Hopefully you read this section before ranking this app. Hopefully there will be at least 5 stars due to these :)FAQ:Q: Will you make this app offline? A: No, we won't be doing this app offline because it means we have to put a file of physical songs into the app and the file size of the app will become huge and will be difficult to install. Q: Song titles on the radio menu? A: It will be the right radio station to put up with the name of the songs, there is nothing we can do about it. We just share it with you. Q: Download option? A: There will be no download option as this will infringe copyrights on the original songs. Q: Search bar? A: There's no search bar because it will make displaying the song smaller for small phone users. We want to make this app enjoyable for everyoneQ: Why can't I play songs? A: Please check your Internet connection. If that doesn't work, just email us which songs you can't play and we'll check it out right away. We always try the app first before every update, so it should work perfectly. You can find our email address at the bottom of this page.* All credits go to the songwriter, no download option **If you find any song errors, just email us about the song title and we'll fix them for you :) Our email address is at the bottom of this page ****** INTRO*****Listen to the most popular best nightcore songs around the world from your smartphone anywhere and anytime you want Night Editing is a remix track that speeds up and increases the pitch of its source material.
