cat in three different ways: if it is a kitten, it will climb over your head. An adult cat will go over the player's shoulders. If you pick up a while holding a rope, you will its never read. Cats don't like to be carried in this way and they'll be hamased once you release them. Code: S=Silk S cats can also get erratic if they don't get a litter box or a bed with milk or milk, or if you attack them once they're taking them. Once the chat is annoying, he will chase the player and occasionaly hurt him/her. After a while the chat temperament will improve. A chat will follow you if you have a quilt ball on your hand Wool Ball: S = string S s if you give the quilt ball, it will play with it for a while pursuing it and push it, until the chat gets bore. You can navigate cats by giving them cake. Once the cake is given, the cat will look for another cat that is also in the attitude (giving cake). After a while one of them will get pregnant and will need to find a kit bed. After a long break in the little bed, the cat will give birth to 1-3 cooks. The kittens will be highly played and will chase away any item (not just quilt balls), they will stay put when a whip uses near them (whitin 12 blocks). Also if you right click a Horses or BigCats to craft a whip. Horses and BigCats will stay put when a whip uses near them. If a cat is attacked, his mother will defend them. Cats will show emoticons to give you hysterical at what they're thinking. You can turn off emoticons by using the game mode menu. Mice Show content » They will run away from everything. You can pick up a mouse by its heart. Mice release grass grass. Rats show content » They will attack the player at night or in dark areas, if you attack a rat, all the rats nearby will attack you. They're not too strong and their health is low. They release coal. Deer Show content » Deer will run away nothing bigger than a chicken. They're creature of peace. You can find women, men and fans. They released Beef Pork BigCats™ Show Content »BigCats replace the lions who were part of the initial release in this mode. Besides male and female lions, there are Tigers, Cheetahs, Panthers, Snow Leopards and White Tigers. Female Lions and Tigers will always attack the player. If BigCats will attack only when hungry. And the pork will be fed before all pigs in need of food. Once they eat or kill a beautiful one, they will stop being hungry for a while. BigCats in different breeding will fight among them. Bring on the catfight! Tamed BigCats won't fight in their midst. Wild cubs will hawk spawn. If you toss pork pork or fish before near a cube, and then you give it a medal, you will take it and it won't exceed or attack you. Once he grows into adult size, he'll fight mobs on his own. The cube will attack any other beast smaller than themselves. The larger (almost adult) cube won't be broken. Tamed BigCats will move only a BigCat that has been attacked, it will follow you and fight your enemies Lil' (including piranhas) Show Content » This one spawns from underground. It has the biggest area of damage. He drops stylus. Ducks show content » Nothing original, I used material already available, credit goes to dorinou duck sound plus the package duck pack. Boars show to capture, transport and fish releases. You can craft a fishbol witr four pieces of glass. An empty fishbol can be filled with Water A fishbowl and water can be used to grab fish. The fish can be put into the world and carried around in mind. If you want to bring a fishbol back to your inventory, just right click on it while holding any puck. Dolphins Showcase content » Contains six different types of Dolphins (from common to rare): blue, velvet, violet, black, pink and albinos. The last two qualities seen seen only rarely in the wild. Taming Dolphins: You can tame dolphins by eating them fish before all editing. the rare dolphins, the more fish it requires to attach. A blue dolphins require 2 raw fish editing and an albinography dolphins require 12 previous fish editing. You can also tame dolphins by riding/breaking them. Rare Dolphins are apparent faster than common ones. Breeding Dolphins: Tamed adult dolphins can be consumed by eating them cooked fish and keeping them apart from other animals in a similar fashion than the kingage horse. Young dolphins can't move or get rid of myself. Two dolphins of the same color will always be children of these colors. The Dolphins have a 'genetic value' from 1-6. (blue =1 and albino=6) if you mix and match the Dolphins you have 1/3 likely to find a red or black dolphins if the addition of genetic value to parents is 3 or 4, and you have a 1/10 chance of getting a pink or dolphin albino if the addition of genetic values equals 5 or 6. this means a pink dolphin (5) can be found in 1/10 in case by combining a blue Dolphins (1) plus a Dolphins (4) or a green (2) plus a red (3) dolphin color. Shark shows content » the sharks will attack anything that falls into the water, except squids or other sharks. Sharks have different sizes, if you kill a great shark in easy or higher difficulty, you have a 10 chance of finding an egg shark. Right click on Shark eggs to discard them. If the egg falls into water it will enkubate and a shark's going to kale. Tamed sharks won't surpass and once they're big enough, will attack any other creature except sharks or the player. The shark model was inspired by the charle88 thread. He's been sharing his textures too. Terprove Display Content » » First Metamorical and Small-Position Mobile for Minecraft! Don't be stunned by his appearance and sleek speech, they are outlawed! It releases wood or wooden tools. At night it will be transformed into a vicious top! There are four types of heavy, in special interest is the fire who can set target ablaze. In the daytime the top will be transformed back into the human form in no time. The best way to kill this animal is by using gold items (Think of it as the Minecraft Silver). Be warned, don't face up to one if you don't have a gold sword. It drops gold apples, stones or steel tools. Terprovel sometimes will run on all four, which makes the Faster Bears Show content » There are four heavy types of MoCreatures: Heavy Black and Grizzly loars will attack back if induced. Polar Bears, who strawberry in cold biomes will hunt down the play on sight. Panda bears are peaceful creature creatures that attract sugar cane. You can take a wolf Panda By giving it reed. Once that was attacked, they can use a lazo to track you. Wolves Show Content » » Spawns during the night time, only outside. It will attack you at night, and will not attack unless induced during the day. Hunting beautiful, and of course sheep! Wraith Show Content » New Flying Mob. Spawns only on normal or higher difficulties. Fire flame drops Wraith Show Content »» spawns only in difficult difficulty. Do set you in the fire for a while. Drops redstone. You can see them from a distance because of the flames. Ogre Show Content » » The first mobile destroys block! It destroys brick scheduling blocks and obsessed. It drops Obsessedian or Fire Ogre Show Content » Rarer than the regular oggage, only hard vessels. This destroys blocks and unites the floor on impact. He is fire resisting. It drops 'fire' so you can craft your dogs. Cave Ogre Show Content » » This one spawns from underground. It has the biggest area of damage. He drops stylus. Ducks show content » » They attack smaller and if you get close to them, they can also attack you. Warn Bunnies Show Content » » Courtes of KodaichiZero are four different oven colors. You can take over by picking it up. If you keep two bunnies tasting in a closed space, they will be medication. If you release a batch while being hunted by mobile, mobile will target the batch. Something cool happens if you ride a horse and a bunny hat! Bird! Show content » » Birds add atmosphere to the game. There are six different types, and have different sounds: Dove, Crow, BlueGrosSBeak, Cardinal, Canary and Parrot. You can take a bird by giving it reed. Once overturned, they won't be afraid of you and won't be exceeded. If you pick up a bird, you can swipe safely from the height of Foxes show content » » they will attack only smaller creatures. Most of the work was done by Roundaround. I worked on displaying the 3D models: Ask for: Minecraft Forge Custom Mob Spawner Mod How to Install: Make sure you have already installed Minecraft Forge and Mob Spawner Mod. Find the minecraft application folder. On open windows Run from the Start menu, type %appdata% and click Run. On finding mac open, hold down ALT and click Go Then Library in the top menu bar. Open the applications folder support and look for Minecraft. Set the mode button you should see now the mode is installed.
