POCO Launcher 2.0 - What's New: Dark Mode deployed You can change the style of notification badge (Dots or Count) as your device runs Android 8.0 or later. you can double-tap on the screen to close device now. Show more local results in search (type less!) include home screen icons. We expanded functional support for various phone models. POCO Launcher is fully compatible with Android Q now. The Chinese smartphone manufacturer, Xiaomi, has arrived with much power on the market as one of the brands that can offer high-performance products that can compete with other well-known manufacturers such as Samsung, Sony, LG or Motorola at a much lower price. The latter helped it get a big user base in barely any time at all, and they have now decided to release their own launcher. Design, speed and lightness... Its main assets The possibilities offered by Android in terms of adjusting the operating system have led to the development of this POCO Launcher 2.0, the main features of based on its low consumption and low weight, which makes it ideal for all users who require an environment adapted to their needs. These are the main features of the application: Organize the home screen sort your apps as you deem appropriate, even indicating categories by color codes. Perform searches from apps that receive recommendations about those you need to use at every moment. Create custom groups to always find the apps you need depending on using your smartphone at every moment. Protect the privacy of your apps and hide them from other users. Use your Android much faster thanks to its optimized performance and lightweight. Forget about animations and slow transition screens. Screens.
