Armitron Sport Digital Watch 40/8246, MO935, owner's guide. Armitron Watch MO935 owner's guide. How to set ARMItron WR330FT, MO935, every sport watch. How do you set the time on Armitron 40/8246 WR330ft? Armitron men 40/8246 metallic gray, or any of the other colors, Chronograph Sport Digital Watch. I bought the 2 Armitron Watch, the M0935, and I see that Armitron does not mention the M0935 on their website. If you loose your owner's guide and try to find it on the line, Armitron will have no help. Therefore, I scanned it (sides 1 and 2, below), and presented it here. (Click on them to view the Pull size and then download or print them.) The name, model, of this watch (and many armitron watches) is confusing. On the front, wr330ft says, but on the back, it says many things including 40/8246 and M0935. The evidence that came with it says M0935 – so it is m0935 – who will ever know?!. (You can click to see full-size images and/or print full-size manual images below) For example: novel time features mode (hours, minutes, seconds, date, day of the week) [2] 24 hours alert hour: one sound 'alert' every full hour chronograph mode: hours, minutes, Second and 1/100th of a second with lap process countdown world timer time 12/24 hours (military time) water resistant to 330ft. INSTALITE – Light – Electric Luminescent display time display time view mode, minutes, seconds, date, and day of the week. From time mode, press 'b' once. The chronograph mode appears. Press 'B' five times to return to time mode. From time mode, press 'B' twice. The countdown timer mode appears. Press Four times to return to time mode. From time mode, press 'b' three times. World Time mode appears. Press 'B' three times to return to Time.1 mode. From time mode, press 'b' four times. Warning mode 1 appears. Press 'B' twice to return to time mode. From time mode, press 'b' five times. Alarm mode 2 appears. Press 'B' once to return to time mode. Press the 'D' light or 'light' button in any mode to illuminate the face of the watch for three seconds. Note: Excessive backlight use will reduce battery life. I also got a owners' guide, and put instructions, for DDD Armitron 0365 and Armitron WR 165 FT armitron monitoring company produces sports and dress watches for men and women. It is available in many supermarkets, general retail stores and jewelry stores. According to The Armitron website, the company is the best-selling brand of watches in many stores. Armitron watches are sold in more than 10,000 stores across the country, the company says. Armitron WR330 Armitron is also called all sport or black chronograph belt sports watch #408125BLK. Press the button at the top left side of the clock until the seconds flash, then press the button on the button at the top left side of the watch to convert seconds to zero. Stop when you reach the required hour. Press the button on the lower left side of the clock until the minutes flash. Press and hold the button at the top left side of the clock to change the minutes. Stop when you reach the desired time. Press the button on the lower left side of the clock until the month blinks. Press and hold the button at the top left side of the clock to change the month. Stop when you reach the desired month. Press the button on the lower left side of the clock until today's date flashes. Press and hold the button at the top left side of the clock to change today's date. Stop when you reach the desired date. Press the button on the lower left side of the watch to confirm the changes. References need to know how something works and you have lost your guide? Get some evidence here. To search for evidence in pdf formats, enter the pattern number on the back cover of your watch. Please insert the pattern number. On the back of your Armitron watch, please search for your style number of 6 digits. The pattern number must start with either two or two digits, followed by a front police and a 4-digit number. If you have trouble locating your #style, please contact customer support for more assisstance. Sorry, there is. PDF file for SKU #. Please contact customer service: please contact customer service: 1-866-631-0342 or (718)784-0700 support@armitron.com Armitron All-Sport watch, available for men and women, retail under $20 in 2010. In addition to displaying time, Armitron All-Sport watches can act as a timer and have an alarm. To use this watch correctly, you need to know how to program it. Locate the four metal buttons next to the face of the watch in four corners around the dial. The user's guide to watching Armitron All-Sport labels the top button on the left A, bottom left as B, the top right button as C and the bottom right as D. Press and hold the group button, A, to set the time and date on your watch. This will cause the numbers on the face of the watch to flash. Press the C button to zero the number of seconds. Click on B to submit settings to hours and minutes. Click on C to advance hours and minutes to get a 24-hour reading to match real time. Press B twice, followed by A to adjust the alarm. This will cause alarm time to flash, starting with hours. Click on C to advance the hours. Press b again and then C to advance the minutes setting. Enter alert mode by pressing B twice. Press C to change the activation state for both alert and harmony every hour. The alarm state is indicated and chime sime every hour by the bell code and the house respectively on the face of the watch. 