## What is the human condition in literature

Ultimate Concerns of Human Existence For other uses, see Human Condition (disambiguation). Not to be confused with human nature. This article needs additional quotes for verification. Please help improve this article by adding quotes to reliable sources. Unsumred material may be challenged and removed. Find sources: Human Condition - News Newspapers Books scholar JSTOR (December 2019) (Learning how and when to delete this typical message) The human condition is the set of key characteristics and events that make up the core of human existence, including birth, growth, emotion, aspiration, conflict and mortality. [1] This is a very broad subject that has been and continues to be reflected and analyzed from many angles, including those of religion, philosophy, history, art, literature, anthropology, psychology and biology. As a literary term, the human condition is generally used in the context of ambiguous subjects, such as the meaning of life or moral concerns. [2] Some Perspectives Each major religion has definitive beliefs about the human condition. For example, Buddhism teaches that life is a perpetual cycle of suffering, death and rebirth from which humans can be liberated by the Noble Path of the Eight. Meanwhile, many Christians believe that humans are born in a sinful state and are condemned in the afterlife unless they receive salvation through Jesus Christ. Philosophers have provided many perspectives. An influential old vision was that of the Republic in which Plato explored the question what is justice? and postulated that it was not primarily a question of individuals but of society as a whole, prompting him to conceive a utopia. Two thousand years later, René Descartes declared, I think I am because he believed that the human spirit, especially its capacity for reason, was the principal determinant of truth; for this, he is often credited as the father of modern philosophy. [3] Such a modern school, existentialism, attempts to reconcile the feeling of an individual's disorientation and confusion in a universe considered absurd. Many literary works offer a perspective on the human condition. A famous example is Shakespeare's monologue Everyone is a Scene which thoughtfully summarizes seven phases of human life. Psychology has many theories, such as the hierarchy of Maslow's needs and the notion of identity crisis. It also has various methods, such as logotherapy developed by Holocaust survivor Viktor Frankl, for and assert a sense of meaning. Another method, cognitive behavioural therapy, has become a widespread treatment for clinical depression. Since 1859, when Charles Darwin published On the Origin of Species, the biological theory of evolution has been significant. The theory posts that the human species is linked to all others, living and extinct, and that selection is the main survival factor. This provided a basis for new beliefs, such as social Darwinism and theistic evolution. The use of the term Notable use of the term human condition includes André Malraux's 1933 novel Man's Fate, René Magritte's paintings The Human Condition, Hannah Arendt's political philosophy and Masaki Kobayashi's Japanese film trilogy. See also Human Nature The self-reflection of references - entry human condition in Wiktionary - a b The human condition in the literature - Bertrand Russell (2004) History of Western Philosophy pp.511, 516-7 - Driessen Ellen; Hollon Steven D (2010). Cognitive-behavioural therapy for mood disorders: effectiveness, moderators and mediators. psychiatric clinics in North America. 33 (3): 537–55. doi:10.1016/j.psc.2010.04.005. PMC 2933381. PMID 20599132. Excerpt from What is the human condition? The human condition is an important part of our understanding of literature. Literary critics often refer to a piece of writing literature - not pulp fiction - if it attempts to describe this human condition. According to Reference.Com, this concept refers to everything that is unique about being human, regardless of gender, race or religion of the person. We are a species that, regardless of our individual differences, shares common challenges, questions and characters. Essentially, the discussion of the human condition is any thematic concern about human nature, human society or how we live our lives. In other words, these are the fundamental questions of human existence. One of the main concerns of the literature is to comment on these issues: it might be better to it than psychology or philosophy! If you are asked to make a thematic statement about a piece of writing, the best way to identify a theme is to seek a challenge to the human condition. Look for common problems or conflicts that anyone might face in their lives. So let's be more specific. What kind of issues are we talking about about human nature, human society or how we live our lives? Well, that can mean a lot of different things! Here are some examples that come to mind: How we live our lives - What is the good life? -How do parents act towards their children? -How can we cope with death? -How can we cope with the alienation of those around us? -Should we comply or be original? -How to become adults? What is the maturation process? -What is the relationship between different generations or genders?