Error occurred during initialization of vm eclipse

I have a Windows 7 64bit operating system, I installed Java by creating a new environmental variable called PATH and wrote a way to the bin folder. When I write javac, it works very well, but when I launch the program, it says the error occurred during the initialization of java.nio.charset.UnsupportedCharsetException java jvm Source Claudio Ravanelli February 14, 2013 at 18:37 Mentioned Exception There was an error in the initialization of virtual machine java.nio.charset.UnsupportedCharsetException can be thrown using the wrong encoding of symbols (as mentioned here). But it can also be caused by installing the current java by installing a 32-bit version on a 64-bit platform. Make sure you are using JRE correctly (64bit) with the correct version of JDK. Make sure you're using the correct path if there are different settings nearby. If the target platforms are different, Java may cause this error. So the solution in this case is to remove all previous jre and JDK installed and reinstall the JDK 64bit net (usually including JRE). CompetitorHashMap February 17, 2013 at 16:00 I just ran into the same bug today after switching to a new workspace with Eclipse. Here's what happened: Eclipse decided to choose the jre7 folder in my Java dir as the default jre (which leads to the error mentioned) and does not offer an alternative option. (I usually use jdk1.7.x.x in Java dir, which obviously also contains JRE...) Simple Fix: After going through the Eclipse window - > settings - Java > - > installed JREs deletes the wrong record and add a path to the correct folder. Unfortunately, if any projects have already been imported or set up servers, Eclipse does not update them to the new VM standard, so this should be done I'm not sure this setting applies to your particular problem, but it's very easy to run this bug. Once you have installed a non-working (and forgotten) JRE that automatically selects Eclipse. newur June 26, 2013 at 17:40 Java Error occurred during fixed VM initialization? I tried to make a Minecraft server and I have the following error at launch: The error occurred when the initialization of VM failed to reserve enough space for a bunch of error objects: failed ... Android Studio Gradle project failed to launch the demonic process / initialization of the virtual machine Version Android Studio (Beta) 0.8.4 OS version: Windows 8 Java JRE / JDK version: 1.8.0/11 Error:to Unable to start the daemon process. This issue may be caused by incorrect configuration of.. Java Error occurred during the initialization of the VM bug using the eclipse in Windows 7. When I set the Xmx option to more than 1500m, the following error message appears: Error occurred during VM initialization could not reserve ... Exception in the main thread java.lang.OutOfMemoryError: Java heap space I use Eclipse to run Java class, while I run it, I received this exceptional error in java.lang.OutOfMemoryError thread: Java heap space then I changed VM out ... There was an error in the initialization of VM (java.lang.StackOverflowError) in Android Today I suddenly started to face the error occurred during the initialization of VMjava / lang / NoClassDefFoundError: java / lang / ref / FinalReference in Indigo Eclipse. I followed here and also tried... fix an error that occurred when vm java was initiated? I connected to a Linux-based server using ssh. I recently installed JDK using the following command: sudo yum install java-1.6.0-openjdk-devel and jdk installed successfully, but whenever I ... Error: java/lang/NoClassDefFoundError: java/lang/Object I use Linux Ubuntu 13.10 I try to run and i get the following error: /usr/lib/jvm/java-7-openjdk-amd64/jre/lib/rt.jar: Successful error occurred during VM initialization ... In ubuntu java version gives an error that occurs when initializing VM I Ubuntu 64 bit 13.10 I have a manual installation java 8 on my machine, but when I do this java-version gives me orbit@parth-desktop:~\$ java-version error occurred during ... Java.exe: The error occurred during the initialization of VM Every time I try to run Java.exe, in this case Java.exe-version, i get this conclusion: Error occurred during initialization of Java VM / lang / NoClassDefFoundError:... There was an error in the initialization of VM java /lang/NoClassDefFoundError: java /lang/Object error exact I get this error occurred during the initialization of Java/lang/NoClassDefFoundError: java/lang/Object I get this error when I type java-version or not... I tried to make a Minecraft server and I received the following error at launch: The error occurred when the initialization of VM failed to reserve enough space for a bunch of Bug objects: failed to create a virtual Java error machine: there was a fatal exception. The program will come out. I tried everything I could find: I created class and classpath variables that went to my java bin folder. I re-installed Java, making sure it was 64-bit, would be my computer. However, I receive this error. Does anyone know the solution? Java virtual initialization-machine Source user3066803 March 9, 2014 at 00:28 to resolve error during VM initialization (Java)? I have a

Windows 7 64bit operating system, I installed Java by creating a new environmental variable called PATH and wrote a way to the bin folder. When I write javac, it works very well, but when I run the program, it says error occurred during initialization vm java.nio.charset.unsupportedcharexception Java Error occurred during initialization VM error I Eclipse in Windows 7. When I set the Xmx option to more than 1500m, the following error message appears: Error occurred during VM initialization could not reserve enough space for the object and eclipse heap, and jdk is a 64-bit version. Physical memory I have 4g Try to highlight more RAM than the system will allow you to highlight. In the release scenario, the Xmx/Arguments function is below the site value. Rogue March 9, 2014 at 00:29 I actually noticed this problem when you try to take a dump service running Java. Try to use psexec-s to perform dump I'm not sure why it works on some servers and not on other user3608737 06 May 2014 at 14:47 Run JVM using -XX:MaxHeapSize q256m (or any large number) and, can -Xmx512m Melih Alt'nta' March 9, 2014 at 00:32 There was an error in the initialization of VM (java.lang.StackOverErflowor) in Android Today I suddenly began to confront the error occurred during the initialization of VMjava/lang/NoClassDDDDfoundError: java/lang/ref/FinalReference in Indigo. I followed here and also tried here and now i get: Error occurred during initialization of Java.lang.StackOverflowError I... In the Java Ubuntu version gives an error that occurs when initializing VM I Ubuntu 64 bit 13.10 I have a manual installation java 8 on my machine, but when I do this java-version gives me orbit@parth-desktop:~\$ java-version error occurred during initialization VM java/lang/NoClassdeffoerror: java/lang I installed java... I had the same mistake. Running cmd on behalf of the administrator resolved this issue. Erik 04 July 2014 at 10:14 Am I encountered this error when trying to build a selenium webdriver. So suggested above Rogue, we need to reduce dedicated memory in arguments. I changed the arguments for the size of a pile of Java, it would be below java \$JAVA_OPTS -Xmx256m -XX:MaxPermSize512m -XX:ReservedCodeCacheSize256m -jar third_party/jruby/jruby-complete.jar -X-C -S rake \$3x4wk September 20, 2015 at 17:05 I also encountered this problem when my IntelliJDEA pointed out more memory jvm than allocated system. My problem is solved by simply deleting JDK and installing it again. Yasir Shabbir Choudhary May 30, 2016 at 7:27 AM It Happened to Me. My eclipse won't work. Removed and reinstalled as 3 times and unlucky. I came up with this question while searching google, and Yasser's answer helped me because recently I also installed IntelliJ in my developer box. So I deleted the C:\Program Files\Java folder and reinstalled Java in the default installation folder, and it worked. I also had a jdk in my system path from the previous setup. JNetputne 08 February 2018 at 16:50 Maximum size heap reduced from Java 6 to Java 7? Currently we are facing a problem, our Java application can work smoothly with JRE6, but for JRE7 will sometimes report on the Java virtual machine and will not be able to ... Android Studio Gradle project failed to launch the demonic process / initialization of the virtual machine Version Android Studio (Beta) 0.8.4 OS version: Windows 8 Java JRE / JDK version: 1.8.0/11 Error:to Unable to start the daemon process.