1 Press the reset button until the clock is sounding. Locate the reset button on the upper left side of armitron's view. Press the button for 3 seconds or until it sounds louder. You should notice the numbers on the screen start flashing. [1] Depending on your watch model, you may say the set button instead of reset. 2 Press the mode button to change between hours, minutes, day and date. The mode button is usually found on the lower right side of the Armitron watch. When you press the mode button, the section that detects a flash on the screen will change. This way, you can easily switch between changing the clock, minutes, day, and date. Keep pressing the mode until you reach the value you need to change. [2] All that is flashing on your watch is the value that you change. 3 Increase the number by pressing the St/Stp button. Locate the St/Stp button on the upper right side of the Armitron watch. When you want to change a value, press the button until you reach the correct number. If you need to reach a time or a day earlier, press the button until it's over. [3] Check if you have the time specified as AM or PM on your watch so that all the information is accurate. In some models, such as WR330, the St/STP button named Adj. 4 may be press the reset button at the top left when you're done. After all information has been set Press the reset button to lock in all the information. Check your watch during the next day to make sure the time is right. [4] If there is a fourth button on your watch, it is not used to set the time or date. 1 Pull the crown on the side of the Armitron watch until once clicked to determine the date. The crown is the dial on the left or right side of the watch face. Pinch the crown between your fingers and pull it until it clicks once. If you hear more than one click, push the crown back and pull it slowly. [5] If your watch does not display the date, the crown will be withdrawn only once to determine the time. You can skip this step. 2 Turn the crown until the correct date appears in the window. Rotate the crown clockwise or counterclockwise depending on the clock model. Keep turning it until the right date in the window on the face of your watch. If you just need to change the date, push the crown all the way in to set it. [6] Avoid setting the date on your watch between 11 p.m. and 5 a.m. as when you advance to the next day. 3 Pull the crown until it clicks twice to set a day of the week and time. If you have a watch showing the day/date, drag the crown until it clicks twice. If your watch doesn't have that screen, simply pull the crown so it doesn't go any further. [7] 4 Rotate the crown until the day of the week is correct. Turn the crown clockwise or counterclockwise depending on the watch model you're using. The hands rotate for 2 full rotations around the face of the watch to proceed by 24 hours. Continue to turn the crown until you reach the right day of the week. [8] Do not set the day of the week between 11 p.m. and 5 a.m. as this is the time when the watch will advance. 5 Adjust the time by rotating the crown. Once you have a day of the week and the specified date, turn the crown up the points hands at the right time. Get as close as possible to the right time so that your watch is accurate in a minute or two. [9] Hands will not begin to move on their own until they press the crown again. If your watch has a military time disc, make sure it's true compared to the current time. 6 Push the crown all the way in to set the time. Once you make all your adjustments, press the crown along the way in it starts again. Check the watch periodically throughout the day to make sure it keeps the time on. [10] If the clock continues to lag, you may need to replace the battery. 7 is over. Add a new question to I have armitron 45/7041, a sports watch with red around it. The alarm goes off every 3-ish minutes. How do I stop it? Put the press up a1 a2 or a3 pops then where CHRONO says adj or set and fidget with it, and it should work. Question I have an armitron sports watch, a black resin band bar with a silver ontop plate. The model says 45/7042. How do I change the watch format from 24 12? Go to adjust the timer and then the hours. Change the hour time until you get the time you want. I will cycle through military time, then am, then PM. Question I need to reset today; How can I do that? Press the mode until the time change opens, then press the right side buttons. The first minutes will flash; Question how do I set an alarm on my Armitron watch? Hold down the A button to show the alarm, then use the same buttons you use to change the time to set it. Question how do I find a guide to watching my Armitron? It should be in the box where it came, if not, visit armitron's website and select a guide location for your form. Question how do I turn off the alarm and uncode the alarm on my Armitron watch? Press reset and button st/stp (top 2) until two sounds are made twice. Then his alarm may stop the alarm icon automatically goes away when the alarm is off. Question how do I stop my alarm clock from coming out on my Armitron watch? I've accidentally tuned hold down the reset and st/stp (top 2) until the clock bends twice. Once it alerts, the alarm is off. Hold down the reset and st/stp (top 2) until the clock bends twice. Once alerted, the alarm is turned off. Hold down the reset and start/stop [top 2] until the clock is ticking twice. Once a sound is made, the alarm is turned off. Ask a question thank you!