-How to deal with poverty or excessive wealth? Human Nature - Are we naturally bad or good? -Are we born with inherited traits or are we a virgin slate? What is more important for human beings? Law, order or freedom? -Are we determined by our genetic structure, our environment, etc., or do we have free will? -Are we naturally naturally or are we individuals first? -Can we know the universal truths? -Are we selfish or altruistic? Human Society - What is the best way to live together? -Should we take care of the weak and the poor, or let them fend for themselves? -What is a natural society: equality or hierarchy? -Is civilization positive or negative? -How should society treat the environment? Some authors merely describe these issues, while others will provide their particular views and beliefs. So when you're looking for a comment on the human condition in your readings, look for these central thematic questions. You won't find them, say, in the James Bond novels, but most of the prose and poetry you read in English classes will have that element. by C. Welch As part of the Modern Learning Leader Program, the first webinar is on The Human Condition, with Work Emotion Expert Phil Wilcox. What is The Human Condition? Aside from understanding the real words, I'm not sure what that means. Obviously, the place to start is Google! I thought I could start with an overview of some of the quotations that have been organized on the subject, including: It is not the consciousness of men that determines their being, but, on the contrary, their social being that determines their consciousness. - Karl Marx, A contribution to criticism of political economy Our behavior is a function of our decisions, not our conditions. - Stephen R. Covey , The 7 Habits of Very Effective People: Powerful Lessons in Personal Change Humanity is lost because people have abandoned the use of their consciousness as a compass. - Suzy Kassem, Rise Up and Salute the Sun: The Writings of Suzy Kassem It seems that the focus is on us as individuals, individuals, team members and, ultimately, Leaders. It's about how we investigate, communicate, reach conclusions, make decisions, take people on trips with us. . Wikipedia has this to say on the subject: The human condition is the characteristics, key events, and situations that make up the bulk of human existence, such as birth, growth, emotionality, aspiration, conflict and mortality. It is a very broad subject that has been and continues to be reflected and analyzed from many angles, including those of religion, philosophy, history, art, literature, anthropology, psychology and biology. As a literary term, the human condition is generally used in the context of ambiguous subjects such as the meaning of life or Moral. The most fundamental element of us is our humanity, for all of us. However, even just looking at this Wikipedia introduction, which can encompass so many things - where I am in my life and my career path, my gender and health, my religion, or lack of, what philosophies or values lead me, what I read, how I see others from my point of view and much more. It must also, too, be about how we relate to other humans, either those who are doing well with our prospects, or those who do not. Perhaps especially those who do not, because there are always challenges in life and some, we do not have an easy choice to go away. The Human Condition and Learning in his pgce documentation Different perspectives on lesson evaluation and development as teachers Richard Denny opening line is education is a fundamental aspect of the human condition. Without development and education, over thousands of years, we would not be the humans we are now, and in the society we are now. In addition to the focus on the jobs we do in learning and development. Part of the pre-work is a TEDx video shared by Phil: One aspect I particularly liked about this was about understanding the audience, that people generally think it's a blank slate and as communicators, we can do things that make sense to us and drop it in them. He said: It is neither correct nor productive. We need to understand that culture always complicates our work as communicators. We need to take culture into account in our roles as the L and D - both the geographic culture of the country and the specific location we find ourselves in, the situation of the people there, and that of the industry and the organization itself. The Human Condition and Live Online Learning As my specialty is virtual classroom and webinar training, I have to consider what it means when I help teams of people develop their design and delivery skills. I like the point about culture always complicates our work as communicators and I see it with organizations, teams and individuals when it comes to their approaches or attitudes to living online learning. Before the Covid-19 outbreak in 2020, it was largely that it could not be done, that it was not appropriate or necessary. Throughout the year 2020, this has changed a lot, and yet the culture or belief that people had was still something to break through in order to see how positive live online learning sessions could be.
