To solve this problem QuickShortcutMaker is the best option, QuickShortcutMaker is an Android app that allows users to create shortcuts to hidden apps, device features, and operating system tasks. By default, only typical applications are allocated in the application drawer, which cannot be changed. How to work It's really easy to use and has a simple operating system. The user interface is very clean with only a few tabs. Swipe right and left to move the category bar horizontally where you can find tabs named - Activities, Apps, Favorites, and History. Activities: Displays tasks that are currently running on the system and applications and processes that are running in the background. Apps: All apps installed on your device — that you downloaded and those that are part of the operating system. Favorites: Tasks and apps marked as favorites. History: displays the history of tasks, approaches, and actions performed using QuickShortcutMaker. Easy Search Filter: QuickShortcutMaker app has a device filter to help you figure out tasks and search for installed apps by filling in a keyword. Different search mode: The app offers two types of search mode - normal and incremental search mode. Users can select one of them. Chronological Search: To make it easier to find tasks, QuickShortcutMaker provides search results in alphabetical order. Check your search history: This app also allows you to check your search history to track all the tasks you've done through the app. Favorites list: You can create your own list of favorite tasks. QuickShortcutMaker works really fast. You can create shortcuts quickly and run your favorite actions faster than other platforms. Access App Manager: This Quick Shortcut Maker app lets you learn about the app's full information by accessing the Android app manager. No permissions required: Unlike most other apps, this app doesn't need any root permissions to extend Android features. Translation: QuickShortcutMaker also provides translation into many languages including - Italian, Arabic, German, French, Espanyol, Portuguese, Bahasa, Indonesia, etc. Unique themes: This app provides types of themes where you can choose icons (ADW/Noval/Apex/LauncherPro/GO/Holo). Rate App: QuickShortcutMaker also allows you to rate, know about user feedback, and improve it accordingly. Technical information Download similar quickshortcutmaker applications This application can create an application shortcut from the list of activities that are installed on your phone. Even if so many applications are installed, you can activity smoothly. You can also use QuickShortcutMaker QuickShortcutMaker search in the application you want to run. If you want to use an app you don't use often, you might not have any shortcuts for it. So you may need to search for an app from a list of many apps. Even if you know the name of the app, it's hard to find. In this situation, QuickShortcutMaker will help you find the application. Please try it! This can be useful. But please use it at your own risk! You can create shortcuts to hidden screen settings that are usually not accessible. Even if you have encountered any problems using this app or shortcuts created by this app, I have no responsibility for it. Please make sure to use this app at your own risk. For internet access permissions:From version 2.0.1, to improve your application faster, you will be asked for additional permissions to access the network so that the application can send a detailed error report to the developer. The application uses the network only to send error reports. And when it communicates, you'll see a confirmation message, so please be assured.for Launcher3 from Cyanogenmod If you can't create a shortcut, try the following steps:1.
