Publisher: Focus on the hit as much as you (don't) like E. L. James and her trilogy about the gray tones of a single relationship, you have to admit that its success is part of not only a gray discovery or a dark connection within the four walls of one room, but also that it's definitely one of the best marketing projects in recent times. As it seems today, many with loathing refused to read the book Fifty Shades of Grey and then two sequels because they immediately decided it was cheap junk. I'm sure you won't be smarter than these books, but we're not going to be stupid anymore. This is, they say, the only modern book that talks about bdsm sex, at least its chapters tickling and different in this way from a ton of violets, briefly recounted. Christian Grey is a beautiful, young, successful and wealthy man that everyone admires. Young Anastasia Steele is a student of English literature, calm, smart, good reading. While Christian has a mother and father Anastasia grew up with her mother and stepfather. Mom is a long-time romantic who's in a new marriage (Tuesday or Wednesday), but Anastasia is still attached to her stepfather. Her friend and partner Kate, a wealthy girl, also self-conscious and direct, asked Anastasia to do an interview that had already been arranged for their college paper instead. Kate has the flu, so Anastasia, or Anna as everyone calls her, reluctantly went to Grey's wealthy office. Since he has no idea who he is, he's not afraid of him or admires him. She has a list of questions given to her by Kate, but right after entering the building she sees that people who are not her world work there – all women are beautiful, decorated, everything is rigid, business, and she is a lover of literature, a calm and humble girl. She wasn't impressed with the surroundings or the grey, but, nevertheless, sparked an arson between them. And it would be a normal love story if Gray didn't have a problem - he couldn't trust anyone because as a child he was neglected, horrific abused, he grew up with a mother who was a junkie, and the trauma he carries in is bullying and beating from mom's friends. He was also locked up in a house with his mother who died and it's a nightmare that never stops. After that, he was placed in foster care until he was officially adopted by the greys - the doctor and her husband. Besides Christian, they have two other children. Gray amassed his first sexual experiences through predatory sex, of a mother of Vichu Sado-Mazo, who sedied the boy and enslaved himself. It's his secret and his trauma. We'll find out all this through these three books. There are elements of crime, breakups and meetings and love, hatred, revenge... All. Anna breaks down all of Christian's barriers, and we really don't tell you what or how. Maybe you'll read the books (though). As we all know, a film was also made that was expected with great impatience, but since gray sex is only part of the story That few believed he would be faithfully in the film. After all, Jamie Dornan who plays Grey overnight became a sex symbol and so did Dakota Johnson, daughter of Don Johnson and Melanie Griffith, granddaughter of Tippi Hedran (hitchcock's blonde from Byrd who recently turned 85). But James also wrote the fourth book. By then, the world was already divided into those for and against the Grey trilogy, as before that for and against the Twilight saga (and before and far, potter much better). Fans or rather followers waited impatiently for Gray's exit. Because it's the book, for now the first, from his point of view or: how the whole story comes when Gray tells it. And that's the problem now. Christian is a very nice and smooth man. Intelligent, knowledgeable, polite, perfect manners. Never rude and never rude. He holds Anna like some water in the palm of his hand. In fact, with her honesty, faith, trust and love, she slips on the wounds and stonings he has carried since early childhood, which are really not easy. But now that he's telling his story, it's different from what readers got an impression of. At least at first. Maybe every man only thinks about sex, but only that much? No job would work for him if he was so busy fantasizing about Anna. Or sex. Second, a man who has so many manners cannot speak to him in internal monologues as a continuous regent. That's the problem. Besides, what else can he tell us? We discovered everything (at least those who read) all the secrets, the dark secrets he dealt with, which made him sado - a hugging lover who, nevertheless, also practices regular, so-called vanilla sex. The review buried the novel. Nothing new because they weren't thrilled with the trilogy either. But the fans went from start to second and of course the third to revolutionize publishing because the speed of sales has defeated all previous records. So that was with that, the fourth. Meanwhile, the first film is out, and two sequels are pending, though there's still some debate about who's imagining Gray and, yes, he's made the film a ton of money. The review, of course, buried him. And now there's Grey and not just that -- James has announced that she will also write two sequels to Grey's re-book. Not all fans are also excited because reading the same novel just from Gray's perspective certainly doesn't give new twists. But everyone was interested in how Gray looked at this life-changed relationship. As much as some were drawn to the story of an innocent and beautiful young girl softening a closed beauty and the most desirable person to ever walk around the earth, even his kinky room was easier or easier to bear. Now he's a lot darker and he looks like some kind of lunatic. A lot of people don't like that. In this book, Anna bites her lip more often than in these three. All through truth, from the witty emails to the sentences he's telling this time. So recycling, recycling and recycling. What would occur to you about the other two books we don't even dare think about? Will the fans buy them? And how many copies? If Gray is dark but attractive, after this book his aura has fermented. After all, as they said – Grey is young, rich, so it could have passed. If he was young and poor, or black and poor, it would be a whole different story. And it's really dark. Because what was from Anastasia's point of view is comfortable (except) his darkness. Example, from the beginning of the book: When Anna stumbles into his office and sees him for the first time and their eyes meet, this is a historic moment for fans. Now the soap bubble's broken. Because Christian wonders what her skin will look like, pink and hot, on fire from being bitten by an being. And she's thinking about how hitting can improve her motor skills. yes, we didn't need to know that, the fans say. In short, apart from recycling, there's a lot of copy and paste here. If someone did praise James, that hand on the heart isn't a supreme writer and recreated a few things for exhaustion (if some girl bit her lip so many times, I guess she wouldn't have lips after the first part), but somehow she was able to describe the sex scenes without becoming pornographic or gobsmlless. If we take James as someone who writes light, sometimes it's funny. But now Christians are noticed - his inner turmoil is banal, gritty, full of beards and profanity, and he's arrogant, self-obsessed. It all comes down to sex, his passion for sex and an obsession with food - Anna would live every time he said something and eat something and pull out houses with a crane. If a trilogy is a fantasy with sex streams, it's scary. All the way to the end. Then Christian opens up, but it's only for those who make it to the last part of the book. The original first part was fun for a moment – it's not. Christian is almost a psychopath and many, many fans can't forgive James. As one reader wrote: I have no intention of protecting my daughter from reading Grey if she wants to. But rest assured, I'll tell her that if she meets a man like that in her life, she runs for her life regardless. Because he won't have money or a helicopter, Ralph Lauren boxseers, Brioni contacts, don't sign documents with Mont Blanc and don't want to drink Sancerre – which, in any case, kicks can't moderate. You think he's really going to go for Grey 2 and 3? After 1,500 pages of Grey and 125 million books from burners that held a place on the New York Times bestseller list for 133 weeks in a row, it's also the first. Fifty Shades of Grey and a bestselling book on the Kindle, do we need so much grey? In four days, 1.1 million copies were sold. Sandra Veić Sukreški Knjiga in Croetic!
